Market Outlook

Yesterday, Nifty opened positive at 11860.85 and made a high of 11911.15. From there it moved towards the low of 11821.05 and closed negative at 11841.55 by discounting 6 points. Formation of spinning top showing pause in the upside momentum awaiting its final outcome this weekend. If this pause is only the profit booking on the day of expiry and market get stabilize today then index should pick up the momentum. In that case, we can expect upside move up to 12000- 12050 zone. Confirmation will emerge after today's close. For the time being, trader should role their game cautiously.

Quote of the Day : "Risk comes from not knowing what you are doing."

IPO - IndiaMART InterMESH Limited**NEUTRAL****21-Jun-19**

The company has strong network and brand recognition which drives leadership in the B2B marketplace in India. It enjoys diverse industry and product service categories. Last three years revenue has grown at CAGR of 29%. However, company carries risk of facing competition in attracting and retaining suppliers and buyers from competitors including Indian as well as foreign online B2B marketplaces. The company is valued at 5.47x FY19 EV/Sales. We assign Neutral Rating to the issue. However it may be attractive to investor looking for theme based investment.

LICHSGFIN**BUY****19-Jun-19**

Given the risk-reward opportunity (Base +14%, Bear -13% and Bull +56%), valuation looks favorable at 1.3x BV FY21e. Valuations of LICHF has corrected significantly from 2.8x in FY17 to 1.7x in FY19 on the backdrop of spread and growth pressure. However, with change in current scenario, we believe LICHF is rightly placed to capture the growth opportunity. Spreads are likely to improve with the ease in competitions. Lenders turning negative towards lower rated HFCs will have positive impact in LICHFC due to Parentage support and AAA credit rating. Lower balance transfer cases will improve the growth. LICHF is currently trading at 1.3x BV FY21e which seems favorable given the risk reward opportunity. We roll over our valuation multiple to FY21e BV at 1.5x to arrive at a target price of Rs 641 and maintain BUY.

Life Insurance**13-Jun-19**

The Individual Weighted received Premium of the Life Insurance industry grew at 13% YoY for the month of May 2019. The growth was predominantly led by the private players who witnessed a 27% growth for the month while LIC saw a 3% degrowth. The new business growth rose 43% in the month of May from 12838 crores to 18414 crores. The listed insurance companies however witnessed high growth in the new business premium in May. HDFC Life saw the highest growth among them at 52% followed by SBI Life at 45%. ICICI Prudential Life and Max Life also witnessed decent growths at 27% and 22% respectively. The 1st quarter of FY 20 is seeing high growth rates in the new business premium of life insurance industry, implying financialization of household savings is on the rise.

IIP & CPI**13-Jun-19**

The Industrial Output for the month of April saw a rebound after months of underperformance. IIP growth of 3.4% for the month of April is a 5 month high figure. The improvement in the electricity generation and mining activity at 6.0% and 5.1% has propelled the IIP to grow at 3.4%. Manufacturing growth also grew at 2.8% after 2 months of negative growth. Consumer Price Index for the month of May 2019 edged up marginally to 3.05% as compared to 2.92% a month ago. The rise in the food prices has helped the CPI to inch up higher. The food price index grew at 1.83% in May as opposed to 1.10% in April 2019. The IIP for the next two months is poised to be under the 4% level with the effects of rate cut showing up in rise in spending in consumer durables and non durables. Consumer Price Index inching upwards shows a rise in the food inflation which was clearly incoming with the delayed and monsoon in most parts of the country. The trajectory for the next couple of months seems to be below 4% with rise in food inflation but moderation in the headline inflation. With the gradual improvement in the CPI and steady industrial growth the RBI's August rate cut will be dependent on the government's fiscal policies in the budget in July 2019.

Result review report on NBFC**12-Jun-19**

Liquidity issue continues to impact the performance of NBFC sector but the situation is far better than it was in 3Q FY19. Margins and growth have remained under pressure. Growth in NBFCs was affected as management curtailed incremental AUM growth in order to maintain liquidity. The share of funds flow from MF to NBFC's has declined YoY. However, Most of the NBFCs increased their securitization to manage incremental demand and liquidity of the company. Recently announced liquidity management by RBI will ensure NBFC to hold cash and liquidity investment in the balance sheet which can also have some impact in the margins. On the growth front, HFCs continue to struggle and vehicle financier has also seen the impact on account of slower auto industry growth. Vehicle financiers' assets quality remain intact while HFCs have seen some deterioration. The demand in the power sector is steadily improving along with various resolutions underway. The acquisition of REC by PFC is expected to create synergy & boost loan growth at more than 12% normal run rate. Total AUM of our total coverage has grown at the rate of 16%/5% YoY/QoQ while PAT has grown at the rate of 45%/13% YoY/QoQ. Amid the liquidity issue we believe better rated NBFCs with strong parentage support will continue to gain the market share Our top picks are LICHSGFIN, CANFINHOME, CHOLAFIN, M&MFIN and RECLTD.
