### Nifty Intraday Chart

### Market Outlook

After opening on a subdued note, Nifty fell to make a low of 9901.20 and then it rose to make a high of 9963.55. At the end of the day the index closed at 9037.60. It had a net gain of 0.40% over the previous trading day's close. The broader market was in favor of bulls as the midcap and small cap indices outshined the benchmark index and closed the after gaining over 1% each.

On the sectoral front, some buying interest was witnessed in Realty, Banking and Information Technology stocks while Pharmaceuticals index closed in red. The breadth of the market was positive and about two shares advanced for every share declined at NSE

Nifty has started facing rough weather post persistent rallying for past 8 months. At levels of 10,000 Nifty trades at 23.5 PE on FY17 earning and 21.5 PE on FY18 expected earnings. Though improving fundamental is key to making money through investing but such high valuations surely reduce the yield on investment.

For trader's too high valuation implies inferior risk-reward. And high valuation always has 3 outcomes- price correction, time correction or sharp earning growth. But recently concluded Q1FY18 results belie any hope of sharp earning growth at least in FY18 and this leaves market dependent on the remaining 2 alternatives.

Also, Nifty has been moving up in sync with global markets all through 2017 and now also Nifty is expected to move in tandem with global markets.

In terms of derivative 9700-10000 is the base range for Nifty for September series

**DIXON TECHNOLOGIES (INDIA) LIMITED : IPO Note**

"SUBSCRIBE"

6th Sept 2017

Dixon Technologies provides manufacturing services for products such as LED TVs, semi-automatic washing machines, lighting products and mobile phones. It also provides solutions in reverse logistics i.e. repair and refurbishment services for set top boxes, mobile phones and LED TV panel. Its Key customers include Panasonic, Philips, Haier, Gionee, Intex, Mitashi and Dish. For lighting products, LED TV and semi automatic washing machines, they are the leading original design manufacturer (ODM) in India. ODM has higher margin among Dixon manufacturing range. Part of the issue proceeds will go to further help its ODM capabilities. Also, policy initiatives like 'Make in India' augurs very well for Dixon. The company adopts asset light model and also manages its working capital very well. Though the issue has been priced bit aggressively its unique business proposition has seen strong interest by anchor institutional investors ahead of the IPO. We recommend Subscribe only for long term investment purpose.

**Bharat Road Network Limited**

"AVOID"

5th Sept 2017

BRNL projects operational under final and provisional CODs cover approx 1,622.44 lane kms and project under construction involves development of 400.24 lane kms, including major and minor bridges. If we compare the company purely on EV /Lane Kms, the company IPO is priced at par with the current listed players. BRNL EV is valued at Rs 1.9Cr per km while IRB at Rs 1.8 Cr per km and Ashoka at Rs 2.03 Cr per km. We do not find much room for appreciation on valuation front . Also, the company currently has negative ROE as the running projects are not EBIT positive. We recommend AVOID.
