Market Outlook

Indian equities gave a sharp up move yesterday and after giving a gap up opening, Nifty continuously rose to make an intraday high of 10028.35. At the end of the day the index closed at 10006.05. It had a net gain of 0.72% over the previous trading day's close. The small cap and midcap indices also moved in line with the benchmark index and closed the day after gaining 0.5%-0.8%.

On the sectoral front, Private Banking, Metal and Auto stocks were on the buyers' radar while Pharmaceuticals stocks have shown some weakness during the week. The breadth of the market was slightly positive with more advances than declines.

The market continues to exhibit strong resilience. Nifty has gone up by more than 25% over last nine months. Below expectation, corporate results in Q1FY18 and management commentary post result suggests a higher chance of earning disappointment for the full financial year. But the market is ignoring earning as of now and is focussing more on near term triggers like smooth GST implementation. Market across the globe is also now coming to a consensus that US FED will pursue far easier policy regime than what its stated stand of raising rates is.

Derivative open interest has been the best indicator all through the current rally in the market and now strong open interest getting built at 9900 puts suggests Nifty is getting ready for one more round of rally. Technically, Nifty has traded inside a contracting triangle since 9th August. Presently this triangle provides support at 9861 and resistance at 10013. We should expect trending move in the market after a breakout from this triangle pattern in Nifty. Last week Nifty Mid Cap and Nifty Small Cap Index have made fresh all time high and that suggests a high probability of

IRB

"HOLD"

12th Sept 2017

IRB has started collecting toll on Udaipur- Gujarat and Kaithal Rajasthan in month of September which is in line with our estimate and we are expecting another couple of projects will commence toll collection by November end which will boost the toll collection. As the situation will be normalizing in Q3FY18 we expect healthy recovery in traffic as well. Slow down in road sector on project awarding front (especially BOT) lead to NIL order intakes till date this year. Current revenue visibilities have reduced from 3.5x to 2.2x of TTM revenue, which is our utmost concern going ahead. Though we expect healthy EPC revenue growth of 15% in FY18 but growth outlook in FY19 remains flat. GST implementation may lead to contraction in EBITDA margin by 100-200 bps. Currently stock is trading at 6.7x and 6.6x EV/EBITDA of FY18E and FY19E respectively. Flattish EPC revenue in FY19 and contraction in EBITDA margin gives us limited upside at current valuation, hence we maintain our "HOLD" rating on the stock with unchanged target price Rs.245.

Matrimony .com Ltd : IPO Note

"SUBSCRIBE"

12th Sept 2017

Every year, 10mn marriages happen across India out of which mere 2% happen through online match making portals. Considering this there is huge potential for Bharat Matrimony which has established itself as one of the most trusted brands for online match making services. Matrimony .com has more than 7 lac paid subscriptions in Fy17 which has grown at CAGR of 4% over the last 3 years. This assures topline growth for the company in future. Moreover, the company is focussing on marriage services provider for booking of wedding venues, wedding planners, wedding cards, caterers, Photography, apparel, decorations and the whole bouquet of services. This allied business should add margins to the company going forward. We hence recommend SUSCRIBE with a long term perspective. Company is being offered at 14times FY18E P/B with Roe of 38% (10% discount to retail investors on issue price)
