Nifty Key Levels

Resistance	R1 : 10550	

Market Outlook

Nifty is trading close to top-end of its existing range. Initial open interest built up for January series suggests that Nifty is opening itself for levels of 10800. Once 10,550 is taken out convincingly, Nifty will be headed to newer heights.
Rising inflation, fiscal slippage has forced the bond yield to go up to 7.2%. This should ideally make market valuation multiple go lower. Consensus expectation for earnings growth for FY19 is upward of 24% and also 2HFY18 is expected to see turn around in earnings of Nifty. But market trading at newer high reduces major gains for the calendar year 2018.
The rush of exuberance cross equity markets globally heading into the end of the year makes risk/reward unfavorable. But at current level keeping an eye on global cues would be advisable.
