Quote of the Day : "Risk comes from not knowing what you are doing."

CEATLTD	NEUTRAL	06-Aug-19
<p>EBITDA margin has improved by 30bps on sequential basis largely on account of reduction in commodity prices. The demand scenario in overall OEM segment continues to be negative while there is growth witnessed in the replacement and export markets. The management expects growth prospects to improve based on new launches and some of the orders pending with passenger car OEMs as the new capacity come in 2HFY20. The margins are expected to range bound at current level as benefit of commodity prices to get marred by weak operating leverage. However higher debt level and depreciation cost will continue to weigh on overall profitability. We largely maintain our FY21 EPS estimates. Factoring the uncertain demand environment we value CEATLTD at 14x FY21e EPS to arrive at a target price of Rs.924 and maintain NEUTRAL.</p>		

LICHSGFIN	BUY	06-Aug-19
<p>Growth picked up in the individual core home loan segment but there was slow down in the non-individual home loan segment as management maintain cautious stance due to the developing stress in the real estate segment. Focus being on affordable housing segment management expects the growth to remain around 15% going ahead. Recent expansion of branches will support the growth. Margin is expected to remain stable with upward bias. Ease of interest rate in the market will reduce the funding cost for LICHSGFIN. However, spread remained competitive. The major concern remained on the asset quality front with spike of slippages in non-individual segment. In rise in stage 2 assets also signaled the pressure on the asset quality. Slow sales in real estate will continue to impact the lenders. With the rise in stress in the system we remain cautious and increase our credit cost estimate for LICHSGFIN and reduce the PAT estimate by 8% in FY20. We value the stock at Rs 589 (1.4x BV FY21e) and maintain BUY.</p>		

IPO - Sterling and Wilson Solar Ltd	SUBSCRIBE	06-Aug-19
<p>The company enjoys benefits of strong promoter with globally renowned brand, deep expertise and strong execution capability. The company has asset-light model with low working capital requirements due to short tenure of EPC contracts. The company is expected to become debt free as it plans to use ipo proceeds to pare the debt in future. The company has shown revenue and profit growth of 44% and 72% in last 4 years. The current PE and EV/EBITDA stands around 20x and 22x for FY19. Considering above factors the investment looks positive for longterm investors and hence we recommend Subscribe rating to issue.</p>		

ASTRAL	ACCUMULATE	05-Aug-19
<p>Astral delivered strong performance in 1QFY20 with 27.2% YoY revenue growth and 19.5% YoY EBITDA growth on the back growth in piping business led by plumbing products, strong pull in agri products and inclusion of Rex Poly as well. Structural changes in distribution system from three tier (stockiest, distributors and dealers) to two tier (distributors and dealers) led to flat YoY growth in Adhesive business. We continue to like Astral on the back of stable and consistent performance in pipe business, strong growth prospects in adhesive business and efforts to increase margins, and judicious capital allocation by way of well thought acquisitions. We maintain our FY20/FY21 estimates and continue to value the stock at Rs.1415 (32x FY21e EV/EBITDA), however recent price correction has increase the upside thus we change our rating to ACCUMULATE (earlier HOLD).</p>		

SBIN	BUY	05-Aug-19
<p>Rising stress in agriculture and SME sector impacted the assets quality of SBIN. Further new stress development in the system poses additional risk for SBI. SMA accounts of around Rs 19000 Cr from the exposure of above Rs 2000 Cr of the banking system is a cause of concern if no resolution plan implemented under ICA. Slower resolution of NCLT accounts remains keeps uncertainty on the recovery of earnings. SBIN is sitting on the gain of Rs 16000 Cr from the 3 NCLT accounts on the advance stage of resolution and uncertainty of timing of resolution poses risk on earnings. Stake sale in two subsidiary will also support the earnings. SBIN has seen the improvement in its core operating performance. SBIN is well placed in the system to capture the growth with the improvement in economy. However with the recent stress from few group and in SME sector poses threat for assets quality and credit cost. We increase our credit cost estimate with the rising stress and reduce our earnings estimate by 12% for FY20. We maintain BUY with the target price of Rs 409 at 1.3x BV FY21e.</p>
