Market Outlook

Indian equities continued its up move throughout last week and after opening on a positive session, Nifty rose to make a weekly high of 10906.85. At the end of the week the index closed at 10894.70. It had a net gain of 2% over the previous week's close. The broader market was in the grip of bears as the midcap and small cap indices under-performed the benchmark index and closed the week after losing 2%-3%.

On the sectoral front, Banking and Information Technology indices were the stellar performer during the week and both the indices gained over 4%. However other indices have shown some weakness. Metal and Realty indices were the top losers and closed the week after losing 3.7%-5.3%.

Investor sentiment continues to be highly positive. Nifty put writers are writing options of higher strike price almost as quickly as Nifty makes newer high. On-going Q3 quarter results are unfolding almost in-line with the street expectations. And double-digit growth for Nifty EPS in FY18 is almost secured.

Though there does not yet appear any threat to this on-going rally in terms of market technicals, it's worth to remember that stock market can never be a one-way street. So it would be prudent to continue trading long but with trailing stop loss. Post fresh gap made again this Monday, Nifty trend reversal level gets shifted upward to 10,592.

Quote of the Day : "Surprise and shock are endemic to the system, and people should always arrange their affairs so that they will survive such events. They will end up richer that way than focusing all the time on getting rich." **Peter Bernstein**

CYIENT

"NEUTRAL"

22th Jan 2018

The management is confident of strong growth performance in some of its key verticals like Aerospace where cyient is seeing great potential in its three areas that can lead to multi-year growth trajectory are Electronic Manufacturing Services, MRO and Defense. The management is also confident on its Transportation and DLM business as in transportation business cyient has signed up one more large OEM. In DLM after cyient has achieved 39% YoY growth in FY17, the management sees a double digit growth driven by strong order backlog, growth in the offset segment and new synergy business and a strong pipeline. Cyient has multi business model and it is expected to perform above industry average in FY19. Since, due to recent rally in the stock, valuation has got little stretched. So we are NEUTRAL on the stock with limited upside at target price of Rs 700 at 16x FY19e EPS

HINDUNILVR

"ACCUMULATE"

22th Jan 2018

Hindunilvr has posted numbers better than our expectations, sales grew by 11.5% YoY to Rs85.9 bn(Vs expc. Rs84.3 bn) while PAT growth remained 28% YoY to Rs 13.3 bn(Vs expc. Rs12.8 bn). Positive for this quarter was volume growth which grew by 11% on the back of lower base (-4%) of previous year and bounce back of rural demand. Going forward we expect volume growth to remain in the strong trajectory on the back of rural demand recovery considering two consecutive relatively better monsoon, higher MSP and government's rural initiatives. New product launches are doing well especially in the space of naturals. Premiumisation and focus of company towards cost shaving gives us confidence of better margin going ahead especially in the wake of rising crude prices. We expect HUL to report 17% EPS CAGR over FY17-20. We value it at 45 times of FY20's EPS and get a target of Rs 1480. We recommend ACCUMULATE on HINDUNILVR.
