Except hike in tractor delinquency due to drought condition in Maharashtra \& M.P.

## View and Valuation

AUM growth has remained muted due to slowed down in the infrastructure industry, liquidity constraint \& implementation of new axle load norm. With the rise in cost of fund management has passed on the interest rate hike to customers which resulted in postponement of demand. Though collection efficiency has improved across segment but drought condition in few areas has temporarily spiked the delinquency number. We expect tepid growth in the CV segment going ahead and is expected to revive towards the end of FY20 as the pre-buying demand improves with BS VI implementation. Margins are expected to remain under pressure in the medium term, however management is optimistic that going ahead credit cost will improve significantly to $2 \%$ in FY20. The stock is currently trading at $1.3 x$ BVPS FY20e. Considering the slowdown in loan growth \& margin compression we have decreased FY20 estimates by $8 \%$ and reduce our target price to Rs 1286. We maintain BUY.
