2QFY20 Result Update

- GABRIEL reported a revenue of Rs. 473 Cr. (vs our estimate of Rs. 495 Cr.) de-grew by 12.7% YoY largely on account de-growth in PV and CV segment of 39% and 27% YoY respectively.
- 2W segment revenue grew by 3% YoY despite the overall decline of 15% in 2W segment at industry level. The growth was due to the increase in market share of TVS and adding the current trending models like; JAVA model by Mahindra, RE twins model, Suzuki models etc which are performing well.
- Overall industry volumes decline particularly in MCV, LCV, PV and 2W by 50%, 26%, 24% and 15% YoY.
- Segment mix during the quarter stood at 2W, PV and CV at 70%, 18% and 12% respectively.
- Gross margin during the quarter reduced by 150 bps QoQ to 25.1% on the back of higher raw material cost as certain models added were at higher raw material content.
- EBITDA margin contracted by 140 bps to 6.6% in 2QFY20 on account of higher employee cost.
- PAT during the quarter stood at Rs. 18 Cr. along with the PAT margin of 3.9%. Lower tax rates restricted further decline.
- CAPEX is expected to be around Rs. 70 Cr. for FY20 which is mainly for the Sanand plant which is fully functional and customer audit will be in 3QFY20. Management expects commissioning of plant in 4QFY20.
- Sanand Plant is completely functional and ready for production but based on the customer timeline, its production shifted by 2 months.

View and Valuation

The domestic market continues to be challenging with sharp reduction in volumes across industry. This leads to higher fixed cost and weaker operating leverage resulting in margin erosion. The export pie has also contracted due to phasing out of old models in Columbia and slowdown in two major export markets; Sri-Lanka and Latin America. The margin profile will continue to be below 9% because of weaker operating leverage and higher fixed cost on upcoming Sanand plant. Factoring the uncertainty in demand and adverse product mix (reduction in PV share), we value GABRIEL at 15x FY21e EPS to arrive at a target price of Rs.106 and maintain Neutral rating.

Key Risks to our rating and target

- Prolonged slowdown in automobile Industry (85% of revenue from OEMs).
- Volatility in commodity prices.

Revenue de-grew by 12.7% YoY led by PV and CV segment

Net sales in 2QFY20 is Rs. 473 Cr. de-grew by 12.7% YoY on the back of decline in PV and CV segment by 39% and 27% YoY respectively. However, 2W segment grew by 2% YoY despite decline in overall industry by 15%. Growth in 2W segment was on account of increase in the market share and the orders for the trending model in the market. Segment mix during the quarter stood at 2W, PV and CV at 70%, 18% and 12% respectively. Channel mix across OE, Replacement and Exports stood at 85%, 13% and 2% respectively. Management expects replacement market to grow going ahead.

Higher raw material cost hampered margins

Gross margins contracted by 150bps QoQ to 25.1% on account of higher raw material cost of the current new model in the portfolio. Lag effect of the reduced commodity prices are still pending and not set off completely which might expand the margin in the upcoming quarter. EBITDA margins also reduce by 140 bps to 6.6% on the basis of higher employee cost.

Lower tax rates helps to sustain PAT at certain level

PAT during the quarter stood at Rs. 18 Cr. with a PAT margin of 3.9%. Tax rates in 2QFY20 remains lower on exercising the option permitted under section 115BAA of ITA 1961, within which the company has recognized provision for income tax and re-measured its Deferred Tax Assets/liabilities on the basis of the rate prescribed within the section.

Concall Highlights :

- Segment mix during the quarter shifted more towards 2W which is 67% with an increase in the market share also
- Overall industry volumes decline particularly in MCV, LCV, PV and 2W by 50%, 26%, 24% and 15% YoY.
- No major revival within the industry is expected by the management till the BS VI implementation will take place.
- 2W volumes grew by 3% YoY despite the decline in industry volumes by around 15%. The growth in 2W segment is due to increase in the market share of existing customers (TVS) as well as new customers, new trending models like JAVA model by Mahindra, RE twins model, Suzuki models are performing well.
- PV and CV (particularly LCV, MCV and HCV) volumes decline by 50%, 30%, 59% and 59% YoY respectively.
- Railway segment is almost 2x YoY basis in CV segment and is expected to perform well going forward.
- Exports contribution reduced to 2% (4% in FY19) of the total revenue due to Columbia the certain models were discontinued and the supply of new volumes will be there from FY21, Thailand volumes (ISUZU) are very low compared to the orders given to GABRIEL.
- Decline in the commodity prices has not impacted completely with the reduction in the raw material prices; the lag effect is still there to continue. Certain model mix has also higher raw material which is expected by management to be reduced going ahead.

Exhibit: Net sales (Rs. Crore) and growth trend

Revenue de-grew by 13% YoY due to degrowth in PV and CV segment.

Exhibit: Segment Wise Revenue (Rs. Crore)

PV and CV segment de-grew by 39% and 27% YoY while 2W/3W grew by 3%YoY.

Exhibit: EBITDA (Rs. Crore) and EBITDA Margin trend

Higher employee expense and reduced GROSS margins hampered EBITDA and EBITDA margins.

Exhibit: PAT (Rs. Crore) and PAT Margin trend

PAT level sustained on account of lower tax during the quarter.

Exhibit: Channel Mix Revenue growth

Revenue growth largely driven by OEMs.

Exhibit: Return Ratios

Lower profitability reduced the return ratio.
