

Trading Calls

GRAPHITE BUY 04th November 2019

Weekly chart of Graphite reveals that demand is increasing and supply is diminishing. Rising line from lower levels is displaying trend reversal and creates buying opportunity at current juncture. Scrip formed strong base near 270-275 zone showing multiple support which augur well for the Bulls and indicate surge on upside. Apart from this, decreasing Histogram in MACD daily signals optimism, which further suggest upside move in the counter in coming sessions. Rising RSI above 9 EMA also support bullish move on upside We suggest to buy this scrip around 297-302 and on dip towards 270 for the target of 330 and 345 on upside.

RECL BUY 25th June 2019

Scrip is moving in a well defined ascending channel with multiple touch point and appears to be having a strong support around 138- 142 levels as it bounced back couple of time from the demand line. It also maintained its uptrend on the long term chart and is trading well above its short and long term moving averages(20/ 50 /200 DMA). The momentum oscillator, RSI is also favors the price pattern. One can accumulate the stock around 155 and lower around 138-142 zone for an upside target of 220/260 and a stop loss should maintain 125 closing basis.

GAIL BUY 10th July 2019

Weekly chart of GAIL reveals that demand is increasing and supply is diminishing. Channel support line from lower levels is displaying trend reversal and creates buying opportunity at current juncture. As of now, stock is taking support from its ascending triangle resistance line on monthly chart which augur well for the Bulls and indicate surge on upside. Apart from this, rising Histogram in MACD daily signals optimism, which further suggest upside move in the counter in coming sessions. BUY GAIL AROUND 140-145, ON DIP 120-125 SL 110(CLOSING BASIS), TARGET 180-200

Support	S1: 11840	S2 : 11780
Resistance	R1 : 12000	R2 : 12100

Market Outlook

Nifty is near to hit all time high but advance decline ratio is leaning towards Bears. Nifty reclaimed 12 k induced by the momentum in pvt banks. We continue to maintain our cautious stance on the indices as they are trading near all time high due to this profit booking is expected. As of now, a decisive close is required above 12 k for hitting record high. Crucial supports to watch for resumption of weakness are at 11920 followed by 11840 levels.

VIEW

Bulls dominate the D-street in the first week of Nov series and Nifty 50 gave stellar rally across the board after giving clear breakout on weekly chart. Follow thru buying from FII and positive global developments helped market to give stable move on upside. Capital market tax reforms and improved automobile sale boosted the sentiment of investors at domestic front which pushed sensex to make fresh life time high. For further up move indices has to break its recent high, failure of which can bring doubt about the sustainability of the breakout.

Technical Outlook-

- Index made a decent Bullish belt hold type of candle on weekly chart which have strengthened the prevailing bullish sentiment further.
- Formation of doji candles in the last three days suggest healthy consolidation in near term which could leads further gain for the index
- RSI is also approaching towards oversold zone which further implying consolidation
- Immediate resistance is seen near the zone of 11945-11980 zone from where it can surge higher for making new life time high
- While on downside 11715 level followed by 11490 level will act as key support and breach of this on closing basis can once again catapult the short term trend in favours of Bears.

CHART ANALYSIS

Support 1	11715	Previous resistance now become support
Support 2	11490	Previous Swing low

VIEW

After opening with a subdued session, Banknifty continuously rose to make a weekly high of 30416 on Thursday and closed the week with a net gain of 2.8% over its previous week's close. The buying was witnessed across the board, however State Bank of India, Punjab National Bank and Axis bank were the main catalysts to lift the index higher.

OBSERVATIONS:

- 1) Banknifty is trading above 50, 100 and 200 DMAs.
- 2) Banknifty is approaching towards its short term crucial resistance areas.
- 3) Stochastic reached at overbought zone.

According to the above observations it can be concluded that the near term trend of Banknifty is looking positive as it is trading all the major DMAs. However overbought position of Stochastic is indicating some profit booking from the current level. Currently the index is trading near its short term crucial resistance level of 30905 and a successive closing beyond this level is likely to take the index further higher to 31700 in short term. Therefore we recommend initiating fresh long position in Banknifty either near 29300 or only above 30905.

CHART ANALYSIS

SUPPORT & RESISTANCE LEVELS

RESISTANCE/SUPPORT	BANKNIFTY LEVEL
Resistance 2	30905
Resistance 1	30620
Close	30331
Support 1	29940
Support 2	29670

VIEW

From last ten days, Pair has been consolidating and held firmly on its support but Rupee clawed back some lost ground and gained some strength against US dollar in line with the upside move in domestic equities. Rupee traded with a positive bias tracking the uplift in global risk appetite. We expect for further strength in Rupee in this coming week also.

TECHNICAL FACTORS-

- a) Upside is looking capped as it formed bearish candle on weekly chart
- b) Construction of inverted Cup & Handle is still going on which can act as reversal for this ongoing trend but breakdown is expected below 70.35 level from where Rupee can accumulate strength
- c) Downward sloping line will act as stiff resistance near 71.10 followed by 71.35 mark while sustainability above the same can weaken the rupee till 72 mark
- d) Failure to cross and sustain above the mentioned resistance, it can slip down till 70.35 levels
- e) A decisive close below 70.35 level can take strength of Rupee towards 70.10 and 69.70 levels

Channel support line from lower levels is displaying trend reversal and creates buying opportunity at current juncture. As of now, stock is taking support from its ascending triangle resistance line on monthly chart which augur well for the Bulls and indicate surge on upside. Apart from this, rising Histogram in MACD daily signals optimism, which further suggest upside move in the counter in coming sessions. BUY GAIL AROUND 140-145, ON DIP 120-125 SL 110(CLOSING BASIS), TARGET 180-200

Top Picks for 2019-2020

NICKEL

Nickel prices has risen by more than 60% on worries over supply tightness after the Indonesia announced an export ban on nickel ore from Jan 2020, two years earlier than expected. Moving into next year, Nickel prices may remain supported at Rs 1100 levels and trade higher towards 1400 levels in 2020.

GOLD

MCX Gold prices have witnessed a surge of 21% since last Diwali on account of 15-month long trade tension leads to soft economic growth, monetary easing by the central banks, increasing investment demand from ETF and Central banks buying and Brexit uncertainty. Investors started to lock in gains starting June and in the span of four months gold prices rocketed 15% and made a high \$1566/oz.

U.S. Fed policy makers will review their stance at a meeting on Oct. 29-30 amid speculation that they are set to deliver a third consecutive interest rate cut. Currently even negative interest rates and easing monetary policy is unable to spur the economic activity to balance the Debt to GDP ratio. During the short term, Gold prices may face headwind due to trade optimism and higher bond yields however, for the long term, one must mandatorily add gold in their portfolio due to uncertainty over global economic outlook. We expect Comex Gold prices to test \$1,650 in the coming year 2020.

CRUDEOIL

Crude oil prices are mainly supported by the efforts of OPEC members, same way as it helped falling oil prices in 2016 by introducing production cuts. Crude oil prices managed to rise 21% YTD despite record production from US and persistent demand worries.

OPEC+ nations have planned to discuss on reducing further production in the 5th Dec 2019 policy. This meeting will be deciding factor for the future direction of oil prices.

Last week, base metal prices were hit badly after US President Trump announced to impose additional tariffs on further \$300bn of Chinese imports stating that the 10% tariffs, due to take effect on 1 September which means it will tax all the Chinese imports. This states the trade war has reached on another level slowly damaging the health of the economy and thereby reducing the demand for industrial commodity.

Lead prices started to rise towards \$2100/tonne in June 2019 on the back of supply disruption and environmental crackdowns on smelters in China with additional support coming due to falling inventories. However, looking at the current scenario we believe this upside in prices is unlikely to sustain.

Looking at the demand supply scenario, global lead market shifted to surplus of 13,000 tonnes in May 2019 after showing a deficit of 31,000 tonnes in the month of April 2019. In the coming months, we believe this surplus will expand on account of fall in demand from the auto sector and lower manufacturing activity weakening demand for the metal worldwide.

Demand-Supply Scenario:

According to the ILZSG, the Group anticipates that global lead supply will exceed demand by 71,000 tonnes in 2019. The production is mainly anticipated to expand in China and Australia in 2019. China's lead production expanded 16.6 percent to 2.87 million tonnes in the first six months of 2019 according to the National Development and Reform Commission (NDRC).

	2016	2017	2018	2019*
Mine Production*	4689	4713	4671	4750
World Refined Production	11169	11589	11642	11940
World Refined Consumption	11141	11740	11721	11870
Surplus/Deficit	28	-151	-79	70
<i>Source: ILZSG, Narnolia Research</i>				(Figs in tonnes)

Current Scenario: Three days ago, Nyrstar announced that it has restarted the blast furnace at its Port-Pirie lead smelter in Australia after two months shutdown due to an unplanned outage in late May resulting into a production loss of around 30,000 tonnes. On the London Metal Exchange, the benchmark spread i.e. the difference between the cash price and that for three-month delivery remains at discount of \$13 per tonne. This shifted the current premium of Lead into discount.

Inventory: The rising LME inventory is a cause for concern for the traders. LME warehouses saw an inflow of 27,625 tonnes of lead in a span of one week, taking total LME lead stocks to a one-month high of 85,375 tonnes, although total LME Lead inventories are still down significantly from the 107,000 tonnes held at the start of the year.

Conclusion: The restart of lead plant, rising inventories and increasing production together are pushing the LME forward contract into contango pointing us towards slowing demand for the metal in the coming months. Also the global economy is expected to remain subdued due to rising trade worries between US and China. If the China retaliates with more tariffs on United States we believe LME Lead prices will fall towards \$1770 per tonne in the coming three month time frame. Therefore, one can follow sell on rise strategy in LME Lead at \$2040/tonne.

The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult his/her/its own advisors to determine the merits and risks of such an investment. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. NFAL will not treat recipients as customers by virtue of their receiving this report. Neither the Company, nor its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits or lost opportunities that may arise from or in connection with the use of the information/report. The person accessing this information specifically agrees to exempt NFAL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold NFAL or any of its affiliates or employees responsible for any such misuse and further agrees to hold NFAL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject NFAL & its group companies to registration or licensing requirements within such jurisdictions.
