Market Outlook

Investor sentiment continues to be highly positive. Nifty put writers are writing options of higher strike price almost as quickly as Nifty makes newer high. On-going Q3 quarter results are unfolding almost in-line with the street expectations. And doubledigit growth for Nifty EPS in FY18 is almost secured.

Though there does not yet appear any threat to this on-going rally in terms of market technicals, it's worth to remember that stock market can never be a one-way street. So it would be prudent to continue trading long but with trailing stop loss. Post fresh gap made again this Monday, Nifty trend reversal level gets shifted upward to 10,782

[#] Analysis shown here is only for companies with market cap more than Rs 1,000 Cr.

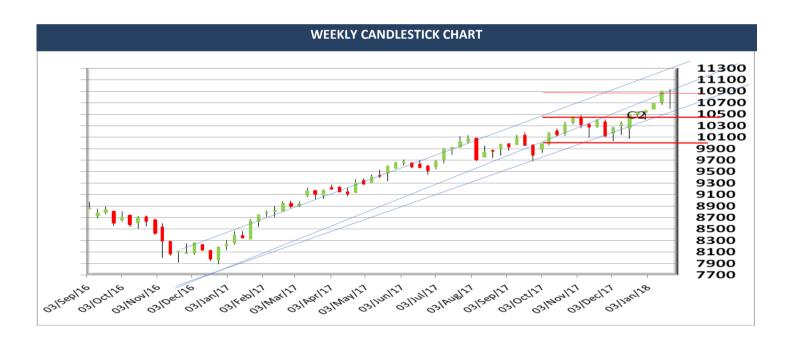

As discussed in the previous week the weekly gap played to the full extent and Nifty gained 213 points during the week touching intraday high of 10906. At 10900 Nifty has reached three important mile stones;

- 1. It has reached the measured range of inverse Head and Shoulder which began from the level of 8900 in February 2017.
- 2. It has reached the top of Box Range 10100 to 10500 and then 10500 to 10900.
- 3. It has reached the top of Bull Channel (C2).

The Nifty is now at the top of the Bull Channel (C2) range for which for the next week is 10940 to 10600. Having achieved three important milestones, we should see a correction in Nifty. Particularly since Nifty is now in the overbought. RSI on daily charts is at about 77. So, though we see no indications on the charts correction appears to be very much imminent. On correction major support will emerge at 10600 levels i.e near the weekly gap up of 13th January.
