**Quote of the Day** : "This is one of the keys to successful investing: focus on the companies, not on the stocks."

COLPAL	HOLD	30th October 2018
Colpal has posted numbers in line with our estimates, sales up by 8% while PAT grew by 11%. Aggressive stance and focus on towards expanding natural portfolio is congealing well with the company. Going forward, we expect better volume growth for Colpal considering revival in rural demand ( ~40% of sales), better traction from naturals portfolio and increased direct reach(looking to expand its direct coverage by 25%in FY19). Pricing action and better product mix will ensure stable margin. Our estimates for FY19e and FY20e is largely unchanged, we maintain our HOLD rating with the target price of Rs 1206(37x FY20e's eps).		
UNION BANK	BUY	30th October 2018
We believe NPA cycle has peaked out and will reverse as recovery & up-gradation is expected to be more than the slippages going ahead. Specific PCR has also improved for UNBK to 51% level but credit cost will remain elevated in near term due to ageing related NPA. Increase in pace of NCLT cases resolutions will provide much support assets quality improvement as well as extra provisions will also be written back. Business growth has been subdued for Union Bank but it is expected to pick up. CET 1 capital is at 7.54% and management expects Rs 7400 Cr capital infusion in near term. This capital infusion will be crucial for growth enhancement but on the other hand at current valuation it will create huge dilution risk giving pressure in return ratios. Currently we are not factoring the dilution in our estimates. We expect worst performance in terms of profitability is behind and will see gradual improvement in earnings going ahead but will remain volatile. We increase our PAT estimate by 14%/7% for FY19/20 and maintain BUY with the target price of Rs 85 at 0.35x P/BVS FY20e.		
GREENLAM	NEUTRAL	29th October 2018
GREENLAM reported 15.6% sales growth; however, the rising cost pressures have impacted the company's gross margins and EBITDA margins. Though the major sales growth came in through 16.6% YoY rise in realizations for laminates division, it fell short to contain the higher raw materials cost. The laminate and veneer industry as a whole have been facing pressures on the margins front with raw materials like phenol, methanol, melamine, craft paper, design paper trading at highest levels and most of which are imported. The depreciating rupee has further added to the cost as 75-80% of COGS is imported. The company benefits from a natural hedge created from the exports in the laminate division and to a very small amount of wooden floors exports. With higher capacities in the market and slower than expected growth of the market demand, the rising crude/falling rupee adds to the trouble for the industry. We expect sales to grow at 10.25% over FY18-20 mainly with the help in realization growth. The margin in the near term looks bleak due to rising cost pressures, price hikes slower than rising cost due to heavy capacities and delayed breakeven of wooden floors and doors segment. We reduce PAT estimates by 12%/10% of FY19/20 due to near term lower margins and delay in better profitability of whole veneer and allied segments. We value GREENLAM at 12x FY20e EV/EBITDA to arrive at a TP of Rs 915 and maintain NEUTRAL.		
NESTLE	BUY	29th October 2018
Nestle has reported numbers better than our expectations for Q3CY18. Nestle is a strong play in Food and Beverage space with the leadership in ~85% of the product portfolio in which it exists. The company is in the process of metamorphosis. Recently, it has embarked on cluster based strategy to promote better connect with consumer , prompt decision making and customized offerings which in our opinion boost growth going forward. The Company's thrust on launching products and expanding direct reach will act as another growth drivers. Nestle has strong pricing power which in our opinion will help company in maintaining margin considering headwinds on account of rising crude oil and commodity prices. Considering strong Q3 performance we have changed our PAT estimates for CY18e and CY19e by 3% and 2% respectively and tweaked our target price to Rs 10586(from Rs 10278). We maintain our BUY rating on it.		
ITC	BUY	29th October 2018
ITC's cigarette business is gradually showing signs of recovery while other FMCG business continues to grow faster led by company's new launches and venturing out in different categories. Other segments have also started performing well. Going forward, we are optimistic on the future growth of the company backed by new aggressive launches and stable demand scenario with rural peak up while improvement in the margin of other FMCG business will ensure future margin improvement. Considering strong Q2FY19 numbers, we have increased our sales estimates for FY19/FY20e by 2%/ 3% and PAT by 1%/3% with the revision of target price to Rs338(28x FY20e's eps) from Rs328. We recommend BUY.		
WESTLIFE	NEUTRAL	29th October 2018
WESTLIFE continued its stellar SSSG run with its strategy in place of generating higher revenue with improvised menu and extensions like McBreakfast, McCafe and McDelivery. The company's original McDonalds store enhancement through 2016 announced ROP 2.0 model and EOTF have provided the company with an additional lever of growth. These strategies in right place is now generating operating leverage and is now rewarding the company with better margins. With the high base of growth from now, we expect the new stores and further brand extensions to deliver for the company sales CAGR of 21% over FY18-20. Currently the royalty rate is at 4% for the company and the company is also enjoying for near no tax due to past losses brought forward. However in FY20 the tax would come in post the utilization of past losses. Also, we have modeled our expectations taking the royalty at 5% i.e. a 1% increase from FY19 level. We have reduced our PAT estimates by 20%/11% for FY19/20e. The rate of royalty remains an uncertainty and may lead to a downside risk to earnings(check Page 3 for sensitivity analysis) and so, we remain cautious and value the stock at 30x EV/EVITDA FY20e to arrive at a price target of Rs 324 and maintain NEUTRAL

- ❑ MAAUM % increased to 64.5% from 62.4% QOQ and it increased from 56.9% YoY, the other thing also to be noted is the company has outperformed industry's MAAUM% of 53.3%.
- ❑ SEBI as a Regulatory acted on cut-off of TER% rates did not affect HDFC AMC, as the total cut-off rates of 15bps on aggregate manner which affected HDFC AMC from 20bps-5bps were transferred to distributors totally.
- ❑ Further regulatory norm of decreasing TER% rates will affect HDFC AMC AUM at 24bps of which the management to transfer 70%-80% of rate cuts to distributor and to bear the rest with HDFC AMC itself which will decrease the revenue margins of the company. This will happen once SEBI announces the date of implementation.
- ❑ HDFC AMC won an international equity mandate of USD 450 millions from a reputed foreign portfolio investor, of which approximately one third has got funded recently. Investor did not mandate his preference of investment into a particular fund, so AMC is free to create a portfolio mix.

- ❑ STP asset value diminished over the quarter by 1.5% but the systematic transactions and SIP are in increased trend because STP is a bulk fund put into liquid fund and from there systematic transactions are taken place periodically, the value of STP decreased but the ST and SIP increased.
- ❑ Business Development and Other Expenses stream to get decreased majorly in future as SEBI norm on eliminating upfront commission charged by distributors except SIPs, but to compensate upfront commission HDFC AMC tend to increase its trail commission given to distributors which intend will show decrease in revenue stream instead of increasing in expenses stream.
