### Market Outlook

Yesterday, Nifty opened positive at 11493.25 levels & immediately touched the lifetime high, from there it witnessed some profit booking & started drowning towards the low & ended at a fresh record closing high of 11,470.70. with addition of 20 points. Nifty made high of 11495.20 levels & low of 11454.10. The Nifty Midcap index closed positive by 0.5%. On sectoral front PSU BANK, METALS, FIN SERVICE, PVT BANK, FMCG and REALTY traded positive, whereas AUTO, IT, PHARMA, and MEDIA showed weaknesses. On Volatility front India VIX gained by 1.33% to 12.70, lower volatility suggests the grip of the bull on the market.

Day by day, Market is gradually moving higher. As of now, no reversal in price pattern is seen on chart, although negative divergence and overbought level are warranting some profit booking at upper levels. But if market ignore these parameter then this upswing can be extended towards 11560 levels. On the down side, Support lies at 11435 level followed by 11360 levels.

**Quote of the Day** : "It's better to hang out with people better than you. Pick out associates whose behavior is better than yours and you'll drift in that direction."

**RATNAMANI****"BUY"****10th August 2018**

Ratnamani's robust performance in 1QFY19 was primarily driven by higher realization in both stainless and carbon steel division, product mix change and higher execution. Management has maintained its guidance of Revenue of Rs.2100-2200 crore in FY19 and EBITDA in range of 16-18%. Company's production facility are booked till Dec'18, company is currently targeting orders for 4QFY19. We expect order inflow to be healthy going ahead led by Carbon steel division (water segment projects led by govt. initiatives) and expect to see further pick up in refinery space from next year onward. We are positive on Ratnamani with a long term perspective led by its healthy balance sheet (though debt expected to increase due to capex), stable margins and timely planned capex initiative. We expect Revenue/PAT CAGR of 22%/27% over FY18-20e and value the stock at Rs.1045 (20x FY20e EPS) and recommend BUY.

**PNCINFRA****"BUY"****10th August 2018**

PNCINFRA has reported 100% plus revenue growth for straight second quarter on back of strong execution and we believe that the momentum will keep continue going ahead. Currently Road and highway sector is facing pressure in term of getting project financially closed. Though, the management is very confident to complete financial closure by Q3FY19 and expect to commence work on 3 HAM projects. Company is also evaluating assets monetization to fund equity requirement. We continue to like the stock but considering the pressure in terms of projects financing, we have reduce our valuation multiple and value PNCINFRA at Rs. 206 and maintain BUY rating on the stock. (Std. EPC business at Rs.166 (13x FY20 EPS) and Rs.40 per share for investment into BoT/HAM)

**GSKCONS****"ACCUMULATE"****10th August 2018**

GSKCONS has reported numbers better than expectations. Volume for this quarter grew by 13% YoY led by flat base, LUP's, strong traction from new launches and good growth in existing brand like Boost and Horlicks (grew by 18%). Going forward, we expect volume growth at the rate of 8% for rest of the three quarters of FY19e and FY20e led by company's distribution expansion efforts, better traction from Protein Plus & Growth Plus and new launches in RTD segment. While lower input prices like SMP will help in improving margin going ahead. Clarity regarding Horlicks will be key event to watch for. Considering strong Q1FY19's number and better volume outlook going ahead we have increased our EPS estimates of FY19e and FY20e by 4 and 6% and revised our target price from 7077 to 7530 (33x FY20e EPS) and maintain ACCUMULATE rating.

**EICHERMOT****"ACCUMULATE"****10th August 2018**

EICHERMOT continues to deliver sturdy operating performance led by strong brand positioning and competitive advantage over the peers. The demand for Royal Enfield motorcycles remained strong across the country with waiting period of 1-1.5 months. New refreshed premium versions of the existing models are driving the growth with 50% contribution in the overall demand. There will be some headwinds related to increasing commodity prices in 2QFY19 but we expect that increasing contribution of premium motorcycles will lessen the impact on margins. The management expect robust CV demand scenario to continue on the back of new products, infrastructure development and strong replacement demand. International business outlook also remained strong based on strong response and robust network expansion in key export markets. Considering the strong premium motorcycle demand, increasing export opportunities and strong growth prospects on CV side we expect over 150bps improvement in margins over FY18-20. We value EICHERMOT at 27x FY20e EPS and arrive at a target price of 31000 and maintain ACCUMULATE rating on the stock.

**NATIONALUM****"BUY"****9th August 2018**

Nalco has yet again posted strong set of numbers in continuation with last few quarters driven by strong alumina prices and higher LME aluminium. Company is expected to post good set of numbers going ahead too, as alumina prices remain strong led by tightness in market as Norsk hydro's Brazilian refinery's production cut are still prevalent and it may take a while to return to full production. However, LME aluminium is expected to be in range of USD 2100-2200 due to trade tension and strengthening USD. We are positive on Nalco led by strong alumina prices, healthy balance sheet with zero debt, low cost alumina production structure and capex plans to increase capacity. We expect company's PAT to grow at 35% CAGR over FY17-20e and value the stock at Rs.85 (1.4x FY20e Book value) and recommend BUY.

**CREDITACCESS GRAMEEN LTD - IPO****"NEUTRAL"****8th August 2018**

At higher price band of Rs 422 per share, the stock is priced at 3.8x its BV (pre-issue) and 4.2x (post issue). The valuations do not reflect deep value for IPO investors and unlike other listed peers, we don't find much left on the table post listing. The company has witnessed Gross AUM growing at CAGR of 57.45% between FY14 to FY18. However major concentration of AUM coming from two states (i.e. appxm 85% from Karnataka and Maharashtra), overleveraging of the actual customer count and lower possibilities of improvement in RoE in coming days, we maintain our Neutral view on the stock.
