Nifty Intraday Chart

Market Outlook

Yesterday, Nifty opened positive at 10958.10 and made a high of 10975.65. From there it moved towards the low of 10835.90 and closed negative at 10855.50. On sectoral front only IT, PHARMA and MEDIA traded positive, whereas rest of the indices closed with negative bias. India VIX closed positive by 4.73% at 16.88

Fresh sell-off was witnessed in Nifty yesterday and it validates our view that the index has not yet completed its bottom out process. Immediate crucial support of Nifty is at 10800 and a closing below this level is likely to take the index further lower to 10600 in the near future. In short term (10500-10600) zone would act as strong support areas of Nifty. So we should initiate fresh long position either in 10500-10600 zone or only above 200 DMA (currently is at 11160).

Quote of the Day : "Risk comes from not knowing what you are doing."

GSKCONS	NEUTRAL	08-Aug-19
<p>GSKCONS has reported numbers better than our expectation, sales grew by 8% YoY to Rs 1194 cr(vs expec. Rs 1219 cr) while posted strong PAT growth 24% YoY to Rs 248 cr(vs expec. Rs 220 cr). The company's pricing action with forward cover on key inputs helped in gross margin expansion by 38 bps while cost efficiency measures and better allocation has helped in EBITDA margin expansion by 268 bps. Going forward, better traction from new launched products, distribution expansion and lower unit products to drive sales growth. While pricing action taken by the company and cost efficiency measure will help in maintenance of margin. We continue to value the company at 33xof FY20e eps and maintain our previous target price of Rs 7976. As there is very limited upside from here for the company we maintain Neutral rating on it.</p>		

KEC	BUY	08-Aug-19
<p>Strong uptick in execution of Power T&D projects both in Domestic and International market will further enhance the outlook. While, growth trajectory of the Non T&D business will continue to lead by the Railway business. The execution and order book of the civil business is subdued and will be key thing to look out, though the segment contribution is quite small. The overall order inflow is likely to pick up from H2FY20. We largely maintain our estimates for the FY20/21. We continue to value the stock at 15x FY21E EPS and arrived at target price of Rs 418 per share. We maintain our BUY rating on the stock.</p>		

RBI - Monetary Policy	MACRO	08-Aug-19
<p>Monetary Policy Committee in its 3rd bi-monthly policy decided to reduce the repo rate by 35 basis points to 5.40% from 5.75%.As a result of which the reverse repo rate now stands adjusted at 5.15% and Marginal Standing Facility at 5.65% while keeping the stance unchanged at accommodative. The longer term growth projections have been marginally revised downwards for a fourth term in a row. whereas the inflation projection has marginally crept up. A higher than consensus rate cut is a welcome move from the RBI which will help in repairing the credit cycle which is in trouble right now. Acceptance by the RBI of a cooling GDP growth estimates is a sign that the government should look for some fiscal measures along with the monetary measures by the RBI to reinvigorate growth in India.</p>		

IRB	NEUTRAL	07-Aug-19
<p>The deal with the GIC, Singapore comes at very important juncture. The deal will help IRB to deleverage its balance sheet which will result into interest cost saving of Rs 300-350 Cr annually and will have investor for the future projects as well. But the appointment date on the 2 HAM projects are delaying quarter after quarter and will remain overhang on the future revenue performance. Considering the delay in appointment date we have reduce our estimated revenue for FY20/21 by 13/8%. We maintain our target price of Rs 110 (7.5x FY21E EV/EBITDA) and NEUTRAL stance on the stock.</p>		

MINDTREE	UNDER REVIEW	07-Aug-19
<p>Mind tree has always been the one of top contender in mid cap space when it comes to digital business (49.5% of overall revenue). However with recent turmoil in the top management, 1QFY20 resulted in weakest quarter for the company in recent times. Revenue remained muted (growth of 0.8%QoQ) While margin declined by 390bps sharply. Going forwards, Despite healthy deal wins during the quarter , significant attrition at the Top leadership level (three founders and few other KMPs have resigned in last one month) and deteriorating financial performance have raised a concern for sustainable revenue growth for FY20.Although the company has on boarded the new CEO however one has to wait for the strategic roadmap that the new management takes up to improve Mind tree's performance in the coming quarters. Until we see further clarity on these developments, and stability in terms of personnel and attrition, we keep our rating Under Review</p>		

METROPOLIS 1QFY20 Concall Highlights:**Industry Outlook:**

- ❑ The diagnostic industry is expected to grow to USD 12 billion in FY20 from USD 9 billion in FY18. It is one of the better growing segments in the healthcare industry.

ZENSARTECH 1QFY20 concall highlights:

- ❑ Core business: The company had solid growth in core business of 3.9%QoQ and 19.9%YoY in cc terms respectively during the quarter .The core business now contributes 96.1% of the overall revenue.
- ❑ Margin: Excluding the INDAS impact which positively impacted 1.4% to margin, the company saw margin remained flat owing to adverse impact of 30bps from exchange rate realization and 100bps due to reduction in utilization .Also investment in Fresher headcount also impacted the margins .2QFY20 will see wage revision however with the levers like automation and more CIS business comes in, the management believes it has levers to offset the wage impact during the course of the year. Management continues to target to hit the level of 15% of EBITDA margin.
- ❑ Accounting standard change: Due to change in INDAS 116 ,The Company saw interest cost of 600k increase and depreciation increase is roughly around 1.8million dollars
- ❑ PAT de-grew by 8.3%QoQ(absolute term USD1million)was due to reduced other income that came in last quarter on account of sale of Row business and also marginal INDAS116 impact which was partially offset by increase in exchange gain.
- ❑ Digital business: In 1QFY20 company digital revenue accounted for 48.5% of the overall business, a growth of 6.7% sequentially and 28.3%YoY in dollar terms. Zensar rod next and solutions continue to be integral part of all the large deal wins so far.
- ❑ Deal wins: the company remains optimistic with large deal momentum in FY20 by winning key deals across region from existing and new client .This Quarter Company booked deal worth of USD160mn (60% is net new TCV)majorly coming from key renewals.TTM total booking was at USD700+ million. Overall pipeline continues to remain solid and is above USD1.1billion as of date. The split between application business and cloud Infrastructure business is roughly about 60%/40% of the wins.
- ❑ Segment wise: In IMS, The Company is seeing strong traction in CIS next gen services. On application side as called out in previous quarter, mostly the company focus has been towards digital enterprise that is where the company is seeing traction in financial services and technology verticals. Retail has been soft sector (legacy application business) for the company, the management still thinks there will some headwinds left and more work has to be done. Thus expect pain to continue for few quarters .
- ❑ Non core business: The company is focusing on uplifting both the revenue and margin So as it improves, the company will relook for exit process.
- ❑ Patents: The company sustains focus has helped to double the tag of patents granted from the last quarter. While the company continues to file more patents particularly in the areas like AI and automation .Total patent filing now stands at 91 out of which 10 has been granted.

- ❑ Demand environment: Management sees demand environment healthy however there is noticeable trend of reducing deal sizes tenures which company believe will better for the company. The company will continue to remain invested to continue the growth. Trade war if happens possibility will impact tech investment however does not see any impact as of now.

M&M 1QFY20 Concall Highlights:-

- ❑ The domestic tractor industry is expected to grow by 6-8% in remaining 8 months from September 2019 to April 2020 led by normal monsoons, higher Rabi sowing, base effect, pre-buy and upcoming festive season.
- ❑ PV demand continues to be impacted by the slowing down of the overall economy along with tight credit conditions and delayed monsoon which has impacted consumer sentiment in both urban and rural India.
- ❑ Increasing road tax and higher registration rates may further impact the demand going forward.
- ❑ The stress in the agri sector and finance availability has impacted the demand for LCV 2-3.5T and HCV segment.
- ❑ The slowing down of economic activity coupled with the increase in freight capacity of existing fleet due to implementation of new axle loading norms has resulted in many transporters either reducing or temporarily suspending their fleet purchase plans for CVs.
- ❑ Tractor demand in Q1FY20 remained sluggish and was adversely impacted due to a weak sentiment in the agri economy resulting from the delay in SW monsoon, poor spatial distribution in June and weak agricultural incomes impacted by poor price realization.
- ❑ The company is focusing on the exports market going ahead.
- ❑ Ssangyong business – This business has been impacted due to slowdown in Korea as well as other international markets.
- ❑ The loss from Mahindra USA business which is for tractors is expected to reduce by 50% in FY20.
