Nifty Intraday Chart

Market Outlook

Yesterday, Nifty opened in negative at 10820.45 and it made a high of 10821 from there it started moving downwards towards the low of 10747 and closed in negative at 10782.90 after losing 86.60 points. On sectoral front IT remained positive whereas rest of the sectors such as AUTO, FIN SERVICE , FMCG , MEDIA, METALS , PHARMA PSU BANK, PVT BANK and REALTY traded with negative bias. On volatility front India VIX gained by 1.56% to 18.39.

Index continued its selling pressure for the second consecutive day on the concern investor worries about global economic growth. Nifty has been making lower highs and lower lows on the daily chart from last three days signaling Bears having an upper hand. In coming sessions, it can extend weakness towards 10690 level followed by 10660.

As long as the index does not negate the formation of lower top and lower bottoms, the weakness could persist.

Quote of the Day : "Invest like a bull, sit like a bear and watch like an eagle. (mantra for long term investing)" - Vijay Kedia.

Monthly AUTO volume update : November**4th December 2018**

The automobile industry has witnessed slowdown in November sales due to various reasons like; increased insurance cost, fuel prices, rise in vehicle prices and the NBFC liquidity issues. The passenger vehicle segment growth remained muted due to sharp increase in ownership cost led by rise in insurance cost, higher fuel prices and increase in vehicle prices. Maruti, Tata Motors and M&M sales were flat YoY. CV sales also declined due to higher borrowing cost, NBFC liquidity issue and drop in cargo sales. Ashok Leyland, Tata Motors and VECV sales declined by 9%, 5% and 4%YoY respectively while M&M posted a growth of 26%YoY. Hero Motocorp sales remained flat YoY due to price hikes and increased insurance cost while Eicher Motors declined by 6%YoY largely due to strike. Bajaj Auto and TVS Motors posted strong growth of 25% and 27%YoY respectively on account of higher discounting, sales promotional activities and strong scooter demand. On the 3 wheeler side TVS Motors, M&M posted a growth of 48% and 28% respectively while Bajaj- Auto sales declined by 3%YoY due to higher base. On the Tractor sales, Escorts and M&M posted a growth of 13% and 56%YoY largely led by strong Rabi sowing, improved growth prospects in rural areas on account of MSP hikes and normal monsoon.

NBCC**ACCUMULATE****29th November 2018**

NBCC has posted strong revenue growth but the margin decline during the quarter due to change in accounting policy and which will sustain at this level. Revenue growth is likely to remain strong on account of pick in execution of large projects. Delhi high court has given nod for redevelopment projects in Delhi and execution is expected to start from January. NBCC has taken up stalled Amrapali project for construction of 46000 units at cost of Rs.8000 Cr as consultant and exploring various options for financing it. Additionally, company has expressed economic interest to acquired debt loaded JPINFRA. So, any update on the same will be key monitorable for near term. We have incorporated lower EBITDA margin in our estimates and reduce EPS by 7/11% for FY19/FY20. We cautiously optimistic on the company and maintain our ACCUMULATE rating owing to the current sharp drop in share price. We value NBCC at 22x FY20 EPS and arrived at target price of Rs.60.

LUPIN**NEUTRAL****27th November 2018**

Sales growth in Q2FY19 remained flat while gross margin contracted by 270 bps YoY. The US business continued to face the pricing pressure but gradually the market has started stabilizing and the management seems confident about the growth in the coming quarters. Japan business was impacted by biennial price cut last year, Japan would continue to be a challenging market as the country is getting ready for another price cut next year. Management has maintained its guidance of 14-15% growth for India business in FY19 based on the growing therapy areas. Going forward, we expect better performance in H2FY19 on account of Ranexa and levothyroxine launch in US, ramp up of Solosec and with flu season coming in, Tamiflu will be good contributor. We maintain our NEUTRAL stance with target price of Rs. 868 (27x FY20e EPS).

DHFL**BUY****26th November 2018**

After IL&FS crisis DHFL was able to repay Rs 14000 Cr of liability during 24 Sep-16th Nov and raised Rs 11600 Cr of funding but primarily through direct assignment route (Rs 7400 Cr), clearly showing funding pressure from banks and capital market in the current liquidity scenario. Going forward also management plans to resort to sell down of portfolio to maintain liquidity and run down the developer segment to 5% from current 17%, hence growth is expected to slow down significantly in near term. Rising cost, change in assets mix and pricing pressure on sell down portfolio will compress the NIM significantly going ahead. We have downgraded FY19 estimate by 19% & FY20 estimates by 21% because of expected slower growth & NIM pressure. However after recent fall in stock price, valuation has got attractive. We recommend BUY at 0.8x P/BVS FY20e for the target price of Rs 302.

GAIL**BUY****22nd November 2018**

Recent spurt in the LNG prices has benefited GAIL in terms of both revenue and margins. In Q2FY19, company has reported high EBITDA margins of 15.2% due to sharp spurt in LNG prices and good trading opportunities which is not sustainable. Margins are expected to normalize and remain in the range of 13-13.5 (provided LNG price remains at level of around USD 9/MMBTU).On the volume front, the company is expanding its network in 3 newly won geographies and is extensively developing its pipeline network (like Kochi pipeline, Urja Ganga project etc). This gives us visibility for long term growth prospect of the company and we expect volume to grow to the tune of 12-15% in FY19E. Considering above arguments we are optimistic on the stock in the long run. We maintain our BUY rating and value the stock at 16x FY20e EPS to arrive at target price of Rs. 456
