MARUTI

"BUY"

3th Jan 2017

We expect current demonetization issue may not be impacting much in the long run to the passenger vehicle segment because more than 75% vehicles are financed. But this issue may be hampering sales in near future due to cash crunch in the economy. We assume volumes in the second half may be down by 10% in comparison to the first half 2017. Higher sales of premium segment cars will further increase the realization per car, which will in turn maintain the margins going ahead despite the rising commodity prices. Hence we have positive view on this stock and we recommend "BUY" with a target price of Rs.6100.

IRB

"ACCUMULATE"

2th Jan 2017

Firstly EPC revenue was impacted due to heavy monsoon during Q2FY17 and secondly suspension of toll collection for the period of 24 days because of demonetization will affect the top line of the company in FY17. We expect top line of Rs. 5627 Cr (Growth of 10% YoY) with healthy 52.7% EBITDA margin in FY17E. Significant reduction in debt post the InvIT IPO and an arbitral award will boost the bottom line of the company. At a current price of Rs. 191 stock trades at 7.3x to FY17 expected EV/EBITDA and 1.3x to P/B. The stock has corrected nearly 18% post demonetization announcement which makes this stock attractive at this price with present fundamentals. Hence, we revised our rating from HOLD to ACCUMULATE with the target price of Rs.235
