### Recovery in volume to continue while margin may shrink

Last quarter was decent for almost all FMCG companies in our horizon in terms of volume growth which was driven by stabilization of trade channels, demand coming back as well as lower base of previous year. Some companies also witnessed better growth from rural market while some has witnessed market share gain from unorganized sector but most of the companies maintained a cautious view on rural demand recovery.

In Q4FY18E, we expect companies to maintain high single digit volume growth on account of demand recovery in rural market, stabilization of trade channels and lower base of previous year while margin will be in pressure as most of the companies have not taken price hike and prices of key raw materials have risen from previous year level. As far as international business is concern, the companies which has higher presence in the MENA region will be benefitted from improving economic condition there. CSD to remain in pressure. Modern trade will continue to perform well.

#### Key parameters to watch-

- ☑ **Volume growth:** Due to normalization of trade channels, strong performance of modern trade, revival of rural demand and lower base, we expect high single digit volume growth for most of the FMCG companies. New product launches and continuous expansion of distribution is key to watch for in which we prefer BRITANNIA, NESTLEIND and GODREJCP.
- ☑ **Margin outlook:** Rising crude oil prices and recent increase in import duty in palm oil to put pressure on gross margins of most of the FMCG company. In last 10 months crude oil has jumped from ~46 dollar/barrel to 61dollar/ barrel, up by 33%. As packaging cost and key input like LLP are related to crude hence we expect margin deterioration in Q4FY18. Copra prices are also at its peak. Secondly most of the company's management guidance suggests that price hike is only expected to happen in Q1FY19. Exception will be Company like Britannia where we are expecting margin improvement due to lower sugar and milk prices and its cost efficiency measures. GODREJCP is also expected to witness less deterioration in margin due to improvement in International business margin.
- ☑ **Advertising and promotion expenses:** FMCG companies most of the time use this lever to protect their margin. In Q4FY18E we expect company to do lower A&P expenses to protect their margins specially those companies which input is directly linked to crude.
- ☑ **International business:** Key trackable for GODREJCP will be growth in the Indonesian and African business in Q4FY18. Dabur is expected to report better international growth on the back of revival in MENA business.

#### Industry View:

With two consecutive moderately good monsoon, pro rural budget, higher MSP's and government's rural infrastructure initiatives, we see strong rural demand recovery going ahead. We are optimistic on FMCG as whole for coming 2-3 years. Our top picks are Britannia, Nestleind, Godrejcp and Manpasand while we also bullish on Dabur, Hindunilvr and Bajajcorp considering rural demand revival.
