INVESTMENT PHILOSOPHY

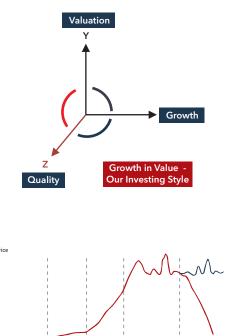

Narnolia follows the 'growth in value' investment philosophy and has demonstrated a successful track record measured in terms of superior risk adjusted return over a long period. Quality always prevails. Along with quality, in a growing economy like India where on every production or consumption parameter upside potential is still humongous. Majority of existing market leaders remain minuscule in the global context. Indian markets over the last thirty years since the great economic reform has oscillated between phases of out-performance by quality companies and phases of out-performance by growing businesses. 'Growth in Value' combines the advantages of these two fundamental parameters and helps create superior performance.

As explained briefly hereunder, this philosophy supported by the principle of linearity, 360 degree 5-M research framework and the risk management framework, one of the most comprehensive techniques, has helped us to generate superior risk adjusted return on an absolute, relative and consistent basis- not just by chance but by design:

PRINCIPLE OF GROWTH IN VALUE

We practice 'Growth in Value' investment framework. Here the word 'value' comes from 'being valuable' or 'Quality'. A company that is exhibiting or is expected to exhibit 'growth in value' becomes our investment candidate. This usually happens when due to business situation or management strategy or the inherent moat of the business, a company starts having higher and/or rising RoE, RoCE and the Free Cash flows. This is also accompanied by the company exhibiting higher return ratio than it's peers as well as broader stock universe.

Stealth Phase

Improvem Phase

Re-Rating Phase Story Zone

Blow off Phase Consolidation

2 PRINCIPLE OF LINEARITY

Company with good capital allocation and favorable business regime show rising margins and asset turnover yielding into higher return ratios. These businesses usually undergo valuation re-rating resulting into long term superior wealth creation in the stock market.

3 360 DEGREE 5-M RESEARCH PROCESS

5 Sub-Processes that seamlessly connects the big picture market opportunity, management strategies, operational and financial moat with financial model of the company and the valuation multiple

M1 - Market

Every business whether on the product side or services has an addressable market. And each addressable market is being served by various peer companies. Understanding that Addres-sable Market & its changing dynamics is key to deciphering the quality, scalability and sustainability of the business. Ex.- A good quality, technologically superior private sector bank's business in large part is about the value migration opportunity from PSU banks. The quality of the depositors as well as borrowers that are value migrating to a bank is key to sustainable out-performance of that private bank.

M3 - Moat of the Business

Any company with sustainable high quality has specific operating and/or financial moat. Identifying the source of that moat is key to identifying sustainable competitive advantage. Ex.- an Indian tyre company has highest EBITDA margin in the world, an Indian retailer has lowest payable days and highest inventory turn delivering most compe-titive price to consumers, An Indian auto OEM moat of rising market share and realization hit a roadblock when it's technological constraint hit it's earlier strategy of filling the price whitespaces.

M2 - Management Strategy Long term business success is all about the strength of the

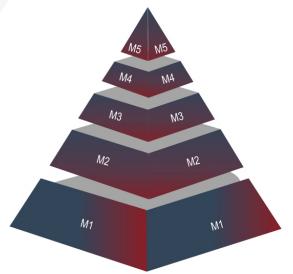

management. Market cycles change and it's the quality of the management that ensures outperformance across the cycle. Decoding Management requires a clearer understanding of its Strategy of product positioning, pricing, supply chain, HR, sources and application of funds etc.. Ex.-. While continuing with deepening its distribution reach, during the Covid-19 related lockdown, a FMCG company with smart SKU management and packaging strategy delivered 30% y-o-y growth way ahead of its peers.

M4 - Model Financials

Modeling the Financial Numbers - Annual & guarterly Profit statement, Balance Sheet, Cash flow statement, account schedules, revenue & cost drivers not only help in understanding how much price one can pay for future earnings but it also acts as an early indicator when investment thesis is not work-ing. Companies where one is not able to model financials with reasonable degree of confidence are beyond the analyst's circle of competence and need to be avoided.

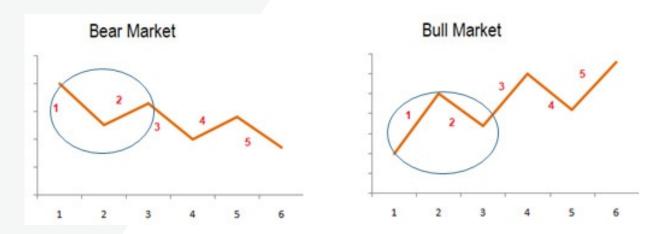

M5 - Multiples-

Valuation Ascertaining the Valuation Envelope for a company is both a science and an art. It requires identifying the right valuation multiple to work with, Company's own immediate as well as long period valuation range and also of it's peer as well other comparable businesses. A prior knowledge of the location of the current valuation multiple inside the valuation envelope ensures sufficient margin of safety as well as upside potential.

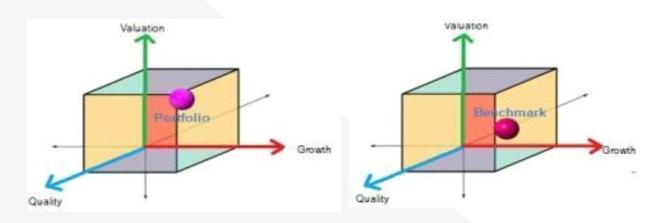

4 RISK MANAGEMENT FRAMEWORK

- a. Stock Limit: Limits on Maximum weightage on single stock
- b. Sector Limit: Limits on Maximum weightage on single sector
- c. **Stock Review:** Under-performance with higher volatility on 2 consecutive market swings. If any of our portfolio stocks under performs for two consecutive swings and exhibits higher volatility, that stock gets marked for Sell/Review

d. Fundamental Quadrant - QGV: With rapid changes in the economy and the business landscape, the attributes of the portfolio keeps changing in relation to that of the benchmark. Tracking these changes pro-actively keeps the fundamental hygiene of the portfolio intact.

Attribute	Quadrant 1	Quadrant 2	Quadrant 3	Quadrant 4
Quality	Low	Average	Good	Very Good
Growth	Poor	Average	Good	Very Good
Valuation	1st Quartile	2nd Quartile	3rd Quartile	4th Quartile

INVESTMENT PROCESS WITH WELL DEFINED 5 STAGES & 112 SUB PROCESSES

NS INDUSTRY LEADERS THEME

STOCK SELECTION PROCEDURE INVOLVING 3 BROAD PROCESSES

MQC

- M Momentum In Return Ratios The RoE, RoCE or the Free Cash flows of company must be increasing
- Q Quality Return ratios versus its peer as well as broader stock universe.
- C Capital Allocation Management strategy on Allocation of funds

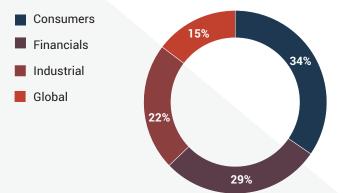

360 Degree Deductive Logic Framework

- Sustainable Valuation possible & factors impacting while identifying when market is under-pricing the company
- Outlook on the company Financials-why a company is considered trading below its intrinsic value
- Building a detailed business & financial model to realize the sources of earning & quality delta for the company.
- Management strategy in terms of its finances particularly in terms of source & deployment of capital, marketing strategy in terms of its products, segments, pricing etc.
- · State of addressable market & identifying the changing dynamics of that addressable market.

Earnings & Quality: Both should be evolving in linear manner

There are three moving parts in terms of fundamental- stock price relation. These are changes in earnings, quality and valuation. Every company in its evolution passes through various stage of its progress. We prefer buying where linearity or a consistent positive delta is expected in earnings profile and the quality profile of the company. A stock before selection for portfolio should be first identified into what stage it is into.

NS MID & SMALL CAP THEME

OBJECTIVE

Long-term capital growth by investing in smaller but growing companies of India

STRATEGY

Active investing in NS Mid & Small Cap investment universe by identifying companies with improving fundamentals. Tactical weight allocation under the sub-classes to achieve positive return along with managing the risk.

PROCESS - Fundamental Bottom Up Research Information mining, financial modeling, investment thesis, active & rigorous tracking for changes in earnings & quality outlook.

WHY NS MID & SMALL CAP?

Most of the multi bagger stock today were NS Mid & Small Cap few years back. Over the last 2 years, NS Mid & Small Cap stocks have seen sharp fall owing to credit squeeze, demand slowdown and over ownership during 2017. NS Mid & Small Cap theme portfolio is not meant as core portfolio for an investor but some tactical allocation by investors in NS Mid & Small Cap theme can be highly valuable.

NS Mid & Small Cap Companies perform well in up cycles. The continuous rate cuts by the RBI will create base for next bull market to start.

Large Cap Companies

- Large Cap Companies: As defined by SEBI, The Top 100 companies by market capitalization fall into the category of Large Cap Companies.
- These companies are the most

 liquid in nature. They have their
 Beta closest to 1 and run in sync
 with the overall market.

Mid Cap Companies

- Mid Cap Companies: SEBI
 defines Mid Cap Stocks as the ones who fall in 101st to 250th company by Market Capitalization.
- These stocks tend to be riskier than the large cap stocks & less risky than Small Cap stocks. They however offer more great potential than the large cap stocks

NS MULTI CAP THEME

STOCK SELECTION PROCEDURE INVOLVING 3 BROAD PROCESSES

MQC

- M Momentum In Return Ratios The RoE, RoCE or the Free Cash flows of company must be increasing
- Q Quality Return ratios versus its peer as well as broader stock universe.
- C Capital Allocation Management strategy on Allocation of funds

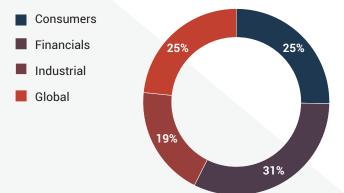

360 Degree Deductive Logic Framework

- Sustainable Valuation possible & factors impacting while identifying when market is under-pricing the company
- Outlook on the company Financials-why a company is considered trading below its intrinsic value
- Building a detailed business & financial model to realize the sources of earning & quality delta for the company.
- Management strategy in terms of its finances particularly in terms of source & deployment of capital, marketing strategy in terms of its products, segments, pricing etc.
- · State of addressable market & identifying the changing dynamics of that addressable market.

Earnings & Quality: Both should be evolving in linear manner

There are three moving parts in terms of fundamental- stock price relation. These are changes in earnings, quality and valuation. Every company in its evolution passes through various stage of its progress. We prefer buying where linearity or a consistent positive delta is expected in earnings profile and the quality profile of the company. A stock before selection for portfolio should be first identified into what stage it is into.

NS 5TX5T THEMATIC ADVISORY PORTFOLIO

OBJECTIVE

This portfolio provides a unique theme-based investing opportunity in the Indian market. As India approaches towards becoming a 5 trillion economy by GDP, the total Market Cap of Indian companies will also set to increase by 11-12% CAGR. Some of the market cap gains will come from new listings but a large part of the gains will come from select themes. This strategy focuses on themes that should form part of India's next growth engine.

STRATEGY

The portfolio will consist of 15-20 stocks to provide superior returns. 3-5 stocks from each of the chosen 4-6 Selected Themes. Maximum Weight on any stock will be 10% while maintaining sector diversity
