Quote of the Day : "One of the funny things about the stock market is that every time one person buys, another sells, and both think they are astute."

IIP & CPI	MACRO	14-Nov-19
<p>The Industrial Output for the month of September 2019 contracted for a second month in a row at -4.3%.reinforcing growth concerns in the economy. The IIP has been lowest since November 2012. Consumer Price Index for the month of October 2019 jumped up to 4.62 as opposed to 3.99 in September'19. Higher food prices have led the inflation to a 16 month high figure in October'19. Inflation in food and beverages stood at 6.93% in October. The IIP figures for the month of September'19 have been dismal and fell to an almost 8 year low growth rate of -4.3%. The data along with the upcoming GDP data will reiterate the growth concerns in the economy which will need to be addressed by the MPC.The Consumer Price Index on the back of rising food inflation has seen a higher than expected inflationary trend at 4.62 percent. The rise in inflation on the back of higher food prices is a temporary phenomena and will not take much time to settle back while the headline inflation stays near the RBI's comfortable 4% level which will prompt the RBI to go forward with more rate cuts upto 50bps in this fiscal to help remove the growth concerns.</p>		

INDOSTAR	NEUTRAL	13-Nov-19
<p>In the current liquidity stress and slowdown in the overall economy, management is shifting its focus to corporate from the retail segment. Corporate has not grown in the last few quarters due to management cautious approach to the sector. The NIM was affected on the back of the higher cost of funds and rising delinquency. The GNPA has remained elevated on the rising stress in the corporate, though management has made additional provision amounting to Rs 50 Cr for the likely stress in the corporate account, we remain cautious on the stock with the slowdown in the CV segment &amp; lack of funding. We decrease our estimates by 16% in FY20 and decline our P/B to 0.50x to Rs 188</p>		

EQUITAS	NEUTRAL	13-Nov-19
<p>AUM growth slowed down as disbursement moderated since last few quarters on account of impact of macro conditions. Near term growth likely to get impacted due to regulatory hurdle on branch expansion and economy pressure. Asset quality deteriorated and is likely to saw some more blip in near term which will keep credit cost elevated. However, we don't expect any major deterioration on asset quality front. In the absence of PSLC sales, other income growth has been muted. EQUITAS stock price has been under pressure due to regulatory issues on listing of its small finance bank hence the company is trading with holding company discount. Management expects small finance bank to get listed within 5-6 months. Uncertainly over the reverse merger will further impact the stock price. We reduce our earnings estimate by 16% for FY20 and reduced the target price to Rs 96 at 1x BV FY21e. Downgrade to Neutral.</p>		

MOTHERSUMI	NEUTRAL	13-Nov-19
<p>The global demand situation continues to be benign based on WLTP norms in Europe, uncertainty related to emission norms and transition towards electric vehicles. However the management expects demand scenario to improve in next 2-3 quarters. The margins are expected to improve gradually based on the stable commodity prices, value addition and cost cutting initiatives. But higher depreciation cost on new plants and increased borrowings will continue to put bottom-line under pressure. Going ahead the company is expected to go for acquisitions in order to achieve its USD18 bn revenue guidance which may increase the debt level going ahead. We value the stock at 11x FY21E EPS to arrive at target price of Rs.112 and maintain NEUTRAL.</p>		

ALLCARGO	NEUTRAL	13-Nov-19
<p>MTO business continues to outgrow the global market and likely to maintain the momentum. While CFS business has impacted due to lower import on account of slowdown in consumption and will remain under pressure going ahead. Assets utilization of P&amp;E business continues to remain unsustainable. Current order book is also lower, though the pipeline remaining strong but conversion into order is key to success. We have factored in slow volume growth of MTO and CFS and also cut down P&amp;E revenue growth. Overall we have reduced FY21 EPS estimates by 7%. We maintain our NEUTRAL rating on the stock with the target price of Rs 103 (9x FY21 EPS).</p>
