## View and Valuation

Despite the slowdown in the auto sales in the industry, AUM growth of M\&MFIN remained strong on account of rural based geographical expansion and increasing relationship with various OEMs. We expect strong infra/construction activity and improving rural economy will aid growth going ahead. Improvement in the rural cash flow has helped the asset
quality to improve sequentially. NIM has remained under pressure due to excess liquidity quality to improve sequentially. NIM has remained under pressure due to excess liquidity \& management inability to pass on the entire rise on the cost front to the customer. Going ahead we expect NIM pressure to taper down with rising share pre-owned vehicle in the portfolio. The OPEX is expected to remain elevated as management plans to continue investment in branch \& employee front in FY19. Management expects increase in branches to drive loan growth \& collection efficiency going ahead, with increasing
proximity to the customers. Management has guided credit cost to decline by 25 bps going branches to drive loan growth \& collection efficiency going ahead, with increasing
proximity to the customers. Management has guided credit cost to decline by 25bps going ahead. The stock is currently trading at $2.2 x$ BVPS FY20e. Due to recent correction in
