TECHM **ACCUMULATE** **1st November 2018**

Company's posted showed a mixed set of revenue performance where good sign of recovery was seen in telecom segment (contributes approx half of revenue) which grew 4.3% in USD term and robust growth in deal wins. However, enterprise segment (contributes ~50 TO 55% of revenue) which supported the growth in FY18 saw decline of 3%QoQ in USD term as healthcare business posted steep decline due to ramp down of projects. Though top line was seeing volatility in 1HFY19 (challenges in HCl or telecom turbulence), margin continued to improve (390 bps expansion from 1HFY18). Thus supporting overall PAT for 1HFY19 (grew 11.6% QoQ in 1HFY19 vs 10.9% last year). Going forward, we expect TECHM to post better performance in FY19 led by strong revival in communication, continued deal wins (550mn dollar) and improvement in enterprise segment. 2HFY19 is historically considered as strong growth for TECHM, thus we are confident of better number in latter half of the year with continued deal wins in telecom and robust pipeline for enterprise segment in BFSI, and Retails sub segments. However with decline in healthcare business and uncertainty on the performance has made our FY19 estimates reduced by 1%. But as the margin execution was better than expected in 1HFY19 (17.6% in 1HFY19 vs. 15.3% in FY18), Thus our overall margin estimates for FY19 has improved by 130 bps (earlier estimated 17%). Also management commentary of gradual increase in margin in 2HFY19 led by continued improvement in operating leverages has given us confidence for strong margin in FY19. Thus we value the stock at Rs845 (17x FY20EPS) and recommend ACCUMULATE.

JSL **BUY** **1st November 2018**

Company's 2QFY19 performance got impacted by inventory loss as company had build up finished goods inventory in 1QFY19 for planned maintenance shutdown in 2QFY19, and nickel prices in 1QFY19 also increased to USD 14495/t (up 58% YoY, 7% QoQ). We have made marginal changes in our 2HFY19 estimate however, due to 2QFY19 result our standalone FY19 EBITDA estimate have declined by 5% to Rs.1412 crore and we have cut our FY20 EBITDA/PAT estimate by 5%/11% to Rs.1601 crore/Rs.530 crore as we factor in higher raw material cost. Furthermore, INR depreciation negatively impacts margins, as it increases raw material cost (over 50% imported) and interest cost too (company has FC loans of around Rs.750 crore at the end of 1QFY19). We are positive about future prospects of company led by its industry leadership position, high capacity utilization and plans of increasing capacity by 38% to 1.1mt by the end of FY19 with a minimal capex of Rs.50 crore and company is also focusing on increasing share of ferretic steel (nil to 0.5% of nickel) which will help in improving margins. However, due to high volatility in raw material prices and 2QFY19 result we have reduced our EV/EBITDA multiple to 3.5 (earlier 4) and arrive at a target price of Rs.75 and recommend BUY.

ESCORTS **BUY** **1st November 2018**

The agri machinery business continued to perform well and margins improved 50bps QoQ led by better product mix, price hikes and higher operating leverage benefit. Though, overall EBITDA margin has declined by 100bps on sequential basis due to reduction in construction equipment (rising commodity prices) and railway division margins (higher import content). The management maintained its volume growth guidance of 12-15% for tractor segment in FY19 based on festive demand in Q3 and increased income level of farmers. The growth for construction equipment and railway division is also expected to strong in FY19. Company's inability to pass on rising commodity cost pressure in the construction equipment segment will keep the margins range bound in FY19. However the long term growth guidance on overall business remained intact. Going ahead we expect 160bps improvement in margin over FY18-20 on account of healthy volume growth in all the verticals, cost cutting initiatives and better product mix. We expect Revenue and PAT to grow at 18% and 31% CAGR over FY18-20 respectively. We value Escorts at 16x FY20E EPS to arrive at a target price of Rs.760 and maintain BUY.

BANKBARODA **UNDER** **1st November 2018**

Bank of Baroda is well positioned in terms of growth, capital and PCR than most of the other PSU peers. PCR of the bank has improved to more than 60% and remained adequately provisioned against stress assets. Management expects slippages to recede going forward and hence credit cost requirement should also normalize. However in the result management didn't disclose the amount of exposure to IL&FS group which was disappointing for us. With respect to merger management expect the swap ratio to come at the end of November with some detailed report on merger impact. We largely maintain our estimates for BANKBARODA but due to issues related to merger swap ratio and needed clarity on management and financial structure post-merger, we put the rating on the stock to 'UNDER REVIEW'.

CHOLAFIN **BUY** **1st November 2018**

CHOLAFIN has been reporting strong performance in all the key metrics. AUM growth has bounced backed due to strong CVs sales in the industry. Infrastructure & mining development and recovery in rural economy have kept AUM growth robust. NIM will stabilize from here on as management's focus tilt towards high yielding portfolios. Asset quality is showing improvement with stable PCR. With number of SARFEASI preceding in line to resolved going ahead we expect asset quality to improve and credit cost to remain in the same levels. Stronger growth, rising cost efficiency, strong ALM, rising yields and lower credit cost will augur well for growth in CHOLAFIN. We increase our estimate by 3%/7% in FY19/FY20 factoring strong AUM growth. We value the stock at 3X P/BV FY20e to arrive at target price of Rs 1472 and maintain BUY.
