Market Outlook
During last one month Nifty has traded between 9550 and 9710, a range of mere 1.7%. Nifty losing volatility after sharp rally since December 2016 is a sign of maturity of our market or is this a lull before the storm, July series will surely let us figure out. In fact even global equity markets are trading strong almost in a bullet proof manner and this is amazing. US S&P 500 VIX has fallen to single digit levels. Lately cause of concern have been the performance of the broader market. Mid and Small cap stocks were leaders of the current market rally, but since middle of May Nifty Mid cap index and Nifty Small cap index surely has gone into a correction mode. And traders and short term investors need to be very cautious on small and micro cap stocks as valuation remains quite stretched for most of the small and micro cap stocks. Though Nifty continue to be in upward journey but if Nifty falls below 9500, it will bring sharper fall in mid, small and micro cap stocks.
Derivative range continues to be 9550-9750 though large open interest at 9700 CE make 9700 a strong resistance for current June series. Early indication of open interest built up for July series suggests wider Nifty range and consequently sharp volatility. BankNifty particularly looks vulnerable for volatility spike led by mid and small PSU banks where NPA woes appears to be getting further aggravated due to RBI latest directives. Early July series will be full of news about GST implementation and 1QFY18 and 2QFY18 surely will see negative impact on corporate earnings. GSTN system is expected to process 3.5 billion invoices every month, a change of this order surely will be nerve wrecking for many businesses particularly smaller one. We see clarity emerging only in September as far as fundamental of the market is concerned.
