Quote of the Day : "Decline in stocks is not a surprising event. It recurs." Peter Lynch

**FINPIPE** **NEUTRAL** **28-May-19**

Finepipe's 4QFY19 volume after being sluggish in Jan'19-Feb'19 recovered in Mar'19 resulting in 12.6% YoY growth to 80771MT. FY19 pipe and fitting volume was at 262858MT (up 4.3% YoY). Finpipe is strong player in agriculture pipe business and is continuously focusing on increasing its non-agri portion (currently 30% is non agri). Government's focus on irrigation and housing with the help of schemes like Pradhan Mantri Krishi Sinchayee Yojana (PMKSY), doubling farm income and housing for all are all positive for Finpipe and company stands to gain from such initiatives. We broadly maintain our FY20 EBITDA/PAT guidance and expect revenue/EBITDA/PAT CAGR of 7%/6%/7% over FY18-20e. However, we believe all the positive are factored in at current prices and maintain our NEUTRAL stance with an unchanged target price of Rs.487 (11x FY20e EV/EBITDA).

**Jet Fiasco hits the industry hard** **AVIATION** **27-May-19**

Total domestic aviation passengers for the month of April stood at 10.96 million down by 4% compared to 11.47 million a year ago. A fall in the air passengers has been evident first time in the last 6 years mainly due to the Jet Airways fiasco. Indigo captured the opportunity with both hands and saw its market share increase to 50% in April. The Available seat per kilometre of the industry dropped to 12.20 billion in April from 12.99 billion a month ago. This can be attributed to the cancellation of most of the flights by Jet Airways. ASK and RPK growth for the month of April have seen a multi year low at 0% and -4% respectively. The aviation turbine fuel has increased by 9% in 2019 from Rs58060 in January to Rs.63472 in April. This has led to an increase in the average air fares over the month of April thereby affecting the passenger growth rate.

**JSWSTEEL** **HOLD** **27-May-19**

We remain positive on long term perspective of JSW Steel on the back of significant capacity addition in progress, cost cutting measures and backward integration on account of captive iron ore mines (currently has 6 mines, FY20 captive production is expected at 5mt vs. 1.8mt in FY19) is also a positive. However, we cut our FY20 Revenue/EBITDA/PAT estimate by 3%/3%/8% as we factor in lower than expected volume in FY20. We believe all the positive are factored in at current price and we maintain HOLD rating with an unchanged target price of Rs.315 (7x FY20e EV/EBITDA).

**ASHOKA** **BUY** **27-May-19**

Ashoka Buildcon has posted strong growth numbers for Q4FY19 on back of healthy execution across the segment. Land status on the under development projects are in advance stage and appointment date of the 3 HAM projects out of 4 is expected by the July 2019 and work will start immediately as all the projects are fully mobilized. Based on the strong execution momentum we have increased our Revenue/PAT estimates for FY20 by 14/7% respectively. We value the stock at Rs.156 (EPC business at 10x FY20 EPS and Rs 48 per share for investment into BoT/HAM) and maintain our BUY rating on the stock.

**ASHOKLEY** **ACCUMULATE** **27-May-19**

EBITDA margin expanded by 80bps on a sequential basis on the back of operating leverage benefit and cost reduction initiatives taken by the company. The average discounts remained higher at Rs.420000 per unit in the industry and due to increasing competitive intensity it is expected to remain on the higher side. Going ahead with the new government in place the management expect the 10-12%YoY volume growth in FY20 which will be driven by infrastructure development and pre buying due to BS-VI implementation. The exports markets have once again become the focus area of the company and it will also increase its penetration in the LHD (Left Hand Drive) markets. Further development of LCV platform, order inflow in defense business, coming up of modular platform and expectation of scrappage policy will be the key growth drivers in FY21. Factoring the higher discounting and relatively slow growth in 1HFY20 we reduce our margin estimates by 30bps in FY20. We value the standalone business at 13x FY20e EPS and Rs.9 per share for HLFL to arrive at a target price of Rs.103 and recommend ACCUMULATE.

## Management concall

### INDIGO concall update for 4QFY19:

#### Concall Highlights:

- ❑ Our capacity for the quarter increased 29% year over year, with domestic capacity growing at 24% and international capacity growing at 60%. International capacity now represents close to 20% of our total capacity.
- ❑ We were particularly pleased that our international RASK or unit revenue improved at approximately 13.6% year over year as against a domestic RASK improvement of 6.2%.
- ❑ Explaining revenue trends: Optimized the network by reallocating 10% of capacity this quarter. They have also taken some sales initiatives to improve performance on distribution channels. And finally we are ensuring higher connectivity on our international flights. All these factors created a 2-3% year over year improvement in our unit revenues for the quarter and on a steady –state basis we expect a boost of 5% unit revenue improvement for the next financial year. This improvement doesn't take into consideration the higher revenue opportunity from cargo and ancillary revenues.
- ❑ Jet cessation on Revenue: Helped revenue performance in the last week of February and the whole of March. Overall for the quarter, the Jet Airways effectively increased unit revenue by 3-4%. Looking forward to the first quarter of 2020, April revenues have actually been strongly (stronger than even March) affected by the Jet Airways shutdown. By May, however, as the industry has added capacity to Jet markets, the Jet Airways effect has started to dissipate and by June they think the effect will pretty much disappear except in a few international markets where they overlapped with Jet as in the Middle East markets.
- ❑ Market behavior on pricing discipline: The downside here is that capacity was added rather late in the game without the full benefit of the 90 day booking window. Therefore, the most painful impact is in June in the metro to metro markets, where close in fares have come down quite appreciably.
- ❑ For the quarter ending June 2019 and for the full year of fiscal 2020, we expect our total capacity will be up by 30%. The distribution of new capacity would be 50:50 between domestic and international. All new aircrafts coming in are neos.
- ❑ Our CASK excluding fuel was 2.09 rupees in the current quarter, an increase of 6.7% from the same period last year. Excluding the impact of currency depreciation, the increase was 4% which was primarily driven by an increase in our maintenance cost. The higher maintenance cost continues to be higher due to the visit of older aircrafts to shop for the second time as stated earlier. The impact of this higher maintenance cost should fade away by end of FY20.
- ❑ The P&W situation has improved and that can be seen with the Technical Dispatch Reliability at 99.88%.
- ❑ Pilot shortage issue update: Got sufficient pilots now. Hired 40 pilots every month. Also, they have hired about 285 Jet airways pilots and they would be ready in next 3-6 months. Expect the Jet Airways pilots' number to increase. The management expects to have sufficient pilots to support the expansion plan
- ❑ IndAS impact on lease: Rs 140 billion would be added as Lease liability and corresponding Lease Asset would be added to the amount of Rs 130 billion. As regards to P&L for FY20, the impact of accounting change should be neutral. The only impact on P&L would be the M2M on the reporting date as per the exchange rate.
- ❑ Owning the aircrafts plan: The Company currently owns 12 ATRs bought outright with cash. Their focus on owning the aircrafts is still on; however it's slower right now due to the challenging financial conditions environment for the industry
- ❑ No higher charges in the initial years of lease as their most leases are for 6 year period and this leads to lower average lease period.
- ❑ Operational cost of A321 neos is 8-10% cheaper on a unit cost basis than A320 neos
- ❑ The company expects the current lower passenger growth rates trend to fade out over the next 2 months i.e. by July
- ❑ Of the 5.9% improvement in RASK in Q4, 2.5% can be attributed to company initiatives and 3.5% to the Jet cessation.
- ❑ The interest income on deposits in foreign currency will start to come down going ahead.
- ❑ The company expects to add 53 A320-321 and 11 ATRs in FY20. This would be gross additions
