Nifty Intraday Chart

Market Outlook

After opening on a positive note, Nifty rose to make a high of 10223.65 and then it fell to make a low of 10124.80 yesterday. At the end of the day the index closed at 10184.85. It had a net gain of 0.38% over the previous trading day's close. The small cap and midcap indices also moved in line with the benchmark index and closed the day after gaining 0.2%-0.3%.

On the sectoral front, some buying interest was witnessed in PSU banking, Realty and Information Technology. However the other major indices remained subdued. The breadth of the market was slightly negative with more declines than advances.

Nifty made a new high last week. With this pattern of higher high-higher low remains maintained. During sharp fall of September, Nifty did not go below 9685 and maintained the higher low pattern. Lst week along with Nifty making new high there was sharp changes in derivative positions as well. Now Nifty Put of 10,000 has open interest of more than 70.0 lakhs and this makes 10,000 as strong support for remaining trading days of October F&O series.

On the upper side, Nifty should face resistance around 10,270 as this is 2.7 standard deviation from 50 days moving average. This rally of 2017 has seen 3 specific patterns over last ten months- 1st- the pattern of Higher high-higher lows, 2nd- Nifty puts getting aggressively written after every 3%-4% consolidation and 3rd on every rally, Nifty facing resistance near 2.7 standard deviations above 50 days moving average.

Fundamentally, Q2 FY18 result session started last week. And all the major results have come ahead of expectation

Quote of the Day : "All there is to investing is picking good stocks at good times and staying with them as long as they remain good companies ." **Warren Buffett**

Insecticides

"BUY"

24th Oct 2017

Recently, we had a concall with Company's Top management and that gave us the confidence of Margin improvement for the company. Though the company hinted of flat growth in sales due to current Kharif season Sales being a little low on account of deficient rainfall in certain parts of the country. However, the company's continuous focus on sales of new product launches gives us confidence on increase in EBITDA Margin going forward. Considering this, we expect Sales growth for FY18E should be 10% and EBITDA growth should be 36% though we keep our FY19E Sales and Pat assumptions intact before Q2FY18 quarterly results. We remain Buy on Insecticides India with target price of Rs1038 as we roll forward our valuation multiple to FY19, by valuing the stock at 23x FY19E EPS.

Bajaj Auto

"ACCUMULATE "

23th Oct 2017

Bajaj Auto posted strong set of results in 2QFY18 after several quarters of de- growth. Revenue grew by 8.7%YoY owing to 4% YoY volume growth and 4.7%YoY realization improvement. EBITDA Margin for the quarter was up by 250bps QoQ to 19.7%. Profit after tax jumped by 42.6%QoQ to Rs.1194 crore. The company witnessed healthy volume growth of over 13% YoY in 3Wheelers segment during the quarter. Discontinuation of permits in Maharashtra, replacement of 2 stroke 3 wheelers and allotment of permits in Delhi will boost the volumes for next couple of years going ahead. With healthy recovery in existing markets and strong traction from new geographies gives us confidence that the Bajaj Auto is back on track as far as export markets are concerned. The management expects margins to be over 20% for next couple of years based on increasing penetration of 3 wheelers and exports, as these are high margin business for the company. We expect company to maintain its ROE over 22% in FY19. Considering management's aggressive strategy to gain 25% market share, healthy dividend payout and improving fundamentals we are positive on Bajaj Auto. We value Bajaj Auto at 19x FY19E expected EPS and recommend ACCUMULATE with the target price of Rs.3450.
