Tuesday, Nifty opened around 11109, made a low of 11092, then after making a high of 11143 closed higher around 11134(+49), however entire day traded with positive bias within a range was 51 points. Adrenaline rush is still continuing in the blood of market participants on D-street. Although Nifty fades from giving a new high but formation of Three white soldier on daily chart is giving cues for bullish momentum to extend further. We advise to take stock specific approach at this level with strict SL. India VIX is trading lower at comfort zone near 12. Increasing Put-Call ratio with decreasing volatility also suggests Put writers have taken a tight grip on the market. However, key resistances are around 11172-11200 and immediate supports are seen around 11080-11030.

HINDZINC

"NEUTRAL"

25th July 2018

Hindzinc's 1QFY19 numbers came in below expectations primarily due to less than expected zinc production at 172 KT (down 17% QoQ and 11% YoY) and higher cost. EBITDA came in at Rs.2713 crore up 14% YoY and down 25% QoQ. Volume growth in FY19 is expected to be slightly higher than FY18 levels due to closure of open cast mine operation. Ramping up production from underground mines is expected to fill the gap created by closure of open cast mines. Global trade war concerns are weighing in on commodity prices, which would impact realizations. We expect Revenue/PAT CAGR of 7% over FY18-20e. Though, we are positive on Hindustan zinc because of its integrated business model and strong balance sheet. However, we believe all the positives are factored in at current prices. We value the stock at Rs.290 (6.5x FY20e EV/Ebitda) and are NEUTRAL.

CEATLTD

"NEUTRAL"

25th July 2018

Net sales grew by 17%YoY to Rs.1706 crores on the back of strong growth in passenger cars and commercial vehicles segment. EBITDA margin improved 660 bps YoY to 10.3% on account of soft raw material prices and operating leverage benefit. The company is expected to raise ~Rs.1000 crores debt to fund its capacity expansion drive (capex of Rs.1500 crores in FY19) as it has capacity constraints in PV & TBR tyres which may lead to higher interest outgo for the company. Higher fixed cost and depreciation on the OTR facility will also put pressure on the margins in near term. Going ahead we believe that increasing OEM penetration, capacity expansion drive to cater future demand and strong distribution reach will drive the revenue and margins up in the long run. Factoring the near term capacity constraints, rising debt level and slow ramp up of OTR facility we value CEAT at 14x FY20E EPS and maintain Neutral rating on the stock with a target price of Rs.1450.
