Nifty Weekly

8-Jul-19

VIEW

Domestic market are looking on it tenterhook as event of union budget failed to instill any confidence among market participants. Entire week indices were trading within narrow bands and oscillated in the defined range. But on Friday, equity shares tumbled due to the proposal to increase the minimum public share holding from 25% to 35% created fears that it will suck the liquidity in the market. FM proposed 20% tax on buy back offer that was another negative news for the securities market. Even market breadth turned in favour of Bears. In coming sessions, there is less hope of pullbacks and if there will be any, they are likely to remain at limited extent.

NIFTY-

a) Index showed a range bound move but remained volatile on anticipated lines

b) Breadth of the market remained weak amidst low volume suggest lack of follow thru buying

c) Emergence of shooting star on weekly chart indicate bearish sentiment

d) Broader technical set up looks remain challenging unless Nifty gives a decisive close above 11985-12000 zone where we can expect trendline breakout

e) From there it can surge higher till 12100 and 12200 levels.

f) It is crucial for the Nifty to sustain above its 50 DMA placed at 11725 level. If this breaches , then selling pressure will increase and prevailing negative condition could add to the woes pushing Nifty to test 11625-11590 zone on lower side.

Banknifty Weekly

8-Jul-19

VIEW

After opening with a subdued session, Banknifty traded in the band of 31105-31661 throughout last week and closed with a net gain of 1% over its previous week's close. The PSU banking index was the main catalyst and closed with a net gain of 2.7% during the last week.

OBSERVATIONS:

- 1) Banknifty has made 'Double top' near 31784
- 2) Banknifty is currently trading above 50, 100 & 200 DMAs.
- 3) The gap in Banknifty is still left in between 29559 & 30111.

According to the above observations it can be concluded that the short term and medium term trend of Banknifty is looking positive as the index is trading above all the major DMAs (50, 100, 200). So 'every decline should be use as buying opportunity' in the index (for investment perspective).

However formation of double top pattern on the daily chart is giving indication of some profit booking in the extreme short term. Therefore we recommend initiating some fresh short position in the index (for trading purpose only) by placing a strict stop loss at 31785 (closing basis)for the target of 31050 and then 30620.

USDINR Weekly

8-Jul-19

VIEW

Govt seems to be of the view that bringing down risk free interest rates is one of the best ways to ensure growth in the economy. Big inflows can help lower rate which can give strength to our domestic currency. Recapitalization of PSU banks is another positive stance taken by our FM. Crude oil prices remained soft on worries of a global economy slowdown as US factory orders fell for the second consecutive week which also bolster the sentiment of Rupee. Meanwhile, pair will take cues from the news flow of the monsoon, forthcoming earning season, global market and crude oil prices.

TECHNICAL FACTORS-

a) The sequence of lower high's and lower lows indicate strength for our indian currency

b) Sustainability below 40 on daily RSI also suggest optimism

c) Pair can extend weakness towards 68.30-68 zone where it can find support and able to show a pullback on upside.

d) As long as pair will holds below 69 followed by 69.70 mark, selling pressure will continue to exist.

STDC BUY GAIL @ 308-300 AND ON DIP TOWARDS 260-270 SL 236 (CLOSING BASIS) TGT 390-445

Weekly chart of GAIL reveals that demand is increasing and supply is diminishing. Channel support line from lower levels is displaying trend reversal and creates buying opportunity at current juncture. As of now, stock is taking support from its ascending triangle resistance line on monthly chart which augur well for the Bulls and indicate surge on upside . Apart from this, rising Histogram in MACD daily signals optimism, which further suggest upside move in the counter in coming sessions. BUY GAIL AROUND 308-300, ON DIP 260-270 SL 236(CLOSING BASIS), TARGET 390-445

STDC BUY TATA MOTOR @ 168-171 AND ON DIP TOWARDS 162-164 SL- 154 (CLOSING BASIS) TGT- 185, 192

Scrip spurted from a low of 163, it showed pullback on upside marked the high of marks and started consolidating there. This pullback rally and consolidation has taken the form of inverted H&S price pattern on an hourly chart where construction of right shoulder is going on. Currently, it is awaiting for the breakout on upside so that it can accelerate buying momentum further. Formation of Bullish Harami on daily time frame of chart suggesting bullish momentum in the scrip. Indicator and oscillator also showing conducive scenario in the coming sessions. So based on the mentioned technical structure we expect that price may see momentum on upside after giving the breakout above 173 and hit our target of 185 & 192 marks. BUY TATA MOTOR @ 168-171 AND ON DIP TOWARDS 162-164 SL- 154 (CLOSING BASIS) TGT- 185, 192

Spread Call View – Sell Zinc Buy Lead

Spread Call View - Sell Zinc Buy Lead

The spread of Zinc and Lead have tested the record low of -96 levels and currently the spread is trading at -92. We believe the spread to narrow towards -75 to -70 levels in the months to come.

Source: Bloomberg, Narnolia Research

MCX Zinc prices have rallied by almost 23 percent since the start of this year. Zinc has been the best performer among the base metal complex in 2019 during the first quarter of 2019. While Lead prices has remained unchanged during the first quarter of 2019. We believe Lead prices to stay strong over Zinc prices in future.

Zinc Treatment and refining charges has risen towards \$265 per tonne, up from \$20 per tonne in Sept 2018 which indicates the smelter get a higher margin towards refined production indicating the output to keep rising in coming months. On the other hand, Lead refining charges have remained unchanged helping us to forecast that no major production increase is expected in near future. This also points towards rise in zinc production will be higher as compared to lead production.

Spread Call View – Sell Zinc Buy Lead

LME inventories of both Zinc and Lead are currently near decade low levels. Although, a big inflows in zinc inventories this week have fanned expectation that supply tightness will end soon. LME Zinc inventories jumped to 73,700 tonnes, rising from the record low of 50,000 tonnes in January 2019. LME Zinc stocks have increased by 11 percent since February 2019. While Lead stocks has remained unchanged during the same period.

Source: Bloomberg, Narnolia Research

Zinc mine supply is expected to come online during the second half of 2019 as smelters earn a higher margin and with prices up 20% during the year we believe supply of zinc is expected to increase in the months to come. On the other hand, Lead supply is expected to rise by 4.1% in 2019 however the tightness in availability of lead concentrate may provide constraint to the global lead output.

Spread Call View - Sell Zinc Buy Lead

The spread of Zinc and Lead have tested the record low of -96 and currently the spread is trading at -91. We believe the spread to narrow towards -75 to -70 levels in the months to come.

Various Possible Outcome of Spread Call:

- 1. Zinc price to fall, Lead price rise
- 2. Both Lead and zinc prices fall, but zinc to fall more
- 3. Lead prices unchanged, while zinc prices fall
- 4. Both Lead and zinc prices rise, but lead outperform
- 5. Lead rise, while zinc prices unchanged

Conclusion:

"Higher Zinc refining charges, expectation of new zinc mine supply, rising LME Zinc stocks and tighter lead market makes us to come to a conclusion to actively short zinc and buy lead." Therefore, we expect the ratio Sell Zinc and Buy Lead to become narrow towards -75 to -70. At present the ratio is trading at -92 as on 18th April 2019.
