## View and Valuation

9MFY19 seemed to be not so good year as the company has faced lot of challenges related to execution, subdued growth in digital business and softness in IP business. However the new strategy which mainly focuses on three verticals (BFS, Healthcare and Manufacturing) and four technologies (AI/ML/Data, Cloud, IoT, Security) is expected to transforms the growth going ahead. Also the deal wins which we saw in 3QFY19 mainly in BFS and Hi-tech reflects that strategy is going in the right direction. The digital business which was posting a subdued growth in last few quarters has started to accelerate and grew $6.5 \%$ QoQ in 3QFY19. Though the digital business is still away from its $30 \%$ YoY growth that it used to post few quarters back, however with the new client addition ( 25 new logo added) in digital the management expects it to come back to its desired level of $25 \%$ to $30 \%$ YoY growth in future. Also the IP led revenue which grew lower than anticipated in 3QFY19 is expected to improve in FY20 led by bounce back of growth in reseller business and continued momentum in IBM lot business.On margin front, we have reduced our FY19 margin by 50bps whereas FY20 margin remained unchanged post result. The management expects to maintain the margin at current level for FY20 using the leverage like increasing its offshore mix and demand higher rate in partnership business however some portion is expected to mitigated by aggressively hiring plan to meet the supply constraints. Thus we expect Persistent to post revenue growth of $13 \%$ CAGR over FY18 to FY20E. The stock is recently trading at attractive valuation thus we value the stock at Rs 703(14x FY20EPS) and maintain BUY.
Key Risks to our rating and target
