

## Trading Calls

### GAIL BUY 10th July 2019

Weekly chart of GAIL reveals that demand is increasing and supply is diminishing. Channel support line from lower levels is displaying trend reversal and creates buying opportunity at current juncture. As of now, stock is taking support from its ascending triangle resistance line on monthly chart which augur well for the Bulls and indicate surge on upside. Apart from this, rising Histogram in MACD daily signals optimism, which further suggest upside move in the counter in coming sessions. BUY GAIL AROUND 140-145, ON DIP 120-125 SL 110(CLOSING BASIS), TARGET 180-200

### RECL BUY 25th June 2019

Scrip is moving in a well defined ascending channel with multiple touch point and appears to be having a strong support around 138- 142 levels as it bounced back couple of time from the demand line. It also maintained its uptrend on the long term chart and is trading well above its short and long term moving averages(20/ 50 /200 DMA). The momentum oscillator, RSI is also favors the price pattern. One can accumulate the stock around 155 and lower around 138-142 zone for an upside target of 220/260 and a stop loss should maintain 125 closing basis.

Market	Value	% Change
SGX Nifty (at 8.00 am IST)	11005.00	-0.21%

### Nifty Key Levels

Support	S1: 10970	S2 : 10900
Resistance	R1 : 11045	R2 : 11080

### Market Outlook

In line with our projection, Nifty achieved our second target of 10995 which we had derived after finding Bearish gartley pattern in the 15 min chart of index and seen a pullback but this pullback is not looking reliable. Chart pattern suggests that if Nifty crosses and sustains above 11045, it would witness buying which would lead the index towards 11080-11110. However, if the index breaks below 10970 level it would witness selling which would take the index towards 10900 levels. Nifty is trading below 20, 50,100 and 200-days SMA which are key short term moving averages, indicating a negative bias in the short to medium term.

## STDC / R25 Open Calls for 21-08-2019 (2)

### STDC (2)

No	Date	Type	Buy/Sell	Stock	Entry1	Entry2	SL	Tgt 1	Tgt 2
1	10-Jul-19	STDC	BUY	GAIL	142.5	122.5	110	180	200
2	25-Jun-19	STDC	BUY	RECLTD	158	140	125	220	260

### VIEW

Due to curtailed week, we did not see much movement in the indices but they were able to hold their key supports firmly which gives insight of positive biasness. Bulls got sigh of relief after 1000 points of downswing when Govt indicated to take some revival steps for the economy. This past week domestic market is haunted by fears of global recession due to US inverted yield curve which is seen in the 10 year and 2 year treasury bonds. Any negative news can hurt our market sentiment but the chances of that are very low currently as our domestic market are gradually becoming resilient as it has digested all negative news in its adversaries.

### Technical Outlook-

- a) Formation of multiple doji near the key support at the base of Inverted Flag pattern suggest positive bias as decline has bought and Nifty has seen smart pullback on upside
- b) Nifty is gradually moving towards our first target of Cypher pattern which we mentioned in our previous report
- c) As of now, follow thru buying is needed **above 200 DMA** which comes in the zone of **11160-11170**, then after we may witness a further rally towards 11285 (38.2% Retracement) and 11595 (61.8% Retracement) which is our first and second target of our Bullish Cypher pattern
- d) On the flip side, **bearish flag breakdown** is expected below 10900 levels from where it can slip down till 10800- 10780 levels on down side

### CHART ANALYSIS

### SUPPORT & RESISTANCE LEVELS

	NIFTY LEVEL	JUSTIFICATION
Resistance 2	11285	38.2 % Retracement
Resistance 1	11165	200 DMA
Close	11047	
Support 1	10900	Base of bearish Flag Pattern
Support 2	10780	Previous swing low

VIEW

After opening with a red session, Banknifty fell to make a weekly low of 27683.50 on the first day of the last week. However it was unable to maintain at the lower level and some recovery was witnessed in next couple of trading days. At the end of the week Banknifty closed at 28217. It had a net loss of 0.85% over its previous week's close.

**OBSERVATIONS:**

- 1) Banknifty is trading below 200 DMA.
- 2) Banknifty is approaching near its trendline support areas (shown by the upward sloping line on the monthly chart).

According to the above observations it can be concluded that the immediate trend of the Banknifty is looking weak as the index is trading below 200 DMA. However it is currently consolidating near its multi year trend line support areas (26400-26800 zone). So the major downside is very unlikely in the index. On the higher side 28995 would act as short term strong resistance of the index and a successive move above 28995 would indicate the reversal of current downtrend and in that case Banknifty will go higher to 30500 and then 31400 in the short term. Therefore we recommend initiating fresh long position in Banknifty either in (26400-26800 zone) or only above 28995.

CHART ANALYSIS

SUPPORT & RESISTANCE LEVELS

RESISTANCE/SUPPORT	BANKNIFTY LEVEL
Resistance 2	28995
Resistance 1	28860
Close	28217
Support 1	28069
Support 2	27380

### VIEW

In line with our analysis of previous week, USDINR pair is looking firm and Rupee was traded under pressure on stable dollar and lower risk appetite. Rapid escalating US CHINA trade tariff will continue to roil Rupee. Trade war between US & China has sent the riskier assets on a downward spiral, with investors taking shelter of the safe haven assets . Volatility in forex market will continue until the US-CHINA trade war will cool off.

#### TECHNICAL FACTORS-

- a) Formation of shooting star near 61.8 % fibonacci retracement on weekly chart suggest halt in the upside momentum of pair
- b) But indicators and oscillators are looking remain firm on upside which can give support in coming sessions
- c) To carry forward this upside momentum, pair has to cross and sustain above 71.80-72.10 zone from where it can inch forward toward 72.60 and 73
- d) However, A break below 70.84 can push lower towards 70.10 and 69.70 mark on downside

### Technical Chart

STDC : BUY RECL AROUND 161-155 AND 138-142 SL 125 TARGET 220/ 260

Scrip is moving in a well defined ascending channel with multiple touch point and appears to be having a strong support around 138- 142 levels as it bounced back couple of time from the demand line. It also maintained its uptrend on the long term chart and is trading well above its short and long term moving averages(20/ 50 /200 DMA). The momentum oscillator, RSI is also favors the price pattern. One can accumulate the stock around 155 and lower around 138-142 zone for an upside target of 220/260 and a stop loss should maintain 125 closing basis.

Last week, base metal prices were hit badly after US President Trump announced to impose additional tariffs on further \$300bn of Chinese imports stating that the 10% tariffs, due to take effect on 1 September which means it will tax all the Chinese imports. This states the trade war has reached on another level slowly damaging the health of the economy and thereby reducing the demand for industrial commodity.

Lead prices started to rise towards \$2100/tonne in June 2019 on the back of supply disruption and environmental crackdowns on smelters in China with additional support coming due to falling inventories. However, looking at the current scenario we believe this upside in prices is unlikely to sustain.

Looking at the demand supply scenario, global lead market shifted to surplus of 13,000 tonnes in May 2019 after showing a deficit of 31,000 tonnes in the month of April 2019. In the coming months, we believe this surplus will expand on account of fall in demand from the auto sector and lower manufacturing activity weakening demand for the metal worldwide.

### Demand-Supply Scenario:

According to the ILZSG, the Group anticipates that global lead supply will exceed demand by 71,000 tonnes in 2019. The production is mainly anticipated to expand in China and Australia in 2019. China's lead production expanded 16.6 percent to 2.87 million tonnes in the first six months of 2019 according to the National Development and Reform Commission (NDRC).

	2016	2017	2018	2019*
Mine Production*	4689	4713	4671	4750
World Refined Production	11169	11589	11642	11940
World Refined Consumption	11141	11740	11721	11870
Surplus/Deficit	28	-151	-79	70
<i>Source: ILZSG, Narnolia Research</i>				<i>(Figs in tonnes)</i>

**Current Scenario:** Three days ago, Nyrstar announced that it has restarted the blast furnace at its Port-Pirie lead smelter in Australia after two months shutdown due to an unplanned outage in late May resulting into a production loss of around 30,000 tonnes. On the London Metal Exchange, the benchmark spread i.e. the difference between the cash price and that for three-month delivery remains at discount of \$13 per tonne. This shifted the current premium of Lead into discount.

**Inventory:** The rising LME inventory is a cause for concern for the traders. LME warehouses saw an inflow of 27,625 tonnes of lead in a span of one week, taking total LME lead stocks to a one-month high of 85,375 tonnes, although total LME Lead inventories are still down significantly from the 107,000 tonnes held at the start of the year.

**Conclusion:** The restart of lead plant, rising inventories and increasing production together are pushing the LME forward contract into contango pointing us towards slowing demand for the metal in the coming months. Also the global economy is expected to remain subdued due to rising trade worries between US and China. If the China retaliates with more tariffs on United States we believe LME Lead prices will fall towards \$1770 per tonne in the coming three month time frame. Therefore, one can follow sell on rise strategy in LME Lead at \$2040/tonne.
