Quote of the Day : The problem with the rat race is that even if you win, you're still a rat.

BAJAJCON

BUY

11th April 2019

Bajajcon's numbers for Q4FY19 remained mixed, sales came in line with our expectation of Rs 246 cr (expectation Rs 247 cr) while the company reported PAT of Rs 61 cr (expectation Rs 65 cr) on the back of decline in gross margin by 100 bps YoY to 66.3%. ADHO's volume grew by 7% (expectation 8%) led by better demand growth in rural areas and market share gain. Going forward, we expect rural demand for Hair Oil to improve further going ahead on the back of government initiatives like higher MSP, direct benefit transfer each. On the new product launches front, the company has launched two new products in this quarter, Bajaj Cool Almond Drops and Nomarks Ayurvedic Antimarks Sunscreens. The company has more products lying for launches in time to come. On margin front, cost saving initiatives is expected to arrest margin contraction going ahead. Considering company's thrust on launching new products and cost saving initiatives, we remain positive on the stock but taking account of slightly lower volume and inflation in key inputs, we have reduced FY20e, Sales and PAT estimates by 2% each while keep valuing it at 25x, we recommend BUY with the target price of 430(440 earlier).

Earnings Estimate Highlights

11th April 2019

Top 20 banks together reported a net profit of Rs 2,357 crore in Q4FY18 and during the last quarter (Q3FY19) Our Earnings estimates suggest Nifty Earnings will grow by 10.6% for the FY19. EPS growth trajectory would see gradual improvements on the back of strong bottom-line performance of banks. FY20 Nifty EPS is expected to grow at 20% implying EPS of Rs 606

Net equity inflows rise despite a marginal fall in SIP inflow

10th April 2019

Net Equity inflows for the month of March rose to a 5 month high figure of Rs.11756 crore after falling for 4 successive months of decline in net inflows. The SIP witnessed a marginal decline of 0.5% in the monthly net inflows from Rs 8095 crore in February 2019 to Rs.8055 crore in March 2019. Balanced funds have continued their poor run with net outflows in CY 2019. March 2019 saw an outflow of Rs.3181 crores. Surge in the FPI equity inflow has propelled markets to witness new highs, as they have brought in fresh inflows worth Rs.33981 crores into the equity market. Also FPI's have bought Rs.12002 crores worth of debt papers in the month of March. Other ETF segment has added 10540 crores in the previous month. 5000 crores were added through the launch of another CPSE ETF's. The sudden huge inflows suggest that the ETF trend is catching up.

RBI Policy : In line policy, room for another cut.

5th April 2019

RBI in its 1st bi-monthly policy decided to reduce the repo rate by 25 basis points to 6.00% from 6.25%. As a result of which the reverse repo rate now stands adjusted at 5.75% and Marginal Standing Facility at 6.25%. The MPC has however reiterated for their stance to remain 'neutral'. This marks 2 rate cuts in a row for the repo rate for the liquidity crunched economy. The RBI's move to cut the rates is in line with our estimate. Weak economic conditions as reflected in IIP and weak auto sales number continue with money market tightness and consumption slowdown. Although the bank credit towards the large industries has witnessed upside, the credit flow to the micro, small and medium enterprise has been muted. Given the budget outcome in July and uncertainty relating to rainfall the MPC may hold rates in the June meeting. We expect further 25 bps cut in August policy once RBI will have further clarity on fiscal deficit, oil price trajectory and monsoon.

### **Vertical performance**

- i) Financial service show weakness during the quarter due to one of US client seeing early sign of budget constraint however deal wins in Europe cushioned some softness from US. Company financial service has grown from 5.5 % in FY18 to 9.5% in FY19. This gives a prospectus of growing going forward. Overall FY19 exited with strong growth so the growth is expected to slower as some challenges will seen in finance and insurance as M&A and other changes are going with the clients.

Margin movement was like this; 70 bps impacts due to cost involved in ramp-up of recently large deals, 30 bps due to continued investment in sales and localization, 30 bps due rupee appreciation. This was partly offset by lower bad debts provision of 40 bps and absence of one off 30 bps.
