Mixed quarter; Lower end guidance revised

3QFY20 Result Update

- HCLTECH reported mix set of numbers in 3QFY20 result. Revenue for the quarter grew16.4%YoY in cc terms to USD2543 (below our estimates by 2%) While PAT grew 13%YoY to Rs 2944, beating our estimates of Rs 2743 crore; primarily led by lower tax
- Organic growth during the quarter was just under 10% YoY and 0.3%QoQ.
- EBIT for the quarter was at Rs 3687 crore, a growth of 19.3%YoY. EBIT margin stood at 20.2% which is 28bps improvement .The margin expansion was largely attributable by higher growth from HCL software segment (22bps) and rest came from IT and other businesses, while E&RD reduced a bit during the quarter.60 bps wage hike was completely offset by 60 bps benefit from operational efficiency.
- Company reported a double digit growth in 5 out of 7 verticals (some of them are in 30% range). Life science and healthcare delivered a high single digit growth of 8.9% YoY while manufacturing, E&U, Public services has delivered a stellar growth in 3Q. In geographies, all the geographies grew double digit growth YoY (US, Europe and Row) basis While Row led the growth with 27.3% YoY growth.
- The company crossed USD10 billion dollars annualized run rate during the quarter.

Solid growth in P&P, while E&RD impacted by furloughs

The company delivered outstanding performance in its HCL software business which helped the product and platforms segment to grow by 16.8% sequentially in constant currency .This business scaled up aggressively and added close to 4600 customer across all part of the global .3Q saw higher time taken by client and higher furloughs impacting the E&RD business .Despite that engineering business grew 12.8% and 0.7% sequentially in cc terms. IT and services business grew 10.4% YoY and was almost constant sequentially in cc terms. IT and business had furlough impact and also dropping some accounts impacted the growth .

Deal wins to pick up from 4Q

The company continued to see good traction in the market .However in 3Q experienced a dip in bookings which was primarily due to timing issue and client have taken little longer to decide .Booking is little lower than last quarter. But qualified pipeline is all term high and management is confident of a higher conversion of pipeline to booking in 4Q.

Lower end guidance revised

At the beginning of the year, the company had guided of 14% to 16% and further increasing to 16% to 17%. The company now revised its lower end of the guidance with 16.5% to 17%, out of which inorganic growth will come at 6% and rest organic guidance 10.5% to 11%. On Ebit side the company revised it to 19 to 19.5% for FY20.

View and valuation

HCLTECH has reported a moderate growth in both its revenue and margins in 3QFY20. Organic revenue grew just under 10%YoY mainly impacted by higher furloughs and strategic dropping some accounts while margin stayed at 20%range largely driven by higher margin business(HCL software segment).HCL software supported the product and platforms which grew16.8% sequentially offsetting some drag from Organic business . Going ahead, we believe the HCLTECH will clock industry leading growth of $^{\sim}15.8\%$ YoY in FY20 driven by strong organic growth with continued deals ramp up. Also inorganic growth is expected to inch up supported by more client addition(4600 added during the quarter).

On margin, despite higher amortization and R&D spend, we expect HCLTECH to achieve midpoint of the guidance in FY20 on account continued expansion in HCL software business (higher margin business).

Post result, we have fine tuned our revenue estimates by -0.8%/-1.3% for FY20/21E and PAT estimates by 2%/-0.6% seeing a bit lower booking .Thus we largely maintain our target price of Rs 668 and recommend Accumulate.

Key Risks to our rating and target

- Slow growth in order book and weakness in IMS.
- Continued drag on organic growth.
