Quote of the Day

"We have to understand the competitive position and dynamics of the business and look out into the future. With some businesses, you can't. The math of investing was set out by Aesop in 600 BC: a bird in the hand is worth two in the bush. We ask ourselves how certain we are about birds in the bush. Are there really two? Might there be more? We simply choose which bushes we want to buy from in the future."
