Nifty Intraday Chart

Market Outlook

Yesterday, Nifty opened positive at 11858.75 and made a low of 11802.65. From there it moved towards the high of 11895.65 and closed positive at 11870.45. On sectoral front indices traded mix as AUTO, FIN SERVICE, IT, MEDIA and PVT BANK closed positive, whereas FMCG, METAL, PHARMA, REALTY and PSU BANK closed with negative bias. India VIX closed negative by 5.84% at 15.50.

Nifty is continuously finding strong support at our discussed level of 11830 (closing basis) since last couple of days. It is the very crucial support level for deciding near term movement of Nifty. Currently Stochastic is approaching towards its oversold zone. If Nifty is able to sustain above 11830 in next 2-3 days, the index may start its fresh upward movement from this area.

Quote of the Day : "One of the funny things about the stock market is that every time one person buys, another sells, and both think they are astute."

AHLUCONT

NEUTRAL

15-Nov-19

Company reported disappointed numbers during the 2QFY20. Revenue was impacted as the work on certain projects was unable to execute due to delay in necessary approvals and heavy rainfall. Margin has fallen for the straight fourth quarter on YoY basis and it is cause of concern. Projects are still facing uncertainties and margins can be impacted, considering this we have reduce our FY21 EPS by 2%. We maintain our NEUTRAL rating on the on the stock with target price of Rs 317.

DBL

BUY

15-Nov-19

Execution in H1FY20 was impacted due to delayed in appointment date and heavy rainfall. Now all the pending appointment date has received except one HAM project, which is likely to be received in December. Additionally, projects won in H1FY20 are expected to start contributes in revenue in this financial year as all the projects are on EP basis. Though, the revenue growth in FY20 is likely to be slow down but the FY21 continuous to remain robust. We have trim down FY20 estimates by 19% and largely maintain FY21 estimates. We value the stock at Rs 517 (EPC business at 7x FY21 EPS and Rs 40 per share for investment into HAM) and maintain our BUY rating on the stock.

MINDAIND

NEUTRAL

15-Nov-19

The operational performance has deteriorated due to sharp contraction in OEM volumes. The demand environment continues to remain uncertain going ahead. Though, new launches have helped to improve retail demand during festive season. Going ahead new plants and addition of new businesses will lead to higher depreciation cost while increased debt level in the books will have negative impact on the bottom-line. However the management seems confident on outperforming the industry in the long run. Factoring the weak demand environment, higher depreciation and debt level we reduce FY20/21 EPs estimate by 10%/8%. We value the stock at 18x FY21e EPS to arrive at a target price of Rs.312 and maintain NEUTRAL.

DIXON

BUY

14-Nov-19

DIXON is reporting continuously strong numbers on back of robust growth across the segments, especially in consumer electronics, lighting and mobile business. The management's focus remained on the client addition, backward integration and capacity expansion to meet the growing demand. During the quarter company has acquired Samsung as client for mobile manufacturing and in advance stage of discussion with 2-3 large customers. Additionally with increased size and scale in lighting business company is targeting the global markets. We believe that the company's focus on client addition, backward integration will result into sustainable growth going ahead. We have increased our EPS estimates by 13/5% on account of better than expected result. We value the stock at Rs 3984 (28x FY21 EPS) and maintain our BUY rating.

MUTHOOTFIN

BUY

14-Nov-19

NII and PAT have shown a robust growth during the quarter by 32% & 77% YoY which was mainly driven by strong collection effort by the management. Lack of liquidity has made management to lower its disbursement & consequentially declining the advertisement expenditure. However, management remains confident of growth in 2HFY20 and reiterates growth guidance of 15% for FY20. Management expects the cost of borrowing to increase further as the recent foreign borrowings raised are priced higher than domestic borrowing. We expect with strong pricing power management will be able to pass on the cost of borrowings to customers. Management has guided to keep the excess provision of Rs 120 Cr on the balance sheet and account the excess write off amounts through the P/L account, but we remain confident on this front with strong gold price and collection effort. We remain slightly cautious on the growth front with liquidity constraints on the sector, as the stock has corrected so much in the last 1 year that the valuation gives us sufficient room to maintain BUY. We value the stock at P/B 2.3x for FY21e at 828. Maintain BUY.
