Quote of the Day: "An investment in knowledge pays the best interest"

CAPACITE BUY 12-Feb-20

Revenue performance in the first 9 months of the year remained muted and revenue growth for the full year FY20 will remain flat or 3-4% down as the majority of the orders are at mobilization stage. However, execution in FY21 is expected to improve as the large public sector orders start contributing in revenue. Management's conservative approach towards the working capital/Cash management and not to compromise the balance sheet strength just to add revenue, ensure the sustainable growth level in the long run. We maintain our FY21E EPS estimates and value the stock at Rs 209 (9x FY21E EPS) with BUY rating.

UNIONBANK NEUTRAL 11-Feb-20

The growth is expected to remain muted on the back of management cautious approach towards stress in the corporate and SME segment. The deposit traction was mainly led by the term deposit while CASA is trending at an almost stable 34% range for a long time frame. The asset quality has slightly improved from 15% range on the back of fewer NCLT resolution, Further management has guided for Rs 3000 Cr of recovery going ahead which will decline the GNPA% to 14% and NNPA to 6%. However, with the sticky nature of the resolutions, we remain cautious the entire benefit of these resolutions to accrue in the medium term. Along with its mere 25% provisioning is provided in the recent Rs 2267 Cr of HFC default, so going ahead we expect elevated credit cost to affect profitability. The merger process is as per the planned scheduled while complete technological integration will take 9-12 months time frame. We maintain our NEUTRAL stance in the stock at 0.36x P/B FY21e at Rs 57

BRITANNIA ACCUMULATE 11-Feb-20

Britannia has posted numbers better than our expectations. Positive for the quarter was EBITDA margin expansion in spite of inflation in key raw materials prices. Cover on input prices and company's cost saving initiatives with flat advertisement expenses helped in expansion in EBITDA margin. Going forward, we expect company's thrust on distribution expansion and category expansion with premiumization to drive growth. While judicious pricing and strategic input buying with cost saving measures will help in better margins. Considering government rural initiatives, we are optimistic of bouncing back of demand in few quarters time. We have kept our estimates for FY20 and FY21 largely unchanged. We maintain accumulate rating with the previous target price of Rs 3482.

KAJARIACER NEUTRAL 11-Feb-20

The demand sentiment for tiles in Q3FY20 remained sluggish led by sustained weakness in real estate sector and continued slowdown in the overall economy. In the near term, demand is expected to remain impacted on account of subdued demand. Considering favorable input prices to continue, margins are expected to be maintained at current level. Taking into account uncertainty in demand we give NEUTRAL rating with target price of Rs 571 (11x FY21e EV/EBDITA).

DBL HOLD 11-Feb-20

Execution in the first 9 month was remind impacted due to delayed appointment date and extended moons and revenue for the full year will likely to remain flat. Execution will only pick up next year and we expect robust growth in the next financial year. Order inflow is also expected to pick up and company will likely to receive Rs 5000-7000 Cr of new orders which will provide strong revenue visibility going ahead. We have largely maintained our FY21E EPS estimates but considering the execution hiccups in FY20 we have reduce our exit multiple and now value DBL at Rs 424 with HOLD rating on the stock.

M&M Q3FY20 Concall Highlights

☐ The management expects automotive segment growth to be in-line with industry growth in FY21. Hence, the guidance is of 2-4% growth for PV, 4-6% for CV and 5%YoY for Tractor industry.
☐ The rural demand should pick up based on 8% above normal Rabi sowing and increased reservoir levels.
☐ The BS-VI cost impact is Rs.15000-20000 for petrol cars while Rs.50000-60000 for diesel cars. The pass through may
happen in phases considering the slow-down in the industry.
Ssangyong Motor Corporation (SYMC):
☐ M&M has taken an impairment of Rs.600 crores in 3QFY20. SYMC has also impaired the assets worth KRW 57bn (Rs.342)
crores).
Further the management committee has come up with a turnaround plan for SYMC by 2023:
a) Needs USD 450-500mn of investment to be funded through external borrowings, 3rd party and M&M. Half of the
investment amount will be utilized in repayment of loans and rest in product development.
b) The company has already entered in agreement with labour union where the union has agreed to take a hit on their
compensation.
c) The company will look into new export markets such as; Russia and Vietnam.
d) The new product developed in collaboration with M&M will bring synergies to the organization.
Ford and M&M collaboration:
a) Ford will launch a new product this week while M&M will launch by the end of March 2020.
b) M&M will utilize Ford's plant to expand its engine capacity which will lead to a cost saving of Rs.400 crores.
c) The companies are working on C-SUV platform which will fetch a saving of Rs.1000 crores if both the companies had
developed the platform separately.
Timeline of new launches:
□ 1QFY21: E-KUV, New Thar
□ 2QFY21: Atom EV (mass mobility)
☐ 4QFY21: W-601 (brand new platform)
□ 1QFY22: Z-101
□ 2QFY22: E-XUV-300
□ 2QFY22: K2 platform for tractors where the launches will carry on for next 2 years.

☐ The fleet segment will grow rapidly going ahead.

☐ The company is selling 1500 volumes a month (500 Trios and 1000 e-alpha)

☐ Mahindra Electric is expected to become EBITDA positive in FY21.
