

Trading Calls

KAJARIACER BUY 12th July 2019

The stock has made a double bottom near Rs 543 and thereafter started to give pullback from that level. Positive divergences were also formed both in RSI & Stochastic on daily chart. Therefore some upward rally is expected in the stock from the current level.

GAIL BUY 10th July 2019

Weekly chart of GAIL reveals that demand is increasing and supply is diminishing. Channel support line from lower levels is displaying trend reversal and creates buying opportunity at current juncture. As of now, stock is taking support from its ascending triangle resistance line on monthly chart which augur well for the Bulls and indicate surge on upside. Apart from this, rising Histogram in MACD daily signals optimism, which further suggest upside move in the counter in coming sessions. BUY GAIL AROUND 140-145, ON DIP 120-125 SL 110(CLOSING BASIS), TARGET 180-200

RELIANCE BUY 1st July 2019

Since 3rd May 2019 stock is in correction mode but internal from 13th May to 23rd May it has moved in impulse and from 23rd May it is falling corrective and spending long time which is part of time corrective fall. On daily scale you can see that during this corrective fall volume participation is low. During entire corrective fall it has maintained the 200 DMA and now a days its hovering around 200 DMA. Between 1220-1200 is a strong sup zone of RELIANCE, so we advice our client to accumulate RELIANCE in the range of 1270-1260 and on decline towards 1230-1220 for the price targets of 1321 and 1356 with 1169 (on closing basis) as a SL. In larger degree stock is in uptrend.

REPCOHOME BUY 27th June 2019

From 308.50 to 482.50 (between 26feb 2019 to 28mar 2019) stock rose in impulse and since there its falling corrective as normal flat abc form. It has almost retraced 75% of the just preceding larger impulse. As per rule it should not come below 316 (on closing basis) so we advice our client to accumulate in the range of 370-360 and on decline towards 3347-337 for the discussed targets of 400 and 426 with strict stops.

RECL BUY 25th June 2019

Scrip is moving in a well defined ascending channel with multiple touch point and appears to be having a strong support around 138- 142 levels as it bounced back couple of time from the demand line. It also maintained its uptrend on the long term chart and is trading well above its short and long term moving averages(20/ 50 /200 DMA). The momentum oscillator, RSI is also favors the price pattern. One can accumulate the stock around 155 and lower around 138-142 zone for an upside target of 220/260 and a stop loss should maintain 125 closing basis.

Market	Value	% Change
SGX Nifty (at 8.00 am IST)	11636.50	0.30%

Nifty Key Levels

Support	S1: 11570	S2 : 11520
Resistance	R1 : 11650	R2 : 11700

Market Outlook

Index failed to surpass its key hurdle at 11700 near 50 & 20 DMA's and erased two days gain. A decisive close below 11560 (100 DMA's) can welcome the sellers and weakness will intensified in coming session and Index will reach toward its next support of 11460 levels. However, failure to breach and sustain below 11600 level can see a bounce back towards 11650 & 11700 levels on upside.

VIEW

Domestic market remain disappointed on the cues of budget proposal as last week indices witnessed intense selling pressure, despite stable global market. US has signalled interest rate cut in near term along which support emerging market and Bulls tried their lost ground as the monsoon has shown improvement in the first shower of rainfall in July. Results of first quarter can lead specific volatility in the stocks. We expect market to remain on choppy track due to the announcement of WPI & balance of trade data of June on Monday along with the factors of global economic slowdown.

NIFTY-

- a) Nifty was on roller coaster ride as it oscillated between gains and losses throughout the week.
- b) Index breached the lower end of the trading range and entered the strong support zone of weekly bullish gap at the confluence of 100 DMA
- c) In coming days, it would be interesting to see Nifty action near its upward sloping line as index had bounced back four times by connecting major swing lows around 10004, 10585, 11110 & 11460 levels
- d) Momentum oscillator stochastic also turned bullish from its oversold zone suggest consolidation or upside move
- e) Although it has to give decisive close above 11625-11650 zone where the neckline double top has been predicted
- f) A sustained trade above 11650 will take it towards 11770 and 11845 levels
- g) However, a failure to sustain beyond the level would lead to selling pressure towards 11460 and 11425 levels. Below this it can slip down till 11280 levels

CHART ANALYSIS

SUPPORT & RESISTANCE LEVELS

	NIFTY LEVEL	JUSTIFICATION
Resistance 2	11770	Previous swing high
Resistance 1	11650	Neckline of Double Top
Close	11552	
Support 1	11460	Upward sloping line support
Support 2	11425	Previous swing low

VIEW

Last week Banknifty started to trade with a red session and fell to make a weekly low of 30346 on Tuesday. Thereafter the index consolidating by taking support of 50 DMA. At the end of the week Banknifty closed with a net loss of 2.8% over its previous week's close.

OBSERVATIONS:

- 1) Banknifty has found a strong support near 50 DMA (closing basis)
- 2) The gap in Banknifty is still left in between 29559 & 30111.
- 3) Stochastic reached at oversold zone.

According to the above observations it can be concluded that the worst is not yet over in Banknifty as the gap (29559-30111) was not filled. Currently the index is taking support at 50 DMA (30565) .So some consolidation may possible in next 2-3 days. However a closing below 50 DMA is likely to take the index further lower to 30100 and then 29560 in the short term. Therefore we recommend maintaining a stop loss in the long position of Banknifty at 50 DMA (closing basis), fresh long can be initiated in 29560-30110 range.

CHART ANALYSIS

SUPPORT & RESISTANCE LEVELS

RESISTANCE/SUPPORT	BANKNIFTY LEVEL
Resistance 2	31100
Resistance 1	30900
Close	30601
Support 1	30345
Support 2	30110

VIEW

Crude oil prices moved higher on the back of lower US inventory and impending tropical storm Barry due to which US oil producers in the gulf of Mexico cut more than half their output as tension continued to simmer in the middle east can weigh on domestic currency. Rupee may trade in a rangebound manner ahead of the release of retail inflation and factory output data.

TECHNICAL FACTORS-

- a) Pair has been forming lower tops and lower bottoms on weekly chart
- b) Primary trend is bearish as pair is still trading below important moving average
- c) But momentum oscillator stochastic and daily strength indicator RSI turned on bullish side
- d) Breakout is expected above 68.70 from where it can extend up to 69.35 and 70 mark
- e) Failure to cross and sustain above 68.70 mark, can see a slip down till 68.25 and 67.90 mark

After contravention sustainability of consolidation chapter between 312 and 246, this script was on track to creation a flag pattern on weekly chart, now it has given breakout of flag pattern. It also maintained its uptrend on the long term chart and is trading well above its short and long term moving averages. The momentum oscillator, RSI is also favors the price pattern. One can accumulate the stock around 335-340 AND ON DIP TOWARDS 305-310 SL 278 (CLOSING BASIS) TGT 398-450.

Spread Call View – Sell Zinc Buy Lead

The spread of Zinc and Lead have tested the record low of -96 levels and currently the spread is trading at -92. We believe the spread to narrow towards -75 to -70 levels in the months to come.

Source: Bloomberg, Narnolia Research

MCX Zinc prices have rallied by almost 23 percent since the start of this year. Zinc has been the best performer among the base metal complex in 2019 during the first quarter of 2019. While Lead prices has remained unchanged during the first quarter of 2019. We believe Lead prices to stay strong over Zinc prices in future.

Zinc Treatment and refining charges has risen towards \$265 per tonne, up from \$20 per tonne in Sept 2018 which indicates the smelter get a higher margin towards refined production indicating the output to keep rising in coming months. On the other hand, Lead refining charges have remained unchanged helping us to forecast that no major production increase is expected in near future. This also points towards rise in zinc production will be higher as compared to lead production.

Treatment and refining charges

Source: Bloomberg, Narnolia Research

LME inventories of both Zinc and Lead are currently near decade low levels. Although, a big inflows in zinc inventories this week have fanned expectation that supply tightness will end soon. LME Zinc inventories jumped to 73,700 tonnes, rising from the record low of 50,000 tonnes in January 2019. LME Zinc stocks have increased by 11 percent since February 2019. While Lead stocks has remained unchanged during the same period.

Source: Bloomberg, Narnolia Research

Zinc mine supply is expected to come online during the second half of 2019 as smelters earn a higher margin and with prices up 20% during the year we believe supply of zinc is expected to increase in the months to come. On the other hand, Lead supply is expected to rise by 4.1% in 2019 however the tightness in availability of lead concentrate may provide constraint to the global lead output.

Spread Call View – Sell Zinc Buy Lead

The spread of Zinc and Lead have tested the record low of -96 and currently the spread is trading at -91. We believe the spread to narrow towards -75 to -70 levels in the months to come.

Various Possible Outcome of Spread Call:

1. Zinc price to fall, Lead price rise
2. Both Lead and zinc prices fall, but zinc to fall more
3. Lead prices unchanged, while zinc prices fall
4. Both Lead and zinc prices rise, but lead outperform
5. Lead rise, while zinc prices unchanged

Conclusion:

“Higher Zinc refining charges, expectation of new zinc mine supply, rising LME Zinc stocks and tighter lead market makes us to come to a conclusion to actively short zinc and buy lead.” Therefore, we expect the ratio Sell Zinc and Buy Lead to become narrow towards -75 to -70. At present the ratio is trading at -92 as on 18th April 2019.

Disclaimer:

This report has been prepared by Narnolia Financial Advisors Ltd. (NFAL) and is meant for sole use by the recipient and not for public circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of NFAL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult his/her/its own advisors to determine the merits and risks of such an investment. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. NFAL will not treat recipients as customers by virtue of their receiving this report. Neither the Company, nor its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits or lost opportunities that may arise from or in connection with the use of the information/report. The person accessing this information specifically agrees to exempt NFAL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold NFAL or any of its affiliates or employees responsible for any such misuse and further agrees to hold NFAL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject NFAL & its group companies to registration or licensing requirements within such jurisdictions.
