Nifty Intraday Chart

Market Outlook

Indian equities traded in the negative territory throughout the day on Thursday and after giving a gap down opening, Nifty continuously fell to make an intraday low of 9777.65. At the end of the day the index closed at 9820.25. It had a net loss of 0.89% over the previous trading day's close. The broader market was in the grip of bears as the midcap and small cap indices underperformed the benchmark index and closed the day after losing 3%-4.5%.

On the sectoral front, huge selling pressure was witnessed in Auto, Media, Realty and Pharmaceuticals stocks while Information Technology index closed in green. The bears created havoc in the market and about seven shares declined for every share advanced at NSE.

Derivative Structure suggests Nifty range for August series to be 9800-10100. Current rally in Nifty is 9 month old and is among few of the rallies with such long duration. In terms of PE, market valuation appears stretched though expected earning recovery in the second half of the financial year along with consistent inflows to MFs is keeping market sentiment positive.

BRITANNIA

"BUY"

9th Aug 2017

BRITANNIA's Result for Q1FY18 was better than our expectation. Sales for this quarter grew by 7% YoY to Rs 2340 cr while PAT declined by 2% YoY to Rs 216 cr. EBITDA and PAT margin declined by 35 and 75 bps YoY respectively but remained better than our expectation by 31 and 21 bps respectively. Going forward we expect volume to improve due to re stocking of channels and company's expansion of direct reach to Hindi speaking belt where it is less present. New launches of product and category will also boost volume going ahead. In the Biscuit segment, there is 35-40% players are local whereas in Bakery segment almost 50% players are unorganized. Hence going forward it may lead to market share gain for Britannia. Management's thrust on expanding Rusk, Mathri, cookies and cake business will improve company's market share in these segment as it is highly unorganized. Presently company is trading at 43 times of FY19's expected EPS. We value it 48 times of FY19's EPS and recommend BUY with upward revised target price of Rs 4550.
