Nifty Intraday Chart

Market Outlook

On Friday, Nifty opened positive at 11964.75 and made a high of 11981.75. From there it moved towards the low of 11797.90 and closed negative at 11811.15 by discounting 135.60 points. Although Nifty shredded its entire week's gain on a budget day by closing lower near 11800 marks, it is still trading near its major simple moving averages 20 DMA which is rising and placed around 11828 levels suggests strong uptrend to continue in short-term. Major trend line support on lower time frame and principle of polarity showing support near 11740 -11730 zone, if this levels hold then it can bounce back toward 11980 & 12070 levels. Moreover, a close below strong demand zone 11740 will push prices lower towards 11680-11640 marks.

BUDGET_2019

06-Jul-19

The run up to the first budget under Modi Government 2.0 had a lot of expectations from the burdened economy, worrying farmers, pained middle class, cash struck PSB's and liquidity hungry NBFC's. The New Finance Minister has envisaged a vision for a \$5 trillion Indian economy driven by investments by 2024. The finance minister reduced the fiscal deficit target to 3.3% in a move signalling government's commitment to fiscal consolidation. The government has also proposed for a Credit Guarantee Enhancement Corporation to be set up with special focus to the infrastructure sector along with a proposed investment permits to the FII & FPI to invest in infrastructure debt funds. FPI's have also been allowed henceforth in listed debt securities issued by REITs and InvIT. Moreover the government has also decided to make RBI as the regulator for the NBFC's and HFC's, this will enable prompt actions for the NPA management in NBFC's and the liquidity crisis will hope to get resolved faster. The RBI has also announced measures to give away 1.3 lakh crore liquidity relief to banks that support NBFC's. The budget also focused on a 70,000 crore of capital to be infused into the public sector banks to boost credit growth in the economy.

Monthly Auto Volumes: June 2019

02-Jul-19

The demand across the automobile industry continued to remain under pressure in June 2019 and witnessed a double-digit decline for 3rd consecutive month. Most of the OEMs are forced to take production cuts in order to correct channel inventory. However, sales usually soften in June with the beginning of monsoon as customers hold their purchases till the auspicious festival season. The passenger vehicle segment posted a decline of 15% YoY during the month. OEMs which have launched new models recently have received well by the customers. However, consumer sentiments have suffered due to cost increases led by safety regulations which are weighing down vehicle sales. The commercial vehicle segment also witnessed a decline of 15% YoY due to new norms, falling freight rates, higher cost of fuel and weak retail demand across regions. Two-wheeler segment remained impacted by 8% YoY decline in sales because of sluggish demand across various regions particularly in the second half of the month. Three-wheeler sales contracted by 14% YoY as the domestic demand remained muted along with headwinds across key international markets. The tractor segment also declined by 17% YoY during the month due to deficient rainfall, severe drought condition along with lower reservoir level in Southern and Western region. BAJAJ-AUTO posted flat growth in sales while ASHOKLEY, EICHERMOT, ESCORTS, HEROMOTOCO, M&M, MARUTI, TATAMOTORS and TVSMOTOR recorded 19%, 22%, 10%, 12%, 12%, 14%, 17% and 5% YoY decline in sales respectively. We continue to like BAJAJ-AUTO from our coverage universe.

NEUTRAL

21-Jun-19

The company has strong network and brand recognition which drives leadership in the B2B marketplace in India. It enjoys diverse industry and product service categories. Last three years revenue has grown at CAGR of 29%. However, company carries risk of facing competition in attracting and retaining suppliers and buyers from competitors including Indian as well as foreign online B2B marketplaces. The company is valued at 5.47x FY19 EV/Sales. We assign Neutral Rating to the issue. However it may be attractive to investor looking for theme based investment.

LICHSGFIN

BUY

19-Jun-19

Given the risk-reward opportunity (Base +14%, Bear -13% and Bull +56%), valuation looks favorable at 1.3x BV FY21e. Valuations of LICHF has corrected significantly from 2.8x in FY17 to 1.7x in FY19 on the backdrop of spread and growth pressure. However, with change in current scenario, we believe LICHF is rightly placed to capture the growth opportunity. Spreads are likely to improve with the ease in competitions. Lenders turning negative towards lower rated HFCs will have positive impact in LICHF due to Parentage support and AAA credit rating. Lower balance transfer cases will improve the growth. LICHF is currently trading at 1.3x BV FY21e which seems favorable given the risk reward opportunity. We roll over our valuation multiple to FY21e BV at 1.5x to arrive at a target price of Rs 641 and maintain BUY.
