

## Trading Calls

**PNCINFRA BUY 23rd January 2020**

Scrip is undergoing a consolidation in the longer time frame and is on the verge of resuming its prior trend. Formation of cup and handle pattern on weekly chart suggest short term momentum to the uptrend. The momentum indicator MACD has crossed the signal line indicating a start of a trend. The RSI too is above its key 50 mark indicating positive momentum on its side. We recommend a BUY in PNCINFRA around 190-193 and a lower towards 178-182 with a stop loss of 166 and aim for a target of 225 and 250 levels.

**WIPRO BUY 04th December 2019**

The stock has witnessed a decent correction recently from the peak of 300 and took a halt near line of polarity while forming double bottom pattern on daily chart. RSI turned from oversold zone and MACD has indicated a reversal to maintain a positive bias which is showing potential to rise further in the coming days. With the chart looking attractive and decent volume participation witnessed, we recommend a buy around 238-234 and on dip towards 224-228 in this stock for an upside target of 260 & 270, keep a stop loss of 218 on closing basis.

**ITC BUY 22nd November 2019**

ITC has formed double top on daily scale and there after it has retraced almost 80% from there and finding support around 245. Stochastics is giving sign of reversal at current levels, volume is also supporting this setup. Hence we advice our client to accumulate ITC in the range of 250 to 244 and on decline towards 237-233 for the price targets of 264 and 274 with 218 as SL on closing basis.

**LT BUY 15th November 2019**

Since 24th Sep LT is falling corrective by time and price wise both. It has retraced almost 70% from recent meaningful top of 1551 in simple abc format. Right now its trading in wave c of 2 which is near completion. We see less downside threat in this counter, hence we advice our client to accumulate in the range of 1385-1365 and on decline towards 1330-1310 for the price targets of 1465 and 1510 with 1269 on closing basis as SL.

**GAIL BUY 10th July 2019**

Weekly chart of GAIL reveals that demand is increasing and supply is diminishing. Channel support line from lower levels is displaying trend reversal and creates buying opportunity at current juncture. As of now, stock is taking support from its ascending triangle resistance line on monthly chart which augur well for the Bulls and indicate surge on upside. Apart from this, rising Histogram in MACD daily signals optimism, which further suggest upside move in the counter in coming sessions. BUY GAIL AROUND 140-145, ON DIP 120-125 SL 110(CLOSING BASIS), TARGET 180-200

Market	Value	% Change
SGX Nifty (at 8.00 am IST)	12085.50	-0.25%

### Nifty Key Levels For The Week

Support	S1: 12085	S2 : 12050
Resistance	R1 : 12150	R2 : 12210

### Market Outlook

Bears captured the whole day after giving gap down opening and registered bearish candle as supply pressure emerged from higher levels. Index is approaching its trendline support which also coincides with 50 DMA that is acting as support from past few sessions. A breakdown below 12085 level could drag it towards 12050 & 12000 levels. On the flip side, a sustained trade above the 12150 level may trigger a short-covering rally to 12210 levels.

### VIEW

Bulls got relief to a certain extent after witnessing the heavy cuts of three days as market recouped some of its losses on last two days trading sessions of the week. Despite the gains in the market, traders are worried about risks that are related to downgrading growth projection of GDP's to 4.8% for FY 2020, subdued Q3 results and global bio trade war from the outbreak of a new coronavirus of china which may further dampen the sentiment of market. However, hopes of the stimulus package in the upcoming budget to revive the economy will keep downside capped for limited period of time. Going forward, we maintain our cautious stance on the market as the near term movement is likely to be driven by the upcoming Union budget which is scheduled on 1st feb. Traders are strongly advised not to create excessive exposures unless breakout is achieved on either of side.

#### Technical Outlook-

- a) Index faced strong resistance from the upper band of resistance line and formed **Bearish engulfing** along with **bearish belt hold pattern** suggest an intermediate top has been placed for a while.
- b) However, appearance of **Tweezer bottom** candlestick price pattern near **50 DMA's** on daily chart has a bullish connotation for the near term
- c) If index fails to sustain above 12300 levels on weekly closing basis then this pullback may end with **Dead Cat Bounce** then after it will form Bearish Head and shoulder pattern while forming right shoulder
- d) Indicators and oscillators are also looking mixed suggest rangebound move on either of side
- e) Nifty is nudging with its support line and any close below 12085 level can resume the weakness towards 12000 and 11925 levels on downside
- e) However any trend reversal in favour of Bulls can be expected on a close above 12300 followed by 12430 levels

### CHART ANALYSIS

### SUPPORT & RESISTANCE LEVELS

	NIFTY LEVEL	JUSTIFICATION
Resistance 2	12400	Extension leg
Resistance 1	12300	Peak of Left Shoulder
Close	12248	
Support 1	12085	Low of Tweezer Bottom
Support 2	12000	Psychological level

### VIEW

After opening on a negative note, Banknifty fell to make a weekly low of 30614 on Wednesday. However some pullback to 31375 was witnessed in next couple of trading days. At the end of the week Banknifty closed at 31242. It had a net loss of 1% over its previous week's close.

#### OBSERVATIONS:

- 1) Banknifty came to near its short term strong support areas. (near 100 & 200 DMAs)
- 2) Stochastic and RSI have reached at their oversold zone.

In reference to the above observations it can be said that Banknifty has reached near its strong support areas and it is very unlikely to breach 200 DMA (currently is at 30070) in the extreme short term. Current oversold position of leading indicators are also suggesting of some upward movement in the extreme short term. Therefore traders are advised to adopt 'buy on deep' strategy at this juncture.

### CHART ANALYSIS

### VIEW

From last two weeks, Rupee has been trading within a very tight range as market participants awaited further detail about coronavirus of china that killed 25 people and infected around 650 globally. WHO called an emergency in China but avoided in declaring as an epidemic for other nations. Decline in crude oil prices due to muted demand restricted the Rupee's fall. Going forward, investors will be keeping an eye on the FOMC meeting and upcoming union budget which can give momentum and will help Rupee to break this tight range.

#### TECHNICAL FACTORS-

- a) Two bullish candle on weekly chart showing downside capped for short interval of time for USDINR pair
- b) From last few weeks, pair has been trading in the range of 72.15 on upside and 70.50 on downside
- c) Flat negative crossover in MACD suggest loss of momentum
- d) Resistance stands at 71.55 followed by 72.15 mark
- e) Support lies at 70.50 followed by 70.35 mark

**STDC BUY GAIL AROUND 140-145, ON DIP 120-125 SL 110(CLOSING BASIS), TARGET 180-200**

Weekly chart of GAIL reveals that demand is increasing and supply is diminishing. Channel support line from lower levels is displaying trend reversal and creates buying opportunity at current juncture. As of now, stock is taking support from its ascending triangle resistance line on monthly chart which augur well for the Bulls and indicate surge on upside. Apart from this, rising Histogram in MACD daily signals optimism, which further suggest upside move in the counter in coming sessions. BUY GAIL AROUND 140-145, ON DIP 120-125 SL 110(CLOSING BASIS), TARGET 180-200

Crude oil prices shot up by 5% in yesterday's session stood at \$63.86/bbl after the US airstrikes at the Baghdad International Airport. It killed Iran's general manager Qasem Soleimani who is the leader of Islamic Republic's elite Revolutionary Guards.

Also, the same attack killed the Iraq's Abu Mahdi Al-Muhandis, the deputy commander of the Iran-backed militias reported Reuters. This airstrikes has exacerbated the already heightened tensions in the Middle East. Tensions have been increasing between Washington and Iran after an Iran-backed Iraqi militia stormed the American embassy in Baghdad to protest deadly U.S. airstrikes earlier this week.

Iran officials have said they will give an immediate response to Washington over the attack further escalating tensions between the two countries Iran and United States. If the conflicts spread to the oilfields, we could see the shutdown of oil production in the region.

Looking at the demand supply scenario, OPEC+ nations has curtailed its oil production by another 2.1 million barrels as discussed in the previous OPEC meeting in December 2019. From starting this month, OPEC is also expected to increase their reduction in output. The global demand supply of oil is estimated to remain balanced and show a surplus of just 0.4 mbpd in the Q1 2020. However, demand prospect remains dim.

The recurring attacks on oilfields and oil producing countries are the upside risk to the oil prices. Last year, Saudi oil facilities and oil tankers were targeted by the enemies. Any attack on five big OPEC producers will be the risk to the oil prices. With rising Middle East tensions, there is a threat to the global energy exports if the Strait of Hormuz is anytime on the list. This strait is the largest and the crucial shipping route will always remain in focus when tensions like these flare up.

At present, the front month Brent-WTI spread opened at \$5.65/bbl, widest since November. Currently, the Dec 2020 future contract is trading at a backwardation of \$5.05/bbl as compared to \$4.66/bbl over previous week. It means current month prices are trading at a premium and indicates that the market is expected to remain tighter in future.

Taking above situation into consideration, if the Middle East tension rises we can see huge spike in oil prices in the months to come. With the balance demand supply and improving US-China trade relations we can expect further upside in oil prices is unavoidable. Therefore, we expect Nymex Crudeoil prices to remain supported at \$60/bbl and extend its higher move towards \$68-70/bbl in the first quarter of 2020.

### Top Picks for 2019-2020

#### NICKEL

Nickel prices has risen by more than 60% on worries over supply tightness after the Indonesia announced an export ban on nickel ore from Jan 2020, two years earlier than expected. Moving into next year, Nickel prices may remain supported at Rs 1100 levels and trade higher towards 1400 levels in 2020.

#### GOLD

MCX Gold prices have witnessed a surge of 21% since last Diwali on account of 15-month long trade tension leads to soft economic growth, monetary easing by the central banks, increasing investment demand from ETF and Central banks buying and Brexit uncertainty. Investors started to lock in gains starting June and in the span of four months gold prices rocketed 15% and made a high \$1566/oz.

U.S. Fed policy makers will review their stance at a meeting on Oct. 29-30 amid speculation that they are set to deliver a third consecutive interest rate cut. Currently even negative interest rates and easing monetary policy is unable to spur the economic activity to balance the Debt to GDP ratio. During the short term, Gold prices may face headwind due to trade optimism and higher bond yields however, for the long term, one must mandatorily add gold in their portfolio due to uncertainty over global economic outlook. We expect Comex Gold prices to test \$1,650 in the coming year 2020.

## CRUDEOIL

Crude oil prices are mainly supported by the efforts of OPEC members, same way as it helped falling oil prices in 2016 by introducing production cuts. Crude oil prices managed to rise 21% YTD despite record production from US and persistent demand worries.

OPEC+ nations have planned to discuss on reducing further production in the 5<sup>th</sup> Dec 2019 policy. This meeting will be deciding factor for the future direction of oil prices.

**Disclaimer:**

This report has been prepared by Narnolia Financial Advisors Ltd. (NFAL) and is meant for sole use by the recipient and not for public circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of NFAL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult his/her/its own advisors to determine the merits and risks of such an investment. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. NFAL will not treat recipients as customers by virtue of their receiving this report. Neither the Company, nor its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits or lost opportunities that may arise from or in connection with the use of the information/report. The person accessing this information specifically agrees to exempt NFAL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold NFAL or any of its affiliates or employees responsible for any such misuse and further agrees to hold NFAL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject NFAL & its group companies to registration or licensing requirements within such jurisdictions.
