Nifty Intraday Chart

Market Outlook

Indian equities gave range bound and choppy movement throughout the day on Monday and after opening on a subdued note, Nifty traded in the narrow band of 10088 and 10046. At the end of the day the index closed at 10057.40. It had a net loss of 0.09% over the previous trading day's close. The broader market was in favor of bulls as the midcap and small cap indices outshined the benchmark index and closed the day after gaining 1% each.

On the sectoral front, some buying interest was witnessed in Realty, PSU Banking and financial services stocks while IT and Pharmaceuticals stocks have shown some weakness. The breadth of the market was positive and about three shares advanced for two shares declined at NSE.

NIfty derivative range as suggested by structure of open interest at different strike price suggests 9800-10000 for remaining days of July series. Initial range suggested for August series is 9700-10000. Also at the money strangle premium for August series is Rs 267 much higher than how July series has started and this implies market participants assumes some volatility in August series. After correcting sharply in May, Nifty Small Cap Index made a new high on Friday suggesting sharp stock specific move will continue.

Among international development - Venezuela's sovereign debt saw sharp decline last week amid talk of US sanction ahead of Venezuela's president announcing to re-write its constitutions. Venezuela's GDP has already shrunk by about 32% since 2014 as it is dependent mostly on oil export. Any further negative development here could see higher volatility in commodity market across globe.

IEA Snapshot

IOC

"NEUTRAL" **8TH Aug 2017**

Indian Oil is the largest petrochemical company with the 35% of the India's total refining capacity. The company with its strong distribution network of 25000+ outlets, caters about half of the petroleum demand of India. In Q1FY18 company has posted revenue of Rs. 1,05,434 Cr., growth of 22% YoY where as PAT declines by 45% YoY to Rs.4549 Cr. GRM for Q1FY18 is 4.32 USD/barrel vs 9.98 USD/barrel in same period of FY17. We have been positive on IOC for more than a year on account of the projected volume growth arising out of paradip refinery and also enhanced GRM due to the new capacity at Paradip that is able to process high sulphur content effectively. Recently, the paradip's capacity utilisation has reached 85% which suggest that volume growth story will now go on backfoot. Also, the high GRM that IOC has been commanding over other refineries due to its new plant should now get stable. Hence we revise our rating from BUY to NEUTRAL keeping the target price intact at Rs445/-. Currently stock is trading at 1.7x FY19's Expected Book value (BV).

M&M

"BUY" **7th Aug 2017**

M&M is the leading Tractor manufacturer in the country with a market share of over 42%. The Farm Equipment segment of the company has the best margins(17%) in both the segment (Auto and Farm Equipment) and the management is focusing to encash this by expanding this business in the export market, which will fetch better returns to the company going ahead. Demand scenario in the tractor segment looks promising based on good monsoon, declining interest rate and improving rural infrastructure. The company also plans to regain the lost market share in the utility vehicle segment by launching one new product in FY18 based on M&M platform and another in FY19 based on Ssangyong platform. Ssangyong has also shown recovery in the business and posted positive results after three years of consecutive losses. We expect that RoE to maintain over 13.5% in FY18. Based on SOTP valuation method we have valued the standalone business at Rs. 1112 per share and subsidiaries at Rs. 487 per share. We maintain BUY on the stock with target price of Rs. 1600.
