

Trading Calls

GAIL BUY 18th June 2019

Weekly chart of GAIL reveals that demand is increasing and supply is diminishing. Channel support line from lower levels is displaying trend reversal and creates buying opportunity at current juncture. As of now, stock is taking support from its ascending triangle resistance line on monthly chart which augur well for the Bulls and indicate surge on upside. Apart from this, rising Histogram in MACD daily signals optimism, which further suggest upside move in the counter in coming sessions. BUY GAIL AROUND 308-300, ON DIP 260-270 SL 236(CLOSING BASIS), TARGET 390-445

SBIN BUY 17th June 2019

After contravention sustainability of consolidation chapter between 312 and 246, this scrip was on track to creation a flag pattern on weekly chart, now it has given breakout of flag pattern. It also maintained its uptrend on the long term chart and is trading well above its short and long term moving averages. The momentum oscillator, RSI is also favors the price pattern. One can accumulate the stock around 335-340 AND ON DIP TOWARDS 305-310 SL 278 (CLOSING BASIS) TGT 398-450.

TATAMOTOR BUY 12th June 2019

Scrip spurted from a low of 163, it showed pullback on upside marked the high of marks and started consolidating there. This pullback rally and consolidation has taken the form of inverted H&S price pattern on an hourly chart where construction of right shoulder is going on. Currently, it is awaiting for the breakout on upside so that it can accelerate buying momentum further. Formation of Bullish Harami on daily time frame of chart suggesting bullish momentum in the scrip. Indicator and oscillator also showing conducive scenario in the coming sessions. So based on the mentioned technical structure we expect that price may see momentum on upside after giving the breakout above 173 and hit our target of 185 & 192 marks. BUY TATA MOTOR @ 168-171 AND ON DIP TOWARDS 162-164 SL- 154 (CLOSING BASIS) TGT- 185, 192

Market	Value	% Change
SGX Nifty (at 8.00 am IST)	11774.00	-0.16%

Nifty Key Levels

Support	S1: 11705	S2 : 11625
Resistance	R1 : 11845	R2 : 11920

Market Outlook

In the late hour of trade, Index gave breakout above the Falling Channel line on the hourly chart. We expect Bulls will continue this positive momentum and resume its higher degree of uptrend. Formation of Bullish Engulfing indicate strength.

As of now, Index crosses and sustains above 11845, it would see buying towards 11920 levels in the extreme short term. Failing to hold above 11705 level should cause it drift towards the 11625 levels.

VIEW

Market ended on negative note after volatile session due to mixed bag of geopolitical & domestic news and soaring crude oil prices dented investor's sentiment. Mild bounce back likely but broader market will remain into consolidation mode. We expect volatility to increase in the coming week. We suggest to avoid aggressive position on either side and keep protective profit with directional moves that market will take in coming sessions.

NIFTY-

- a) Weekly chart reveals the formation of lower top and lower bottom which taken the form of Falling channel
- b) After forming the falling channel, Index has found resistance to the double top in the zone of 11840-11880
- c) Weekly RSI remains neutral while not showing any divergence against the price where as weekly MACD looks stays positive, it is seen narrowing its trajectory sharply.
- d) Broader technical set up looks remain challenging unless Nifty gives a decisive close above 11850 -11900 zone where we can expect falling channel breakout
- e) From there it can surge higher till 12050 and 12200 levels.
- f) Principal of polarity showing support near 11590 followed by 11480 levels.

CHART ANALYSIS

SUPPORT & RESISTANCE LEVELS

	NIFTY LEVEL	JUSTIFICATION
Resistance 2	12050	Previous swing high
Resistance 1	11900	Peak of Falling channel
Close	11724	
Support 1	11590	Key Base
Support 2	11480	Previous swing low

VIEW

After opening with a negative session, Banknifty fell to make a weekly low of 30220 on Tuesday. However it has found a strong support at 50 DMA (currently is at 30234) and gave a smart pullback to 30824 on Thursday. At the end of the week the index closed with a net gain of 0.05% over its previous week's close.

OBSERVATIONS:

- 1) Banknifty has found a strong support at 50 DMA.
- 2) Stochastic reached at oversold zone.
- 2) Bank Nifty is currently trading above 50, 100 & 200 DMAs.
- 3) The gap in Banknifty is still left in between 29559 & 30111.

According to the above observations it can be concluded that the short term and medium term trend of Banknifty is looking positive as the index is trading above all the major DMAs (50, 100, 200). Current profit booking process is also likely to complete very soon as the Stochastic has reached at the oversold zone.

In the extreme short term 50 DMA (currently is at 30234) would act as a strong support of Banknifty and a successive breach of this level is likley to take the index further lower to fill the gap of (29560 - 30111) which was formed on 20th May 2019. However we should use this gap-filling activity as a fresh buying opportunity in the index.

CHART ANALYSIS

SUPPORT & RESISTANCE LEVELS

RESISTANCE/SUPPORT	BANKNIFTY LEVEL
Resistance 2	31420
Resistance 1	31050
Close	30628
Support 1	30234
Support 2	29550

VIEW

Elevated crude oil prices on renewed geopolitical tensions as Iran destroyed US drone by a missile, which was allegedly flowing over Iranian territory suggest negative sentiment for Indian currency. While dovish monetary policy from the FED and ECB has turned positive in the last rate cut cycle. QE and lower rates led to an appreciation in the domestic currency against the dollar

TECHNICAL FACTORS-

- a) From last few days, pair has been forming Inverted H&S on daily chart suggest bearishness for Rupee
- b) Breakout is expected above 70 on closing basis from where it can extend up to 70.65 and 71 levels.
- c) Moreover, bullish crossover in MACD also lending support to the price action of pair
- d) A failure to sustain beyond the level would lead to strength for rupee and pair can drag to its lower level till 69.30 and 68.40 marks

BUY TATA MOTOR @ 168-171 AND ON DIP TOWARDS 162-164 SL- 154 (CLOSING BASIS) TGT- 185, 192

Spread Call View – Sell Zinc Buy Lead

The spread of Zinc and Lead have tested the record low of -96 levels and currently the spread is trading at -92. We believe the spread to narrow towards -75 to -70 levels in the months to come.

Source: Bloomberg, Narnolia Research

MCX Zinc prices have rallied by almost 23 percent since the start of this year. Zinc has been the best performer among the base metal complex in 2019 during the first quarter of 2019. While Lead prices has remained unchanged during the first quarter of 2019. We believe Lead prices to stay strong over Zinc prices in future.

Zinc Treatment and refining charges has risen towards \$265 per tonne, up from \$20 per tonne in Sept 2018 which indicates the smelter get a higher margin towards refined production indicating the output to keep rising in coming months. On the other hand, Lead refining charges have remained unchanged helping us to forecast that no major production increase is expected in near future. This also points towards rise in zinc production will be higher as compared to lead production.

Treatment and refining charges

Source: Bloomberg, Narnolia Research

LME inventories of both Zinc and Lead are currently near decade low levels. Although, a big inflows in zinc inventories this week have fanned expectation that supply tightness will end soon. LME Zinc inventories jumped to 73,700 tonnes, rising from the record low of 50,000 tonnes in January 2019. LME Zinc stocks have increased by 11 percent since February 2019. While Lead stocks has remained unchanged during the same period.

Source: Bloomberg, Narnolia Research

Zinc mine supply is expected to come online during the second half of 2019 as smelters earn a higher margin and with prices up 20% during the year we believe supply of zinc is expected to increase in the months to come. On the other hand, Lead supply is expected to rise by 4.1% in 2019 however the tightness in availability of lead concentrate may provide constraint to the global lead output.

Spread Call View – Sell Zinc Buy Lead

The spread of Zinc and Lead have tested the record low of -96 and currently the spread is trading at -91. We believe the spread to narrow towards -75 to -70 levels in the months to come.

Various Possible Outcome of Spread Call:

1. Zinc price to fall, Lead price rise
2. Both Lead and zinc prices fall, but zinc to fall more
3. Lead prices unchanged, while zinc prices fall
4. Both Lead and zinc prices rise, but lead outperform
5. Lead rise, while zinc prices unchanged

Conclusion:

“Higher Zinc refining charges, expectation of new zinc mine supply, rising LME Zinc stocks and tighter lead market makes us to come to a conclusion to actively short zinc and buy lead.” Therefore, we expect the ratio Sell Zinc and Buy Lead to become narrow towards -75 to -70. At present the ratio is trading at -92 as on 18th April 2019.
