Quote of the Day : "Decline in stocks is not a surprising event. It recurs." Peter Lynch

**CENTURYPLY****NEUTRAL****30-May-19**

FY19 has been a challenging year for CENTURYPLY with the overall challenging industry environment, rising raw material prices and a depreciating rupee. While the revenue grew by 15% YoY (ex-MDF 6%), poor margins EBITDA margins at 13.3%, down 230bps YoY led to downfall in operating profit by 1.85%. The sluggish demand environment led to volumes being flat YoY for the plywood. The revenue growth in laminate segment was primarily on account on higher realisations due to price hikes, however the input prices were much higher and impacted margins. The much anticipated MDF segment growth was affected due to heavily competitive environment form over-capacities in the market. However, the management believes that the demand/supply gap would narrow down eventually with pricing power helping the players gain better margins on improving capacity utilization. The stand out segment Particle board grew by 33% with improving operational margins. They key challenges of slow demand environment, heavy competition and high input prices still persist in the industry impacting growth prospects for the company. We lower our FY20 PAT estimates by 7% due to poor margin profile of the segments. We continue to value CENTURYPLY at 12x FY20e EV/EBITDA to arrive at a target price of Rs 180 and maintain our NEUTRAL stance.

**MPHASIS****BUY****29-May-19**

Mphasis ended the year with moderate growth in its revenue. Revenue grew by 14.2%YoY in constant currency (cc) terms led by continued growth in direct international (direct core grew by 16.3%YoY in cc terms) channel. Even HP/DXC partnership (~28% of the revenue) aided to the overall growth by growing 22.9%YoY in FY19. Margin expanded 100bps to 16.1% in FY19 led by better execution and benefit from currency. Going forward, Continued traction from core services (HP and direct channel), robust deal momentum (USD146 mn in 4QFY19) and strong growth in new client addition through Blackstone Portfolio(doubled the revenue in FY19) is expected to drive growth in FY20. In core services , direct core(part of direct international channel)is expected to outperform the industry growth in FY20 with continued momentum in strategic account and growth opportunity in new avenues (Blackstone Portfolio).Even HP/DXC which was soft for last few years is expected to post growth in line to industry in FY20 led by ramp up of large transformational deals . On the margin front, we expect the company to be in the higher end of the guidance for FY20 (15% to 17%) led by continued improvement in operational parameters and improved margin of HP/DXC business. However, some portion is expected to be invested back in business in FY20. Factoring in strong TCV wins and continued outperformance in major channels our estimates remains unchanged. We largely maintain our previous target price of Rs1314 and recommend BUY.

**NMDC****NEUTRAL****29-May-19**

At NMDC the non-operational (Since start of Nov'18) Donimalai mine remain the major concern, company's FY19 volume at 32.36mt (down 10% YoY) was down on account of shut down at Donimalai mine. On iron ore price, company has recently increased its prices for Lump and Fines to Rs.3100/t (up 8.8% from Apr'19) and Rs.2860/t (up 9.6% from Apr'19). Though increase in international iron ore prices is supportive to sustain the higher price for NMDC but prices of iron ore in Odisha would put pressure on increasing prices further. 3mt steel plant in Nagarnar is expected to get commission by end of Dec'19, which will start contributing only from FY21 onwards. Resumption of mining activities at Donimalai would be a positive. We maintain our FY20 estimate and our NEUTRAL stance on the stock with an unchanged target price of Rs.93 (5.5x FY20e EV/EBITDA).

**IRB****NEUTRAL****29-May-19**

IRB has completed financial closure of all 3 under development projects (2 HAM and 1 BoT project) but waiting for the appointment date. Currently these 3 projects contributed around 55% of the total order book and appointment date is delayed due to lower land availability. As result of it construction revenue in FY20 is likely to remain flat with lower toll collection on account of end of Mumbai Pune concession period. On order inflow front picture looks strong from IRB's perspective as the NHAI is reviving the BoT model and company will go for it as BoT is preferred way of bidding for the company. We largely maintain our FY20E estimates and value IRB at 8.5x FY20E EV/EBITDA. Maintain NEUTRAL stance on the stock.

**FII's increase their ownership in Indian bourses****29-May-19**

After a dismal 3rd quarter where FII had been net seller in the Indian equity market pulling out more than 19000 crore, the 4th quarter before the elections came out as a relief to the Indian bourses. The FIIs were net buyers in the 4th quarter and flowed in more than 45000 crore through the equity route. The FIIs has been bullish towards the Indian market through out the beginning of the year and no pre election uncertainties could be witnessed in their holding pattern Out of the 471 BSE companies who have shared the shareholding data, 149 have reported FIIs to be sellers while 322 companies have seen FII's to be net buyers. FIIs have reduced their stakes considerably in automobiles, Information technology and consumer discretionary sector Auto components, Real Estate and construction & Engineering have been the sectors where FII's have increased their holdings. DIIs on the other hand have increased stakes in 330 companies and decreased stakes in 104 companies in Q4 2019.

**NMDC 4QFY19 Concall highlights:**

- ❑ Kumaraswamy mine produced around 7mt in FY19, which is the mandated capacity by Supreme Court.

Out of three one is complete and second and third are 30% and 15%-20% complete respectively. Total capex in this project is Rs.1200cr and Rs.650cr has already been incurred.
