Quote of the Day : "One of the funny things about the stock market is that every time one person buys, another sells, and both think they are astute."

ICICIBANK

BUY

29-Oct-19

ICICI Bank reported a strong set all round performance despite concerns on the slowdown and pressure on the economy. Retail domestic growth along with margin and assets quality continued to perform well. BB & Below book and higher exposure towards telecom sector poses near term risk. Strong specific PCR at 76% is one of the highest in the industry and it provide cushion against the any uncertainty. Focus on high yield retail assets will continue to provide upward bias on the margin. Recovery from IBC cases will keep credit cost under control. We Upgrade the target price to Rs 522 at 2.5x BV FY21e and maintain BUY.

MINDTREE

NEUTRAL

29-Oct-19

After a new leadership on board, Mindtree managed to report a moderate growth in 2QFY20 result. Revenue grew 3.3%QoQ mainly owing to recovery in top client while margin were bit lower than expected. Renewal deal saw a dip in the quarter (16.2% YoY) as it could be due to the delay in decision making by the customers While new order posted a robust growth by increasing 1.6x in 2QFY20. Going ahead, healthy deal pipeline from the new business and continued growth in digital gives revenue visibility in near terms while higher attrition (16.5% in 2QFY20) will put execution risk in FY20. Post result, factoring in execution risk and slow renewal, we have reduced our margins by 0.9%/0.5% for FY20/FY21E. Thus we maintain our Neutral stance on the stock with the target price of Rs709.

SHRIRAMCIT

NEUTRAL

29-Oct-19

The loan growth remains affected on the back of lower liquidity availability. SHRIRAMCIT has been able to raise Rs 2200 Cr in this quarter but the priority was mainly to repayment of the liabilities then growth. Management has priorities two wheeler, personal loan then SME business for liquidity allocation But on the back of demand side issue in the two wheeler we remain cautious on the growth front. Margin remains compressed on the back of slower growth and higher cost of fund. Management stated it will decline the share of short term funds and convert the entire long term borrowings into short term which will come with an additional cost along with it rising share of retail NCD will led to rise in couple of bps to the cost. Though management has been able to improve asset quality, we remain cautious on the growth prospect value the stock at 1.1x PB for FY21e to Rs 1410. We maintain NEUTRAL.

SRTRANSFIN

ACCUMULATE

26-Oct-19

Relaxation of axle norms, slowdown in the infrastructure and mining activities, delayed monsoon, lower economic activities and flooding situation in the country had resulted in the slowdown in the commercial vehicle segment in 1HFY20 but management has guided 2HFY20 growth run rate to be around 9-12% with good rabi crop harvest and kick start of infrastructure and mining activities. Management remains optimistic about asset quality recovery in 2HFY20, GNPA is expected to improve by 30-40 bps. 94% of incremental disbursement is towards used vehicles segment, which is expected to provide adequate cushioning to the margin pressure in the high-cost liquidity availability. We remain slightly cautious on the back of CV slowdown and downgrade the stock to ACCUMULATE. We value the stock at 1.3x FY21E at Rs 1254.

MARICO

HOLD

26-Oct-19

The company had a challenging quarter for domestic business, impacted by low consumption environment. Low input prices led to strong gross margin expansion, expected to have better margins in the near term also. The Company will continue to ride over innovation strategy to expand foods division. Going forward, company's distribution expansion and rejig distribution channel with improvement in demand scenario on the back of government initiatives will drive the growth. While considering rural slowdown and time lag in stabilization of distribution channels, we reduced sales and PAT estimates for FY20/FY21 4%/3% and 1%/4% respectively and reduced our target price from 445 to 431 with HOLD rating.

### Top Picks for 2019-2020

#### NICKEL

Nickel prices has risen by more than 60% on worries over supply tightness after the Indonesia announced an export ban on nickel ore from Jan 2020, two years earlier than expected. Moving into next year, Nickel prices may remain supported at Rs 1100 levels and trade higher towards 1400 levels in 2020.

#### GOLD

MCX Gold prices have witnessed a surge of 21% since last Diwali on account of 15-month long trade tension leads to soft economic growth, monetary easing by the central banks, increasing investment demand from ETF and Central banks buying and Brexit uncertainty. Investors started to lock in gains starting June and in the span of four months gold prices rocketed 15% and made a high \$1566/oz.

U.S. Fed policy makers will review their stance at a meeting on Oct. 29-30 amid speculation that they are set to deliver a third consecutive interest rate cut. Currently even negative interest rates and easing monetary policy is unable to spur the economic activity to balance the Debt to GDP ratio. During the short term, Gold prices may face headwind due to trade optimism and higher bond yields however, for the long term, one must mandatorily add gold in their portfolio due to uncertainty over global economic outlook. We expect Comex Gold prices to test \$1,650 in the coming year 2020.

## CRUDEOIL

Crude oil prices are mainly supported by the efforts of OPEC members, same way as it helped falling oil prices in 2016 by introducing production cuts. Crude oil prices managed to rise 21% YTD despite record production from US and persistent demand worries.

OPEC+ nations have planned to discuss on reducing further production in the 5<sup>th</sup> Dec 2019 policy. This meeting will be deciding factor for the future direction of oil prices.

## Concall Highlights Q2FY20

### HINDZINC 2QFY20 Concall Highlights:

- ❑ India's first dry tailing plant at Zawar got commissioned, which will reduce land and water consumption as well as improve structural stability of the tailing dams. This plant will recycle more than 90% of the process water, leading to conservation of around 2,500 meter cube of water per day. Moreover, management planned to have similar plant at all mining locations going ahead.
- ❑ The Chinese authorities have moved to bolster spending on infrastructure in order to mitigate the impact of its dispute with the US Zinc as consumption growth is healthy in China, at 1.5% this year. The mine production forecast for FY20 and FY21 have been paired down by almost 1 MT due to lower than expected production at several mine across the globe.
- ❑ No smelting addition is in pipeline for the next 2 years, over there are temporary disruptions and closures in China, Canada, Africa and US in equivalent to 200KTBA refinement of production. Revenue expected to be around 700 KT for FY19. The global metal market, therefore continues to be in deficit and management expects the short form to remain next year as well, it will take much longer for stocks to reach normal levels.
- ❑ Management expects to achieve 1.2 MTPA mined metal capacity in 2HFY20 based on mining projects approaching completion. SK mine commissioned this year.
- ❑ The revised guidance for both mined and refined metal projection in FY20 is expected to be around 950 KT, while silver production is expected to be around 650 tonnes.
- ❑ Management expects Zinc cost of production in 2HFY20 to be a bit about \$1,030 per tonne including the impact of higher electricity duty.
- ❑ Lead production was low due to annual maintenance shutdown in July, and also some unanticipated issues at ESC lead smelter during the month of September.
- ❑ Investment income increase due to higher rate of return on account of mark-to-market gains, in portfolio resulting from recent decline in interest rates.
- ❑ The lower tax rate is on account of revision of estimate for deferred tax liability pursuant to taxation law amendment ordinance 2019, leading to a reversal of Rs.365 Cr. related to prior years. Excluding this one time reversal, the effective tax rate for the quarter was 18.2%. Tax rate in FY20 is expected to be about 23% excluding impact of 1x deferred tax liability reversal.

### **Plant commissioning Information :**

- ❑ Plant at Agucha, Rajasthan is ramping up based on the ore production growing around 30%.
- ❑ Plant at Zawar also performed with all protections up almost 25% along with better grades. Moreover, it achieved its highest mined metal in the month of September.
- ❑ Coal mines production volumes and grades affected in 1HFY20 on account of temporary geotech challenges. To mitigate from the same, a rapid development crew for faster declined development and additional levels are being open to dry production.
- ❑ SK mine and Wood job pushed by management to another step towards creating mine of the future by starting to track under on vehicles on a real-time basis for centralized control and monitoring. At SK mine centralized path scheduling and management has begun using onboard, connected tablets for seamless communication with underground mining crew. This will allow management for better utilization of equipment and resources, predictive maintenance and higher productivity.
