

Trading Calls

SUNPHARMA BUY 30th August 2019

The stock has given a bullish breakout above 200 DMA. A positive divergence was also formed in Stochastic on daily chart. Therefore some upward rally is expected in the stock in short term.

RELIANCE BUY 23rd August 2019

On daily scale RELIANCE has formed a DB around 1095 and after forming DB it has moved in impulse towards 1304.45, now it is trading in wave 2 and retraced 37.5% of just preceding impulse (wave1) and yesterday it has opened the door for wave 3. In case of normal wave 2 formation we advise to buy in the range of 1255 to 1235 and if it enters in complex wave 2 then we further recommend to accumulate in the range of 1173-1147. Here wave1 is strong so wave 2 never be complex in normal case as it has already given indication of less than 50% retracement. Hence we recommend buy for the price target of 1333 and 1375 with 1072 (on closing basis) as stop loss.

GAIL BUY 10th July 2019

Weekly chart of GAIL reveals that demand is increasing and supply is diminishing. Channel support line from lower levels is displaying trend reversal and creates buying opportunity at current juncture. As of now, stock is taking support from its ascending triangle resistance line on monthly chart which augur well for the Bulls and indicate surge on upside. Apart from this, rising Histogram in MACD daily signals optimism, which further suggest upside move in the counter in coming sessions. BUY GAIL AROUND 140-145, ON DIP 120-125 SL 110(CLOSING BASIS), TARGET 180-200

RECL BUY 25th June 2019

Scrip is moving in a well defined ascending channel with multiple touch point and appears to be having a strong support around 138- 142 levels as it bounced back couple of time from the demand line. It also maintained its uptrend on the long term chart and is trading well above its short and long term moving averages(20/ 50 /200 DMA). The momentum oscillator, RSI is also favors the price pattern. One can accumulate the stock around 155 and lower around 138-142 zone for an upside target of 220/260 and a stop loss should maintain 125 closing basis.

VIEW

After going to & fro between gains and losses, domestic market tried to find out direction in northward side amid hopes of another rate cut by RBI along with the de escalation of trade war between US - China which lent further support. Softening crude oil prices was another factor which propped positive sentiment among market sentiment. Indian market also joined the global market which is trading near their six week high on the back of positive global cues. As long as indices hold their previous swing low, bias will remain positive.

Technical Outlook-

- Nifty recouped its early losses and closed above 11k
- Formation of **Inverted head and shoulder** is still running and as long as index sustain above 10780 level, this formation will remain intact
- Emergence of **long bull candle** on weekly chart suggest bullish bias in coming week
- Index can retest the neckline of 11150- **11200 (200 DMA's)** zone where it can face resistance
- Fresh buying is only expected above 11150- 11200 zone (200 DMA's) till then nifty will consolidate further. While crossing above the same, it can extend gain up to 11310 level.
- While support is shifted higher towards 10885 followed by 10780 levels.

CHART ANALYSIS

SUPPORT & RESISTANCE LEVELS

	NIFTY LEVEL	JUSTIFICATION
Resistance 2	11200	Near 200 DMA
Resistance 1	11150	Neckline of H&S
Close	11080	
Support 1	10885	Low of long Bull candle
Support 2	10780	Low of Left Shoulder of H&S

VIEW

In line with our expectation Banknifty continued its upward rally throughout last week and closed the week with a net gain of 3% over its previous week's close. The buying was witnessed across the board. However State Bank of India, ICICI Bank and Indusind Bank were on the buyers' radar.

OBSERVATIONS:

- 1) Banknifty gave a bullish breakout of 'Symmetrical Triangle' pattern on daily chart.
- 2) Banknifty has rebound from its multi-year support zone of (26500-26389).

According to the above observations it can be concluded that the near term trend of Banknifty is looking positive. The index has given a bullish breakout of 'Symmetrical Triangle' pattern last week and the pattern target of the index is 29600. On the upward path Banknifty may find some resistances at 28605 and then 28980. Therefore we recommend holding / initiating long positions by placing stop loss at 27380 (closing basis)

CHART ANALYSIS

SUPPORT & RESISTANCE LEVELS

RESISTANCE/SUPPORT	BANKNIFTY LEVEL
Resistance 2	28605
Resistance 1	28315
Close	28099
Support 1	27551
Support 2	27380

VIEW

Easing trade tension between US & China and stimulus package announced by ECB had given some relief to Rupee due to this pair faced stiff resistance from its previous swing high which helped Rupee to gain 80 paise during the week. Further gain in Rupee going ahead are expected to be limited as the news came on Saturday that Houthi rebels in Yemen deployed 10 armed drones which hit two large Saudi Aramco oil facilities causing massive fires which resulted in production suspension of 5.7 million barrels of crude oil per day. This escalated tensions could continue to induce high volatility among the currencies of emerging nation from which even Rupee can not escape.

TECHNICAL FACTORS-

- a) Emergence of bearish candles near 61.8% of Fibonacci retracement from the low of 63.25 to the high of 74.49 mark suggest negative sentiment for pairs
- b) But Gap up opening is expected on the back of global news.
- c) However, pair is going to face stiff resistance near 72.45-72.60 zone while sustainability above the same can weaken the rupee till 73 mark
- d) A decisive break below 70.84 can push down towards 70.10 and 69.70 mark on downside

Stop Loss	125
Target Price1	220
Target Price2	260
Upside in Tgt1	25%-34%
Upside in Tgt2	25%-47%

Technical Chart

STDC : BUY RECL AROUND 161-155 AND 138-142 SL 125 TARGET 220/ 260

Scrip is moving in a well defined ascending channel with multiple touch point and appears to be having a strong support around 138- 142 levels as it bounced back couple of time from the demand line. It also maintained its uptrend on the long term chart and is trading well above its short and long term moving averages(20/ 50 /200 DMA). The momentum oscillator, RSI is also favors the price pattern. One can accumulate the stock around 155 and lower around 138-142 zone for an upside target of 220/260 and a stop loss should maintain 125 closing basis.

Last week, base metal prices were hit badly after US President Trump announced to impose additional tariffs on further \$300bn of Chinese imports stating that the 10% tariffs, due to take effect on 1 September which means it will tax all the Chinese imports. This states the trade war has reached on another level slowly damaging the health of the economy and thereby reducing the demand for industrial commodity.

Lead prices started to rise towards \$2100/tonne in June 2019 on the back of supply disruption and environmental crackdowns on smelters in China with additional support coming due to falling inventories. However, looking at the current scenario we believe this upside in prices is unlikely to sustain.

Looking at the demand supply scenario, global lead market shifted to surplus of 13,000 tonnes in May 2019 after showing a deficit of 31,000 tonnes in the month of April 2019. In the coming months, we believe this surplus will expand on account of fall in demand from the auto sector and lower manufacturing activity weakening demand for the metal worldwide.

Demand-Supply Scenario:

According to the ILZSG, the Group anticipates that global lead supply will exceed demand by 71,000 tonnes in 2019. The production is mainly anticipated to expand in China and Australia in 2019. China's lead production expanded 16.6 percent to 2.87 million tonnes in the first six months of 2019 according to the National Development and Reform Commission (NDRC).

	2016	2017	2018	2019*
Mine Production*	4689	4713	4671	4750
World Refined Production	11169	11589	11642	11940
World Refined Consumption	11141	11740	11721	11870
Surplus/Deficit	28	-151	-79	70
<i>Source: ILZSG, Narnolia Research</i>				(Figs in tonnes)

Current Scenario: Three days ago, Nyrstar announced that it has restarted the blast furnace at its Port-Pirie lead smelter in Australia after two months shutdown due to an unplanned outage in late May resulting into a production loss of around 30,000 tonnes. On the London Metal Exchange, the benchmark spread i.e. the difference between the cash price and that for three-month delivery remains at discount of \$13 per tonne. This shifted the current premium of Lead into discount.

Inventory: The rising LME inventory is a cause for concern for the traders. LME warehouses saw an inflow of 27,625 tonnes of lead in a span of one week, taking total LME lead stocks to a one-month high of 85,375 tonnes, although total LME Lead inventories are still down significantly from the 107,000 tonnes held at the start of the year.

Conclusion: The restart of lead plant, rising inventories and increasing production together are pushing the LME forward contract into contango pointing us towards slowing demand for the metal in the coming months. Also the global economy is expected to remain subdued due to rising trade worries between US and China. If the China retaliates with more tariffs on United States we believe LME Lead prices will fall towards \$1770 per tonne in the coming three month time frame. Therefore, one can follow sell on rise strategy in LME Lead at \$2040/tonne.

All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult his/her/its own advisors to determine the merits and risks of such an investment. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. NFAL will not treat recipients as customers by virtue of their receiving this report. Neither the Company, nor its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits or lost opportunities that may arise from or in connection with the use of the information/report. The person accessing this information specifically agrees to exempt NFAL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold NFAL or any of its affiliates or employees responsible for any such misuse and further agrees to hold NFAL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject NFAL & its group companies to registration or licensing requirements within such jurisdictions.
