View and Valuation

KVB has been showing signs of almost muted growth in last few quarters due to challenging macro environment. Corporate and commercial segment have been the reason for slowdown due to reduction on the higher ticket loans. SME segment is expected to improve as management thinks the large ticket size pains are behind KVB. However, retail loan continue to register healthy growth driven by home loan and personal loan. Asset quality improved on the account of better recovery but gross slippages is likely to surpass the previous guidance. However management is confident of maintain the net slippages guidance on account of higher recovery. Increasing share of retail assets will help the margins to improve. We maintain our target price of Rs 66 at 0.7X BVFY21e and Maintain HOLD.

Key Risks to our rating and target.

- Stress in corporate and SME segment
- Unfavourable macro environment will pressurize the growth
