Nifty Intraday Chart

Market Outlook

Yesterday, Nifty opened in negative at 11328.90 levels, where open & high remained the same, from there it's started moving towards the south to hit the low & closed in negative by discounting 101.50 points at 11244 levels. Nifty's open & high remained the same of 11328.90 & Low of 11234.95 levels. Nifty Midcap index raised by 0.1%. On Sectoral front PHARMA, METALS traded positive, whereas rest of the index such as PVT BANK, FIN SERVICE, AUTO, FMCG, REALTY, MEDIA and PSU BANK were in negative bias. On Volatility front India VIX gained by 0.45% to 12.58.

As per the expectation, profit booking was witnessed in Indian equities throughout yesterday and Nifty started to fall from its stiff resistance areas of 11405-11425 zone. The profit booking process is likely to force Nifty to fill its recent gap of 10185-10210 which was made on 26th July. We should initiate fresh long near 11200.

EMAMI LTD "NEUTRAL" **3rd August 2018**

EMAMILTD has posted mixed set of numbers for Q1FY19, sales remained inline while PAT growth was below than our expectation. Domestic volume grew by 18% on the back of lower base. International business grew by 7% much below than our expectation of 15%. Going forward, we expect better domestic volume growth for the company led by coming back of wholesale, rural demand revival and growth in health care business (on the back of new launches). Better traction from Kesh King and company's cost efficiency measures may help in maintaining margin. But considering subdued International business and company's higher dependency on seasonality (60-70% of products is still dependent on seasonality), we are little cautious on the EMAMILTD. We continue to value this stock on 49 x of FY20e EPS and maintain previous target price of Rs 596. As there is little upside from here, we recommend Neutral

EQUITAS "BUY" **3rd August 2018**

Loan book has picked up the growth as the management is done with de-risking the portfolio. MFI book mix has declined below 30% as per the strategy of management. However growth in other than MFI segment continued to grow with an average rate of 45%. Deposits growth has been impressive and now constitutes 49% of the borrowing. Management is targeting 40% loan book growth in FY19. Despite of strong growth in deposits, decline in NIM was little worry for us. The reason was increased deposits cost and increase in low yielding investment book during the quarter. However we expect NIM to stabilize with decrease in excess liquidity in Balance sheet as well as strong growth in MFI book. C/I ratio is expected to continue to decline till 60% over the period. We assign EQUITAS 2.2x P/BV FY20e to arrive at target price of Rs 177. Recommend BUY.

ONGC "BUY" **3rd August 2018**

ONGC has posted robust set of numbers with revenue growth of 43% YoY to Rs. 27213 Cr and PAT growth of 58% to Rs. 6144 Cr. in Q1 FY18. This growth is mainly led by the higher realization in both gas and crude segment while the gross margins of the company have also expanded by 369bps to 49.95% in Q1 FY19. Higher realization, lower work over cost and royalty payments with high success rate of exploration helped ONGC to clock better margins. Volume in gas segment has grown by 3% YoY while in crude it is de-grown by 3% in the last quarter due to lower offtake by the refineries. During the last quarter S1 and Vashishta gas fields has started production and management expects further ramp-up in this quarter. Expected incremental production from these fields is 2-2.25MMSCMD. Management has guided for 4% volume growth in production for gas to 25.51 BCM and 2% growth in crude oil to 25.93. Key risk to our estimate includes subsidy sharing with OMC beyond USD 60 a barrel. Management refrains from giving any clarity on subsidy. We are optimistic on this stock but in absence of any clarity from the management regarding subsidy sharing, we reduce our valuation multiple to 10x FY20e EPS and recommend BUY with the target price of Rs. 210

Monthly Auto Volume Update **2nd August 2018**

The automobile OEMs have reported mixed set of volumes in July 2018. Passenger vehicle industry sentiments remained subdued due to delay in monsoon in some part of the country and 8 day long transporters strike. On the other hand, commercial vehicle industry posted robust volume growth of 29%YoY on the back of strong infrastructure spends, rising e-commerce sector and increased rural consumption. 2 wheeler industry have also fared well with growth of 15%YoY led by strong sales of entry segment motorcycles. Demand for 3 wheelers remained buoyant and the industry posted volume growth of over 58%YoY. Tractor industry volumes grew by 13% YoY on the back of improving rural income and lower tractor penetration. There could be some concerns on the commercial vehicle volumes due to Axle norm related uncertainties in the near future. However, we expect that automobile industry will post healthy double digit growth in FY19 on account of growing infrastructure spend, successive normal monsoon, increasing rural income and new launches. Our top picks are ASHOKLEY, BAJAJ-AUTO, ESCORTS, HEROMOTOCO and M&M.

MGL "ACCUMULATE" **2nd August 2018**

MGL has posted better performance in Q1 FY19 as compared to last two quarters, with revenue growth of 16% YoY to Rs.676 Cr and PAT growth of 3% to Rs. 128 Cr. This is led by the 11% growth in overall volumes and higher realization. The price of the domestic gas has increased sequentially in the last 6 months to the extent of about 18%. The company has partially passed on this hike to its customers which has improved its gross margins by 200bps QoQ to 56.7% but margins were lower as compared to the same period of FY18. The company enjoys the pricing power and hence it may increase the prices of gas in all segments gradually which will improve margins going ahead. We believe that lower penetration of PNG, higher conversion rate of vehicles to CNG and increasing number of CNG stations will lead to the growth in volume over next couple of years. Considering this we expect volume to grow at CAGR of 9-11% over FY20-22 while revenue and PAT to grow at CAGR of 13% over FY18-20. We value the stock at 18x FY20e EPS to arrive at target price of Rs.1010 and recommend ACCUMULATE.

DABUR "HOLD" **2nd August 2018**

Dabur has reported strong domestic FMCG volume growth of 21%, best among other FMCG players led by broad based growth in all verticals. Oral care, Homecare, Hair oil, Healthcare, Digestives, and Beverages grew by 17.3%, 17.4%, 18.8%, 23.4%, 21.6% and 26.8% respectively. This quarter witnessed come back of Beverages segment and gain in market share in Chyawanprash and Honey. Going forward, we expect strong volume growth for domestic FMCG business to continue led by category tailwind, revival in rural economy and new product launches. We expect stable margin for the company backed by prudent pricing action and improvement in the International business margin. Considering strong volume growth, revival in rural economy, aggressive stance of management with increased ad ex. and better outlook of Namaste, we are positive on Dabur and recommend 'Hold' with the target price of Rs 460(43x FY20e eps).
