Nifty Intraday Chart

Market Outlook

On wednesday, Nifty opened in positive at 10688 and made a high of 10710 and from there it made a low of 10436 and closed in negative at 10453 after losing -131.70 points. On Sectoral front FMCG and IT traded positive where as AUTO, PSU BANK ,PVT BANK,REALTY ,FIN SERVICE, MEDIA ,METALS and PHARMA closed in negative. On Volatility side India VIX gained by 3.54% to 17.98.

Market witnessed erosion of long after few days of winning streak and faced resistance near 10705 level. Bearish engulfing pattern has occurred on daily chart after supertech default signalled that some more round of selling is left behind. As of now, nifty has to sustain above 10390 levels to avert any weakness. If this levels is breached then we will again see Nifty struggle to find a base around its previous lows and it can slip down till 10200 & 10100 levels. While on upside, the levels of 10500 & 10540 are likely to offer key resistance to the index in the coming periods.

Quote of the Day : "Develop success from failures. Discouragement and failure are two of the surest stepping stones to success."

DCB BANK	"HOLD"	19th October 2018
<p>Intensive competition in the mortgage space led the yield to fall significantly over a period of time. Hence despite the stable cost of fund, NIM is on declining trend. However due to liquidity crunch, NBFC are under problem and hence management expect to pricing power to return for DCB bank in mortgage/SME businesses. But cost of fund is expected to rise which will offset the yield benefit. We marginally increase our NIM estimates and will wait and watch for the pricing power to return to DCB before any significant change in NIM expectations. Opex has been under control during the quarter and management maintains its C/I ratio guidance for FY19. We slightly reduce opex growth also in our estimates. Advances growth is expected to remain healthy with stable assets quality. We slightly increase our earnings estimates by 2% and 3% for FY19 and FY20 respectively. We value the stock at 1.5x P/BV FY20e to arrive at target price of Rs 169. HOLD.</p>		
RELIANCE	"BUY"	19th October 2018
<p>Going forward, Petrochemicals which contribute 30% in total revenue is likely to grow in double digit led by the stabilization of ROGC units and higher realization on the back of spurt in crude oil prices. In organized retail business (22% of overall revenue), Reliance is acquiring major merchandise brands and expanding its network in major cities which is likely to improve its revenue in upcoming years. Considering robust growth in petrochemical segment and organized retail business alongwith momentum in Jio, we continue to maintain positive view on Reliance. We expect Revenue and PAT to grow at 28% and 18% CAGR respectively over FY18-20E. We value RELIANCE at 19x FY20e EPS and maintain our target price to Rs.1432 with BUY rating.</p>		
INFY	"BUY"	17th October 2018
<p>We expect Infosys to post revenue growth between 6% to 8% in cc term in FY19 (in the higher end of the guided range) led by continued momentum in digital (now contributes ~31% of revenue), strong TCV wins (\$2bn wins in 2QFY19) and increasing demand across the major geographies & sectors like hi-tech, insurance, healthcare. Financial service (major contributor in revenue) is expected to continue to grow driven by continued spending by US banks, new account opening and expansion in existing account. Even retail is expected to post strong growth led by proactive presence in digital area and large deal wins. However 3QFY19 is expected to see seasonality due lower working days and furlough. Post management commentary, we have reduced our EBIT margin from 24% to 23.7% for FY19 (in line with management guidance of 22% to 24%) as 2HFY19 to see higher investment in localization and increase in subcontract cost. Management expects to moderate sub contract cost gradually in next few quarters. We expect Infosys to post 13% CAGR over FY18-FY20E and value the stock at Rs817 (20 x FY20eps) with BUY rating.</p>		
HEROMOTOCO	"ACCUMULATE"	17th October 2018
<p>EBITDA margin continued to sustain over 15% despite rising commodity prices and heavy discounting practices in the industry. Price hikes and higher sales of spare parts led to 3%YoY increase in realisation during the quarter. The management guided for 8-10%YoY volume growth for the ongoing festive season and FY19 also. IRDA's decision to make long-term personal accidental cover optional (earlier mandatory for 5 years) will stimulate the suppressed demand. The 125cc scooter segment continued to grow faster than 110cc scooters so the company will launch one 125cc scooter by the first week of November. Rural growth continues to outpace urban and Hero Motocorp will remain a larger beneficiary of demand shift towards entry-level motorcycles as fuel prices continue to be on the higher side. Going ahead the growth will be supported by new launches, the recent increase in MSP coupled with margin improvement led by price hikes and operating leverage benefit. Margin appears in control and current weakness in price provides a good entry opportunity. Hence we change our rating from Neutral to Accumulate and retain our price target of Rs.3217 (15x FY20e EPS).</p>		
FEDERALBNK	"BUY"	17th October 2018
<p>Slippages from Kerala flood was in line with management guidance. The full year guidance of slippages and credit cost was intact and management expects to exist with 1% RoA in 4Q FY19. NIM remained stable during the quarter but concern still remains on increasing cost of fund. Total stress assets were stable at 2% QoQ. Fee income showed strong traction during the quarter and management expects the momentum to continue going ahead. C/I ratio also showed sign of improvement and we expect downward movement in C/I ratio. Bank has been consistently delivering strong growth on loan book on the back of increase in market share in corporate loan. Going forward we remain cautious on assets quality and NIM performance. We largely maintain our FY19 earnings estimates but increases FY20 earnings estimates by 6% due to improving operational efficiency. We maintain BUY with the target price of Rs 93 at 1.25x P/BV FY20e.</p>		
SOUTHBANK	"BUY"	17th October 2018
<p>Assets quality remained stable however exposure to IL&FS group, one EPC A/C under watchlist and Kerala flood impact remains hangover for next quarter. Management believes Kerala flood would impact Rs 350 Cr on the book either through restructuring or NPA. However we remain cautious as uncertainty still lies there. Management has increased the retail slippages guidance by Rs 50 Cr per quarter in FY19. Operating profitability remained muted due to lower NIM and lower treasury performance. Momentum in advances growth has remained positive. NIM is expected to remain under pressure due to rise in cost of deposits. We maintain our higher credit cost estimates for FY19 as we are apprehensive on assets quality going forward. Hence earnings for FY19 are expected to remain under pressure. We largely maintain our PAT estimates for FY19 as well as for FY20. Stock is trading at discounting valuation. We value the stock at 0.55x P/BV FY20e to arrive at target price of Rs 18. We maintain BUY.</p>		
AUBANK	NEUTRAL	16th October 2018
<p>AU BANK is one of the fast growing SFBs; it has grown at a CAGR of 42% YoY over the last 2 years. It has scaled up its CASA deposits and replaced high cost borrowings with lower cost deposits. Though strong underwriting and effective supervision has kept the asset quality in check, going ahead with strong growth in wholesale segment, we are bit cautious on the asset quality front. Under penetrated markets, recent capital infusion, up-gradation in credit rating, diversification into a new geography/new products and the capability to build robust & granular deposit base will drive growth for AUBANK. Factoring warrant issue in our estimates our book value has increased. AUBANK is trading at premium valuation and considering liquidity issues in NBFCs space (13% exposure) and SME issues we are NEUTRAL on the stock at 4.5x P/BV FY20e with target price of Rs 629.</p>
