

Trading Calls

SUNPHARMA BUY 30th August 2019

The stock has given a bullish breakout above 200 DMA. A positive divergence was also formed in Stochastic on daily chart. Therefore some upward rally is expected in the stock in short term.

RELIANCE BUY 23rd August 2019

On daily scale RELIANCE has formed a DB around 1095 and after forming DB it has moved in impulse towards 1304.45, now it is trading in wave 2 and retraced 37.5% of just preceding impulse (wave1) and yesterday it has opened the door for wave 3. In case of normal wave 2 formation we advise to buy in the range of 1255 to 1235 and if it enters in complex wave 2 then we further recommend to accumulate in the range of 1173-1147. Here wave1 is strong so wave 2 never be complex in normal case as it has already given indication of less than 50% retracement. Hence we recommend buy for the price target of 1333 and 1375 with 1072 (on closing basis) as stop loss.

GAIL BUY 10th July 2019

Weekly chart of GAIL reveals that demand is increasing and supply is diminishing. Channel support line from lower levels is displaying trend reversal and creates buying opportunity at current juncture. As of now, stock is taking support from its ascending triangle resistance line on monthly chart which augur well for the Bulls and indicate surge on upside. Apart from this, rising Histogram in MACD daily signals optimism, which further suggest upside move in the counter in coming sessions. BUY GAIL AROUND 140-145, ON DIP 120-125 SL 110(CLOSING BASIS), TARGET 180-200

RECL BUY 25th June 2019

Scrip is moving in a well defined ascending channel with multiple touch point and appears to be having a strong support around 138- 142 levels as it bounced back couple of time from the demand line. It also maintained its uptrend on the long term chart and is trading well above its short and long term moving averages(20/ 50 /200 DMA). The momentum oscillator, RSI is also favors the price pattern. One can accumulate the stock around 155 and lower around 138-142 zone for an upside target of 220/260 and a stop loss should maintain 125 closing basis.

FII DERIVATIVES POSITION FOR 04-September-2019

	Net (Amt. in crs)
INDEX FUTURES	1,039
INDEX OPTIONS	(1,141)
STOCK FUTURES	76
STOCK OPTIONS	27

Market	Value	% Change
SGX Nifty (at 8.00 am IST)	10885.50	0.26%

Nifty Key Levels

Support	S1: 10750	S2 : 10635
Resistance	R1 : 10860	R2 : 10965

Market Outlook

Despite drifting lower from previous session, Nifty bounced back from the key support of 10750 level in the last hour of trade and closed with small green candle in minor gain. Key level of 10750 is likely to act as a 'MAKE OR BREAK' zone for nifty and it can rebound as it has done in the past. On sustaining above 10860 level, an immediate resistance, it can extend up till 10965 & 11040 levels. Above this further upside can be seen. However, On sustaining below 10750 level, it can extend weakness till 10635 level.

VIEW

The pall of gloom over the market is likely to be lifted following the slew of announcement by the FM and RBI's hefty dividend. Despite of these stimulus, concern over worry of global economic slow down and trade war is still haunting to our domestic market. Indices started the week on strong foot but after two days witnessed fresh spell of selling pressure as weak global sentiment kept investors away from riskier asset. Volatility indicate caution among market participants and it's not going to be subsidized soon. Weak forecast of GDP data, deepening inversion of the US bond yield which suggest recession in US adding salt to an injury to the fragile condition of global trade war. Due to truncated week, we expect rangebound move will continue in the coming sessions also.

Technical Outlook-

- Price consolidation seems to be formed **Inverted head and shoulder** where construction of right hand shoulder is going on daily chart.
- If Nifty will stabilise above **10780-10800** level and recoil without price damage then probability of forming this H&S increases.
- We can expect the breakout above **11145 (neckline of H&S)** and **11210 near 200 DMA's**, conquering these levels will be the bigger achievement for Bulls.
- Unless these levels break decisively, prices will be vulnerable to selling pressure towards 10870 and 10780 levels on downside

CHART ANALYSIS

Support 2	10780	Previous swing low

VIEW

Inline with our expectation, a sharp pullback rally was witnessed in Banknifty and the index has met our target of nearly 1300 points last week. At the end of the week Banknifty closed with a net gain of 2% over its previous week's close. ICICI Bank and HDFC Bank were the main catalysts to lift the index higher.

OBSERVATIONS:

- 1) Positive divergence in RSI still exists on the daily chart of Banknifty.
- 2) Banknifty is trading in 26400-28605 channel since last one month.

By analyzing the daily chart of Banknifty, it can be concluded that the index is currently fluctuating in 26400-28605 channel and it will play a very significant role for deciding the short term trend of Banknifty. Here 26400 is the multi-year support line where as 28605 is the previous higher point. A breach of 26400 (lower band of the channel) would lead to a much more downside in the short term while a successive move beyond 28605 (upper band of the channel) would indicate the reversal of current downtrend and in that case the index may restore near its life time higher level. At this juncture, the probability of breaching upper band of the channel is high due to the existence of positive divergence in RSI.

CHART ANALYSIS

SUPPORT & RESISTANCE LEVELS

BANKNIFTY LEVEL

Resistance 2	28605.00
Resistance 1	28280.00
Close	27427.45
Support 1	26560.00
Support 2	26400.00

VIEW

In line with projection of previous analysis, Pair has been facing resistance from the mentioned retracement zone but soon it has to face the global headwinds. Domestic rupee will continue to be remain on edge as market participants awaits for the next steps in the US Sino trade negotiations. Escalating trade tension has dampened the global sentiment and given rise to concern over global economic outlook. Rising crude oil prices due to tightening inventories is another worrisome factor for rupee. Higher volatility will be capped by RBI intervention as the central bank has been protecting 72 levels in spot.

TECHNICAL FACTORS-

- a) From last three weeks, USDINR pair has been facing resistance near 61.8 % fibonacci retracement on weekly chart suggest halt in the upside momentum of pair
- b) But indicators and oscillators are looking strong on upside which can give support in coming sessions
- c) To carry forward this upside momentum, pair has to cross and sustain above 72.25 levels from where it can inch forward toward 72.60 and 73
- d) However, A break below 70.84 can push lower towards 70.10 and 69.70 mark on downside

Stop Loss	125
Target Price1	220
Target Price2	260
Upside in Tgt1	25%-34%
Upside in Tgt2	25%-47%

Technical Chart

STDC : BUY RECL AROUND 161-155 AND 138-142 SL 125 TARGET 220/ 260

Scrip is moving in a well defined ascending channel with multiple touch point and appears to be having a strong support around 138- 142 levels as it bounced back couple of time from the demand line. It also maintained its uptrend on the long term chart and is trading well above its short and long term moving averages(20/ 50 /200 DMA). The momentum oscillator, RSI is also favors the price pattern. One can accumulate the stock around 155 and lower around 138-142 zone for an upside target of 220/260 and a stop loss should maintain 125 closing basis.

Last week, base metal prices were hit badly after US President Trump announced to impose additional tariffs on further \$300bn of Chinese imports stating that the 10% tariffs, due to take effect on 1 September which means it will tax all the Chinese imports. This states the trade war has reached on another level slowly damaging the health of the economy and thereby reducing the demand for industrial commodity.

Lead prices started to rise towards \$2100/tonne in June 2019 on the back of supply disruption and environmental crackdowns on smelters in China with additional support coming due to falling inventories. However, looking at the current scenario we believe this upside in prices is unlikely to sustain.

Looking at the demand supply scenario, global lead market shifted to surplus of 13,000 tonnes in May 2019 after showing a deficit of 31,000 tonnes in the month of April 2019. In the coming months, we believe this surplus will expand on account of fall in demand from the auto sector and lower manufacturing activity weakening demand for the metal worldwide.

Demand-Supply Scenario:

According to the ILZSG, the Group anticipates that global lead supply will exceed demand by 71,000 tonnes in 2019. The production is mainly anticipated to expand in China and Australia in 2019. China's lead production expanded 16.6 percent to 2.87 million tonnes in the first six months of 2019 according to the National Development and Reform Commission (NDRC).

	2016	2017	2018	2019*
Mine Production*	4689	4713	4671	4750
World Refined Production	11169	11589	11642	11940
World Refined Consumption	11141	11740	11721	11870
Surplus/Deficit	28	-151	-79	70
<i>Source: ILZSG, Narnolia Research</i>				(Figs in tonnes)

Current Scenario: Three days ago, Nyrstar announced that it has restarted the blast furnace at its Port-Pirie lead smelter in Australia after two months shutdown due to an unplanned outage in late May resulting into a production loss of around 30,000 tonnes. On the London Metal Exchange, the benchmark spread i.e. the difference between the cash price and that for three-month delivery remains at discount of \$13 per tonne. This shifted the current premium of Lead into discount.

Inventory: The rising LME inventory is a cause for concern for the traders. LME warehouses saw an inflow of 27,625 tonnes of lead in a span of one week, taking total LME lead stocks to a one-month high of 85,375 tonnes, although total LME Lead inventories are still down significantly from the 107,000 tonnes held at the start of the year.

Conclusion: The restart of lead plant, rising inventories and increasing production together are pushing the LME forward contract into contango pointing us towards slowing demand for the metal in the coming months. Also the global economy is expected to remain subdued due to rising trade worries between US and China. If the China retaliates with more tariffs on United States we believe LME Lead prices will fall towards \$1770 per tonne in the coming three month time frame. Therefore, one can follow sell on rise strategy in LME Lead at \$2040/tonne.

This report has been prepared by Narnolia Financial Advisors Ltd. (NFAL) and is meant for sole use by the recipient and not for public circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of NFAL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult his/her/its own advisors to determine the merits and risks of such an investment. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. NFAL will not treat recipients as customers by virtue of their receiving this report. Neither the Company, nor its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits or lost opportunities that may arise from or in connection with the use of the information/report. The person accessing this information specifically agrees to exempt NFAL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold NFAL or any of its affiliates or employees responsible for any such misuse and further agrees to hold NFAL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject NFAL & its group companies to registration or licensing requirements within such jurisdictions.
