View and Valuation

The growth remains muted on the back of sluggish economic condition, though there has been slight uptake in the month of November in the mining, infrastructure & construction segments. Management has cautiously declined the LTV & focus towards the used vehicle segment. Management has optimistically guided to decline the credit cost level to 2% or below it in FY21. The rural outlook is positive as the Kharif crop output has been at a 5 year high while good monsoon (LPA 110%) has increased reservoir level thus keeping us positive for the Rabi crop harvest. However, we remain cautious on the growth and asset quality front due to moderating economy growth, however the stock is trading at 1x P/B at FY21 which gives us comfort on the valuation front. We maintain our BUY rating at the previous target price of Rs 1334 at 1.4x BV FY21E.

Key Risks to our rating and target

- ❑ Slowdown in auto industry will hamper the growth
- ❑ Rise in the number of repossession will affect credit cost.
