Traction continues in telecom deal wins, margin to be muted in FY20

3QFY19 Result Update

- TECHM posted strong performance in its 3QFY19 result where revenue grew 3.5%QoQ to USD1261 million (above our estimates of USD1248 million) and EBITDA margin continued its growth momentum for the second consecutive quarter and expanded 50bps to 19.3% (in line with estimates of 19.2%).
- EBITDA during the quarter grew 6.4%QoQ mainly led by improvement in operational expenses on the SG&A side and supported by utilization improvement (40bps).However some headwinds like investment made on deal ramp up, change in business mix offset some portion of the margins.
- PAT stood at Rs1207 crore, a growth of 14.3% led by tax reversal benefit of 7.5%QoQ and strong revenue beat.
- Telecom sector posted a moderate growth of 2.5% in USD term after been muted for almost two year. The management expects momentum to continue as robust deal wins (240mn dollar win in 2QFY19) to led the growth in future.
- In Enterprise segment, strong revenue growth was contributed by Manufacturing and retail verticals. Manufacturing continued its healthy growth and grew 5.6%QoQ in USD term spread across sub-segments. Even BFSI bounced back in 3QFY19 by growing 2.7%QoQ in USD term as the deal started ramping up. HCI which sharply decline 50 %QoQ (contributes 40mn of revenue) in 2QFY19 revived strongly and grew 4.4%QoQ.

View and Valuation

Going ahead we expect TECHM to post better performance in FY20 led by strong revival in communication, continued deal wins (440mn dollar win during the quarter) and improvement in enterprise segment. The communication segment (contributes approx 41% of the) which was facing challenges for the past two years due to slow growth in LCC acquisition, tepid performance of Comviva, Price cuts in its large account (AT&T) however with deal wins in 2QFY19 and also in 3QFY19 especially in area like Telco, OTT and media players will result in strong growth ahead .5G plan still needs more time and it is expected to rollout in late FY20. Thus we expect the telecom to post single digit growth going ahead. The enterprise segment is expected to post 10%YoY growth led by deal wins (200mn came from enterprise side) and strong traction in verticals like Manufacturing, RETAIL and BFSI segment.

Margin for the company are expected to be muted or bit lower level in FY20 as some pressure are expected as management continues to add workforce, location challenge due to visa issues and wage hike during the year. Even the attrition is in its highest level, thus becoming challenge for the company going head. However some levers will still continue to benefit in Future.

We expect TECHM to post 13.8% CAGR over FY18 to FY20E. We largely maintain our target price of Rs841 and recommend Accumulate.

Strong recovery in enterprise beat the revenue estimates

Revenue for the quarter stood at USD1261 million, a growth of 4.3% QoQ in constant currency term .Revenue in USD term grew 3.5%QoQ as cross currency impacted adversely by 80bps. In rupee term, revenue for the quarter stood at Rs8944 crore, a growth of 3.6%QoQ and 15%YoY mainly led steady growth in Enterprise and Communications business.

Continued margin improvement

- EBITDA during the quarter stood at Rs1723 crore, a growth of 6.4%QoQ. Gross margin contracted by 90bps to 33.1% (compared to 34% in last quarter)while SG&A improved 150 bps to 13.8%, thus leading to EBITDA margin expansion of 50bps to 19.3% (in line with our estimate of Rs19.2%).
- Margin expanded during the quarter led by improvement in operational expenses on the SG&A side and supported by utilization improvement(40bps). However some headwinds like investment made on deal ramp up, change in business mix offset some portion of the margins.
- Other income stood at Rs81 crore (below estimated) mainly impacted by forex loss of negative 77.9 crore as compared to Rs50.1crore gain in previous quarter.
- PAT for the quarter stood at Rs1207crore, beating the estimates of Rs1145crore mainly led by onetime tax reversal benefit of 7.5%QoQ.

Muted margin performance for FY20

As the company has stated that they were expecting margins improvement for six to eight quarters, where it's now the seventh quarter of consecutive growth in margins, thus for now on the management expects upside to come (with levers like change in business mix and increase in digital share) however some adverse pressure(negative impact like workforce file, wage hike and location of onsite and offshore) are also present which will impact the margin going ahead. Thus the management is seeing margin pace to lower or much more muted going ahead.

Growth driven by Manufacturing, BFSI and Others

Concall highlights

- Continued growth seen in digital and TECHM next platform: The Company posted strong growth in digital business and grew 10%sequentially during the quarter. It now contributes 33% of overall revenue. The strategy (related to collaborating with several partners), investment made by the company and also putting together TECHM next platform is showing growth in digital revenue. TECHM NEXT platform is combination of established companies and companies like Altiostar where the management has either invested or collaborated to create a whole ecosystem). Even the management is seeing digital deal sizes increasing and becoming large.
- Margin performance in 3QFY19: Continued margin expansion was seen for the seven consecutive quarters. The margin expanded 50bps predominantly came from improvement in operational expenses on the SG&A side and supported by utilization improvement(40bps). However some headwinds like investment made on deal ramp up, change in business mix offset some portion of the margins. However the management expects the negative to pass through as the transition will complete. Going ahead, management expects SG&A to be in range of 14% to 14.5% which will have marginal uptake resulting in impacting the margins.
- > Tax reversal came in during the quarter: The company saw a reversal benefit during the quarter which resulted in benefit of 7.5% on effective tax rate.
- Deal wins: 3QFY19 signed a net new TCV of 440mn dollar of deal wins. Out of 440mn dollar deal, 240 mn dollar deals came from telecom and rest 200mn dollar deal wins was from Enterprise segment.
- Robust growth in Row: Strong uptick was seen in revenue growth from RoW which came in with multiple reasons like strong growth in comviva and ramp up of deal in APAC in communication side.
- Attrition still a concern: The attrition during the quarter came in highest level range of 21% (17% to 21% historically) which continues to be challenge for the company. However the attrition from higher performer remains very positive .Going ahead, the management is taking essential step to manage the rate. But still on planning part, they generally consider attrition in higher range.
- Outlook for telecom: The Company expects the momentum in telecom to continue on the back of deal wins. Thus expecting growth momentum continues in 4QFY19 also. Deal wins (240mn in telecom) are majorly widespread mainly coming across 1.)The digital network and software transformation footprint, 2) in many ways they are all in preparation for upcoming transformation which is 5G. 5G is still been in tried and trial with the tier 1 operators mostly in US and few other parts. However management expects still more time is needed for seeing the uptake in 5G.
- Top client bucket: The Company expects top client growth pattern to vary in quarters. Deal wins has come outside the top client. The growth in deal wins were coming across existing as well as new customers.
- Headcount metric: the company is creating a digital human work workforce so while during the quarter the company added on 4000 employees QoQ and close to 8000 people for last two quarters in business, The management also continued to expand their footprint in BOTS (4500BOTS).As the demand environment continues to be boost, TECHM and its BPS business will continue to play in facilitating that and will get net benefit going ahead.
