**Market Outlook**

Yesterday, Nifty had given the gap up opening of 11006 with +59 points upside, & started retracing towards the low to take support, from there Nifty gave bounce back to hit the high & closed in positive at 11023 with addition of 75 points. Nifty hit the high of 11078 & low of 10999. After the high traders preferred to book some profits in later part of the session .On Sectoral front FMCG, PHARMA, PVT BANK, FIN SERVICE , PSU BANK traded positive whereas, REALTY, METALS MEDIA, IT, AUTO were negative. On Volatility side India VIX fell down marginally by 1.58% to 12.57.

Continuing its gaining spree, Sensex made a remarkable day by hitting all time intraday high of 36699 levels and Nifty continued its stellar run managing to reclaim 11K mark for the first time since Feb 1. Emergence of shooting star signal a caution ahead on daily chart but we believe some more juice is left behind for Bulls to extract out on up side. Nifty need to hold above its support of 10980 level for gaining momentum further on north side. Any breach of the level may trigger profit booking at 10940 & 10900 levels. We expect a bullish move for the day keeping yesterday's low as a stop loss. However, key resistances are around 11100-11170 and immediate supports are seen around 11000-10980.

*Quote of the Day : "I will tell you how to become rich. Close the doors. Be fearful when others are greedy. Be greedy when others are fearful."*

**CYIENT**

"NEUTRAL"

13th July 2018

Cyient showed a mixed performance with revenue growth of 1.8% , which is line , mainly led by turnaround in Aerospace and defense , IE&NR(Industrial energy and natural resources ,) however the whole impact came from weak margin performance which declined 1.2% due to lower offshore mix , utilization (120 bps) , wage hike (70 bps)and impact in Services OPM (one-offs of 200 bps). Thus Margin stood at 12.1% as compared to 14.1(excl. one off). Going forward, we expect company to post better set of numbers on back of strong pipelines and order backlogs in Aerospace & Defense, Transportation and IE&NR unit. Also, communication vertical which is one of major revenue segment for service line ( 22% ) was tepid in 1Q mainly due to project shifting to offshore is expected to improve from 2Q onwards . But still the major concern lies with the margin where the management is facing lot of issues in onshore /offshore mix, no clear visibility currency rate . Thus guiding for flat margin performance for the year which we expect will difficult to achieve in FY19.

**Automobiles**

"Result preview"

13th July 2018

The automobile industry is expected to post strong double digit revenue growth on the back of healthy volume growth. Rising commodity prices remains a concern in 1QFY19 also but shift towards better product mix, higher volumes leading to operating leverage benefit and price hikes will mitigate the risk up to some extent. We expect close to 30%/56%/73%YoY Revenue/EBITDA/PAT growth for companies in our coverage universe respectively. Going ahead the automobile sector growth will be driven by new product launches, improving rural economy, premiumisation, BS-VI, on-going infra activities. So overall, we have positive view on the sector and our top picks include; ASHOKLEY, BAJAJ-AUTO, M&M, ESCORTS, MARUTI.

- Sterlite Power Wins 6 New Transmission Projects in Brazil
- Ashok Leyland, HPCL launch co-branded fuel card
- Fortis Healthcare approves binding investment proposal from IHH Healthcare
- HCL Tech approved buyback of 3.63 crore shares at Rs 1100 per share

**CPI & IIP DATA**

- India's industrial growth slowed to a seven-month low in May while consumer inflation breached the central bank's forecast for the first half of the fiscal year, marking twin setbacks for an economy that's otherwise seen picking up pace this year. To be sure, experts see factory output recovering from here and inflation having peaked. Nevertheless, the key policy rate will likely be raised next month, they said.
- Industrial production growth was 3.2% in May, down from 4.7% in the previous month, data released by the government showed.
- The simultaneously released Consumer Price Index (CPI) showed a hardening in retail inflation to 5% in June from 4.87% in the previous month, on the back of buoyant oil and housing prices. This suggests the Reserve Bank of India may raise interest rates in the policy review next month even though experts feel inflation may have peaked.
- Food price inflation stood at 2.9% in June compared with 3.1% in May while fuel and light inflation stood at 7.14% versus 5.8% in May.
- As per Economist, prices are at risk of moving higher through the rest of the year.
- The impact of higher MSPs (minimum support prices) on inflation and fiscal risks and a string of expenditure announcements by state governments such as the recent crop loan waiver by Karnataka, have resulted in upside risks to the inflation trajectory for the remainder of FY19, notwithstanding a favorable base effect and the recent dip in crude oil prices.
- ICRA expects a 25-50 basis point (bps) hike in the repo rate in this fiscal. One basis point is one-hundredth of a percentage point.
- RBI has projected inflation to stay at 4.8-4.9% in the first half of the current financial year. It targets to keep inflation at 4% with a band of two percentage points on either side of that.
- In its June monetary policy review, the central bank had said that a slowdown in industrial activity is likely in the first quarter of the current fiscal due to a "significant rise in input prices and perceptions of softening domestic and external demand".

**INDUSTRIAL REVIVAL LIKELY**

- The decline in industrial growth was accounted for by lower growth in electricity generation (4.2%) and a contraction in the production of consumer non-durables (-2.6%). The use-based classification showed that production of primary goods rose 5.7%.
- In terms of industries, 13 out of 23 groups in the manufacturing sector showed positive growth in May 2018.
- Manufacturing sector output grew 2.8% in May compared with a 5.2% rise in April. The good news in the data was strong growth in investment sectors — 7.6% rise in capital goods and 4.9% in construction goods. Consumer durables posted 4.3% rise in output.
- Economists expect an uptick in IIP growth in June led by an improvement in electricity and manufacturing and a favorable base effect.
- Auto production, a lead indicator of industrial activity, was up 19.4% in June from 12.6% in May.
- Going forward, the low-base effect will prop up growth as production numbers slackened last year before the goods and services tax was implemented on July 1, 2017, according to CARE Rating.
