Market Outlook

Yesterday, Nifty witnessed a choppy session. As Nifty opened in positive 11148 levels & dragged towards the negative, from there it gave bounce back & hit the high & started retracing towards the low & closed in flat to negative at 11132. It made a high of 11157 & low of 11131. On sectoral front PSU BANK, FIN SERVICE and Metals traded positive, where as IT, PVT BANK, FMCG and, REALTY, Media, AUTO, PHARMA witnessed selling pressure. On Volatility front India VIX discounted by -1.18% to 12.32.

Nifty opened with positive bias but soon erased its gain to trade remaining day with a capped range. From last two days, Nifty has been hesitating to hit a new high but momentum seems to be an intact which can give a push to Nifty for achieving new high in today's session due to the volatility of Expiry. Once the key resistance of 11171 is taken out then it can move towards 11230-11240 levels. However, any violation below the level of 11100 can cause correction towards 11070-11050 levels.

JUBLFOOD	"BUY"	26th July 2018
<p>The management has been continuously proving its mettle over the past three quarters rationalising the operational costs while riding on the high SSG growth post GST. The management is confident on its ability to carry the operating leverage going ahead. Carrying the success of enhancing the same stores, the management is looking to aggressively expand the stores count by 75 in FY19. The company is also heading towards their target of turning the Dunkin' Donuts brand profitable by the end of FY19 reducing the EBITDA drag of Dunkin' Donuts down to 55bps. We expect continue to benefit from the operating leverage efforts and enjoy higher SSG on the back of better analytics of store expansion. We expect the sales growth to remain robust and margin expansion to drive company's PAT margin to 10.5%. We value Jubilant Foodworks at 4.8x FY20e EV/Sales to arrive at a price target of Rs.1600 and maintain BUY</p>		
HEROMOTOCO	"BUY"	26th July 2018
<p>Hero Motocorp has been able to protect the EBITDA margin over 15.5% levels despite sharp contraction (230bps YoY) in gross margins. However we remain cautious on the near term margin sustainability due to increasing commodity prices and heavy discounts given by the competitors in the entry segment bikes in order to gain market share. The 125cc scooter segment continued to grow at 20%YoY and margins in this segment is also higher than 110cc scooters. Considering the buoyancy in the 125cc segment, the company will launch one 125cc scooter and one bike in premium segment before the current festive season. Going forward, the growth will be supported by monsoon, MSP, under penetration of 2 wheelers and rural infra spending. Considering higher discounts in the entry level bikes by competitors and higher tax expense due to expiration of Pant nagar plant benefit we reduce our FY20e EPS estimate by 6%. We value Hero Motocorp at 17.5x FY20e EPS to arrive at target price of Rs.3861 and maintain BUY</p>		
IRB	"BUY"	26th July 2018
<p>Roads and highways sector had witnesses strong order inflow in last year and now most of the players are in process to achieve financial closure of the projects. The PSU banks are main lender for the road assets but currently most of the PSUs are under PCA and unable to fund the projects. Total Rs.40869 Cr (45% of the total order book) of HAM/BoT projects of our coverage universe is under process for achieving financial closure. Currently industry is witnessing pressure in terms of getting projects financially closed. This may force NHAI to slow down its awarding pace and we sense some delay in execution. However, IRB's management is confident to achieve financial closure in stipulated time period and start construction from H2FY19. We expect that the revenue will grow at 15% CAGR over FY18-FY20. Considering the current scenario we have cut down valuation multiple and vale IRB at 8.5x EV/EBITDA and reduce target price to Rs.250 per share. Maintain BUY</p>		
LTI	"Neutral"	26th July 2018
<p>LTI showed a strong performance in 1QFY19 which revenue growth of 8% QOQ and with solid margin execution resulting 17.7% (expansion of 180bps).Margin expanded due to INR depreciation benefit, improved in realized rate and higher working days however it was partially offset by higher visa cost . Digital solution which contributes 34% of the revenue continued to fuel the growth engine in 1QFY19 also (43% YOY).LTI continues to see strong pipeline and order book in FY19. Going forward, we expect LTI to continue to deliver top quartile growth in FY19 as well on the back of continued momentum in deal pipeline, Increase in digital (34% of rev) penetration and Momentum in top 11 to 20 accounts. Even the management expects that with deep rooted industrial experience and with dynamic team, it is well positioned to become emerging leader in the industry. On margin front, we expect net income margin to be in 15% band as guided by the management.We expect revenue CAGR to grow 20% over FY18-20.However , with stretch in valuation , we do not see much upside in near term . Thus, we are Neutral on the stock with target of Rs 1868 (20x FY20EPS)</p>		
CANBK	"UNDER REVIEW"	26th July 2018
<p>Although the provisions will remain elevated during FY19 for PSU banks but resolutions under NCLT cases will play a major role in earning recovery for most of the banks. NCLT 1 cases are expected to get resolved during FY19 which will not only result in higher recovery & up-gradation but there will also be recovery of income in the form of other income or interest income. We also expect improvement in assets quality for most of the banks going forward. CANBK result and management commentary related to resolution, SHASHAKT and SAMADHAN scheme gives confidence for earning upgrades. But success of both the scheme will be closely watched for going forward. If other PSU banks post result in line with CANBK, then we can see earnings and rating upgrade for the majority of PSU banks. For the CANBK we were having ACCUMULATE rating with the target price of Rs 268, however post result we consider it as UNDER REVIEW for rating and target upgrade.</p>		
HDFC AMC	"SUBSCRIBE"	25th July 2018
<p>HDFC AMC is demanding valuations of above 7.5% in terms of MCAP /AUM. This looks quite high compare to its listed peer. However, the proportion of high margin equity-oriented AUM to total AUM stands at 51.3% viz a viz industry average of 43%. Further, the long tenure SIPs (Systematic Investment Plans) constitutes 77% of total SIPs which provides case for better RoE and operating profits to be maintained going forward. Also, looking at consistent market leadership position, trusted brand, superior and diversified product mix distributed through a multi-channel distribution network prompt us to recommend SUBSCRIBE only for long term investors.</p>
