

VIEW

Rupee had plunged to an over eight month low of 71.81 on thursday amid falling equities and incessant foreign fund outflows. Local unit faced selling pressure in the past week and depreciated against the dollar for the last seven consecutive weeks. We expect halt in the upside of USDINR pair due to easing crude oil prices and surge in the equity market.

TECHNICAL FACTORS-

- a) Formation of Bearish engulfing near 61.8 % fibonacci retracement on weekly chart suggest halt in the upside momentum of pair
- b) RSI started tilting from an overbought zone and negative crossover in MACD implying strength in the coming sessions
- c) To carry forward this upside momentum, pair has to cross and sustain above 72.10 mark from where it can inch forward toward 72.60 and 73
- d) On crossing below 71.30 mark, it can extend down till 70.84 and 70.40
